PLANS TO GO TO INDIA AFTER ONTARIO TOUR

AFTER ONTARIO TOUR
Chicago, March 30—India is going
dry! This statement is based on the
assertion of William E. (Pussyfoot)
Johnston. He is going to India in a few
months, he said, while in Chicago today,
to see that it is carried out.
After resting a week, Mr. Johnson expects to go to Ontario for a series of
meetings. Then he will go to England
and from there to India.

With men who smoke the films are apt to be particularly discolored. They will see the most conspicuous results. But children need Pepsodent most. Their teeth are most subject to decay. Dentists advise that Pepsodent be daily applied from the time the first tooth appears. It may save them troubles life-long in effect.

FREE This week only

At any drug store named below, a 10-day tube of Pepsodent. Simply present the coupon. Let this new way prove itself. Judge by results what it means to you. Learn now the way that millions know to whiter, safer teeth.

31 5

Now daily used

by millions

Millions of people are now using Pepsodent. You can see the results wherever you look—in glistening teeth.

Women who think their teeth white now should see how they look with

the film gone.

For Beauty's Sake

Remove that film-coat from your teeth

Teeth cannot glisten with a film-coat on them. You who want white teeth must learn how to remove it.

This week your druggist offers—free—a new way of teeth cleaning. Millions now employ it.
Leading dentists everywhere advise it. Go make that test. One week's results will be a

Film—the great enemy

But this is more than a beauty question. Film ruins millions of teeth. Most tooth troubles are

Film is that viscous coat you feel. It clings to teeth, enters crevices and stays. The ordinary tooth paste cannot end it, so the tooth brush has left much of it intact. It is the film-coat that discolors, not the teeth.

Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. All these troubles have been constantly increasing, because brushing failed to end that film.

Now a new dental era

Dental science, after years of research, has found ways to combat film day by day. The methods have been proved efficient by many careful tests. High authorities endorse them. And millions of people now employ them, largely by dental advice.

These methods are combined in a tooth pasts called Pepsodent. Together they combat the film as nothing else has done. And they are fast bringing, the world over, a new era in teeth cleaning.

That is the tooth paste you are urged to test. See the instant results—watch the effects for ten days. Then decide for yourself between the old ways and the new.

The unique effects

One ingredient of Pepsodent is pepsin. Another multiplies the starch digestant in the saliva to digest starch deposits that cling. The alkalinity of the saliva is multiplied also. That to neutralize the acids which cause tooth decay. Two factors directly attack the film. One of them keeps teeth so highly polished that film cannot easily adhere.

The Pepsodent effects come with every application. Day by day they fight the teeth's great enemies. And teeth are protected as they never were before.

See and feel it act

Present this coupon for the 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

The results are quick and apparent. A little book tells the reasons for them. For your own sake learn how much they mean.
