Victoria Meteorologica Office,

26th December to 1st January. For the first three days of this week ab normally high barometric pressure prevailed throughout the North Pacific Coast, accompanied by moderate winds and generally cloudy weather and an absence of rain. During the night of the 28th this high barometer area moved south, giving place arranged for. to an ocean low area which crossed this snowfall.

month another extensive high barometer area covered the Pacific slope from Northern British Columbia to California. The .-Mrs. Richard Beauchamp, wife of area covered the Pacific slope from Northern Eritish Columbia to California. The weather during this nariod was generally fine and frosty, with light to moderate winds throughout this province and the adjoining states. On the night of the 31st a decided change in the Coast weather conditions set in; the high barometer area moved south and east in advance of an extensive and important ocean storm which, by midnight, was centred off Vancouver Island. This disturbance caused a moderate southeast gale about Victoria, and the commencement of a phenomenally heavy snowfall on the Lower Mainland. By the night of New Year's day New Westminster reported a fall of 18 inches, Chilliwack two feet, Vancouver less than a foot, while at Yale there was scarcely any. Considerable snow fell on the highland around Victoria,

snow fell on the highland around Victoria, while in the city not more than 1 inch of melting snow fell, the rest being rain. During this day considerable rain fell along the Coast from the Straits of Fuca south-

Victoria had 14 hours and 54 minutes bright sunshine, .51 inch of rain, and a tenth of an inch of snow. The highest ing municipal elections notices in differlevest was 31 on the 31st.

At New Westminster there was .26 inch
of rain and 26.4 inches of snow. The
inghest temperature was 44 on the 26th,
and the lowest 22 on the 30th and 31st.

Tide Tables For Victoria

By Tidal Survey, Ottawa.

Approximate Based on the Records of the Gauge in the Harbor.

the Coast from the Straits of Fuca southward to California, accompanied by high southerly winds. The latter part of this week has been intensely cold in the Territories, the temperature ranging from 10 below zero in Alberta to 40 below in Manient there that the Victoria tides cannot be correctly deduced from that port. Accordingly, in the United States tide tables, Victoria is referred to the distant port of Galveston, on the Gulf of Mexi-

The tide tables now issued by the tida! upon only one year of tidal record, but a second year is now undergoing same process of analysis, which will result in an improvement in the accuracy

of the tide tables. This will confer a boon upon mariners in these waters, which is very creditable to the marine department, when the tidal survey has to be carried on with such limited means. This survey which has been in charge of Mr. W. B. Dawson, C. E., since 1894, has already secured sufficient tidal information to enable tables to be issued for several har-bors in the East; notably Quebec, St. John and Halifax; and the extention of the work to British Columbia this year forms a new point of departure. The forms a new point of departure. The tidal tables now issued furnish information also for ports in the Strait of

DECLARED A DIVIDEND. The Wreck Bay Placer Mines Showing Up Wonderfully Well-Results of

Storm. John Chesterman, a prominent Clayoquot settler, has been in the city during the past few days, one of the objects of his visit being to stand by his old friend Edwin Lee, who last evening entered the blissful state of matrimony. Mr Chesterman reports prosperous times on the West Coast, and this, in considera tion of the trying conditions experienced there of late, such as unfortunate wea ther, is a striking commentary on the It is gratifying to announce that tide favored island. The fact that under all circumstances the natural strength and otentialities of the recently exploited district enables it to maintain its status along the line of advancement, becomes plainly evident as each roseate report is

A fortnight ago last Saturday, as has been previously reported, the terrible storm which played havoc with many stout ship, swept the coast and trucu lently worked its will on everything oper to destruction in its route. Wreck Bay the locality which is now famous for it placer properties, was not spared. The damage here consisted principally of the emolition of machinery utilized by the mining men there, such as copper, silver plates, etc. These had been allowed to remain too low on the beach-about a hundred feet down-and consequently were at the mercy of the storm. amount of the damage is estimated in the neighborhood of \$1,000. According to the contract in connection with the operations, Messrs, Sutton and Grahame the contractors, will sustain the loss. Underterred, however, they have im

nediately placed an order with a local firm for supplying the necessary machinery, and the work will be resumed with the same activity which has characterized operations in the past. The large flume and all its tributary flumes have given the greatest satisfaction, and the prospects are bright indeed.

As an evidence of the success attending the work, it is interesting to note that at a general meeting of the Wreck Bay Placer Mining Company, held at Ucluelet on the night of the 30th, according to the news brought by Mr. Chesterman, a substantial dividend was declared, which amounts to about \$1.02 per share.

The settlers at Ucluelet have certainas they recently held a meeting for the purpose of making the arrangements necessary for the erection of a large hall there. The amount required was subscribed in less than half an hour, and the new hall will be erected across the baye on a favorable site. It is safe to predict therefore that the good people of the district will have ample opportunity of enjoying themselves during the winter.

NEW TEACHERS APPOINTED.

Three Placed on Staff of City Schools at Meeting of Trustees Last Evening.

The principal business transacted at the special meeting of the school board last evening was the appointment of three teachers to the city staff. Ballots January 32,286 for the teachers resulted in Mrs. February 32,256 19,788 Wheeler, Miss M. A. Grenfell and Miss March 37,423 12,483 Tingley being selected. All three hold a first B certificate. Other applicants were Miss Bald, Miss Johnston and Miss Library 39,985 21,107 ston and Miss Dalby. Miss Tingley received the temporary appointment at a August salary of \$600 per year.
