Ambrotypes, Milainotypes, and Speculotypes.

THE Subscriber, grateful for the patronage extended to him since opening his AMBROTYPE ROOMS, begs to inform the inhabitants of ST. ANDREWS, that he is making a new style of AMBROTYPE, which he claims as his own discovery, and which he has worked into practical use.—The Pictures, in the opinion of competent judges, are far superior to any other style taken upon glass. They are superior to the raised Ambrotype, which have attracted so much attention.—Their tone is soft and rich. Being taken on glass, they are exceedingly brilliant, perfectly distinct in any angle, very different from the Daguerreotype, which must be held in a particular light to see the Picture The intensity, and clearness of the shades, combined with the richness of the lights, and the accuracy of the middle tints, give them a superiority over every other style of picture in light and shade.

Any one wishing a demonstration of these facts can be gratified by seeing specimens of this new kind of picture at his Rooms.

In consequence of stormy weather his Rooms still continue open, and wishing to give all an opportunity to obtain a low as well as high priced picture, he will put up three different qualities in the same same kind of case at the following prices:—

SMALL PICTURES, including case, from 3s. 1½d., to 5s. 7½d.

COMMON SIZE PICTURES, including case, from 4s. 4d., to 7s. 6d.

LARGEST SIZE PICTURES, including case, from 17s. 6d., to £1 5s.

Speculotype.

A PERFECT MIRROR and a perfect picture as the name signifies. This is a style of picture which I have "got up" since opening Rooms here.

An assortment of JEWELRY for sale very low, to suit the times.

Remember! Pictures taken equally well in all weathers.
