HATCH UNTERRIFIED

By Adirondack Threats to Take His Life.

Member of Lord and Taylor, New York, Will Fight Forestry Pollution to the Death, and Will Appeal to Governor and the Courts to Enforce the Law.

(N. Y. Paper.) Aroused by threats made by the lawless element in the Adirondacks against the life of the property of Edward Hatch, Jr., of the firm of Lord & Taylor, who preserve life east of the scene of the Dexter tragedy, the wealthy residents and land owners in the Lake Champlain region are determined to aid Mr. Hatch in the fight against the mill owners who have been turning their chemical refuse into the river, which has polluted the waters and shores of the lake and killed the fish.

TO FORCE OBEDIENCE TO LAW. "So far as the mill owners and myself are concerned," said he, "there is no personal enmity that I am aware of. On the contrary, our social relations are very friendly. It is only the rift that the mill region who could possibly look upon me as an enemy. As a matter of fact, my friends and other property holders interested do not want to close up the offending mills and thus throw hundreds out of employment. We simply want the mill owners to be made to observe the law and to stop the pollution of the river and lake. When it comes to a final test we feel sure that rather than close the mills, their owners will spend the necessary money and find other means of disposing of the mill refuse."

Mr. Hatch said he intended to return to the mill region again in a few days, and he declared he had no fear of personal violence. "I'm in this fight to win out," he concluded, "and all the threats and bluffs in the world won't stop me."

It is expected that within a few days the results of the official investigation of the waters of the lake and the Bouquet and Au Sable rivers, recently made by Professor Olin H. Landreth, consulting engineer of the state department of health, will be placed in the hands of Governor Odell. It is expected that the governor, on the basis of the report, will proceed to close the local health officers either to close the mills or adopt some effective method of getting rid of the chemical refuse that now finds its way into the lake. If action is long delayed by Governor Odell it is the declared intention of those actively interested to apply to the supreme court for an injunction to close the mills, and it is believed that this is the only way to secure it.

INVENTS ROZORLESS SHAVE. Dr. Dreyfus, Chemist of Bellevue Hospital, Formulary Tells Every Man May Become His Own Barber.

(New York Herald.) According to Dr. W. E. Dreyfus, chemist of the department of public and Bellevue Hospital, no shave any more if he follows Dr. Dreyfus' instructions, which he has prepared for the hospital formulary, which is one of the most complete in the world. This formula is a basis every year for the pharmaceutical association, and the formula contains 387 ingredients that are to be put into a paste. According to the formula, the razor is to be used in the chin or other parts of the face for about two minutes, it will hair off smoothly, giving a hair to what is known as "a shave."

As president of the Catholic Summer Association, with its fine sweep of property on the shores of the lake near Plattsburg, and valued at about \$200,000, the Rev. Father Lavelle, rector of St. Patrick's Cathedral, has interested himself in the contest. In speaking with a reporter yesterday of the pollution of the lake, Father Lavelle said that he had often noted the presence of impurities in the water, which he had been told had been caused by the refuse of the pulp mills.

Divorce Cases in Which Maritime People Will Figure.

A Nova Scotia Amateur Detective Arrested at New York Charged With Murder—St. John Couple Celebrate 55th Anniversary of Marriage—C. P. R., St. John and Boston—The Markets.

BOSTON, Nov. 6.—Taking advantage of the warm, Indian summer weather, the agricultural department of the city of Boston is busily engaged in ploughing up Boston Common, upon which this year the city has been permitted to graze. Farming has never been so tempting in the city until this year, but as it cost the city \$5,000, it has not been a particularly profitable operation.

October was a busy month in the divorce court here, several provincialists, as usual, figuring on the docket. Two cases of interest among New Brunswick people will be heard in December, one at Cambridge and one in this city. In the superior court for Suffolk county here, Mrs. Martha A. Vaughan has brought a bill for divorce from Ebenezer S. Vaughan, now in parts unknown. The couple were united in marriage at Lower Brighton, a small Carleton county village, above Woodstock, on Dec. 22, 1848. The petitioner claims that she was deserted in November, 1897. She also asks for the custody of Harry R., Ernest B., Ida May and Chester L. Vaughan, her children, and for the support of the children. The case will not be heard before October.

The other New Brunswick case is that of Mrs. Cordelia McLean, who has entered a libel for divorce in the superior court for Middlesex county, at East Cambridge, from Angus L. McLean. The McLeans were married at Moncton on Aug. 28, 1885, and for many years resided in the railroad city. In the middle of April, 1898, Mrs. McLean alleges that her husband, Edward Devau, a mere druggist and a deserter from the army, deserted her, and she was cruelly treated, and charges the libel with other misdeemeanors. McLean, who is now a resident of Boston, has been notified of the suit to put in an appearance before the court at East Cambridge on Dec. 7, and show cause, if any, why the prayer of the petition should not be granted.

He Suffered from Kidney Disease For Two and a Half Years—Only One of the Many Cured by the Great Canadian Kidney Pills.

Mr. Harris made the following statement for publication: "I suffered for two years and a half from kidney troubles, being unable to attend to my work the greater part of the time. I tried many medicines without getting any benefit, but actually grew worse. I took three boxes of Dodd's Kidney Pills and they cured me. I think Dodd's Kidney Pills are a wonderful remedy for kidney trouble."

LETTERS FROM THE PEOPLE.

CANADA SHOULD ACT PROMPTLY TO THE EDITOR OF THE SUN.

Sir,—As one of the first, if not the very first, to call attention to the duty of the Canadian government to secure the Greenland, and so to prevent our eastern coast a repetition of what has taken place on the west, I am greatly pleased to see that you have taken the trouble to publish the Winnipeg Telegram of the 2nd inst. The quotation closes an excellent article on "Lessons to be Learned from the West."

Some changes must be made to guard against similar mistakes in the future. Our external relations, as distinguished from our purely domestic, are already so important that we must have a responsible minister in charge of those concerns, one whose business it is to think ahead and to see that our interests are preserved, one whom we can hold directly responsible. The Commonwealth of Australia has a minister of External Affairs, and we must have it. It would be easy to illustrate from events at the time of the South African war how indefinite and unorganized our system is with respect to the various departments of the government for the future, and in harmony with the general principles of our government we must have a responsible minister in charge of those concerns, one whose business it is to think ahead and to see that our interests are preserved, one whom we can hold directly responsible.

It is not time will be lost in taking the necessary steps to secure the territory in question.

ROBERT WILSON. I. C. R. TRAINS COLLIDE. Belmont the Scene of an Accident—Fireman Dryden's Leg Broken.

MONCTON, N. B., Nov. 6.—Last night's C. P. R. train collision at Belmont, which resulted in the death of a night freight going from Truro to Moncton, causing some delay, but doing little damage. It appears that the train had orders to proceed as usual, but when the P. R. came along the freight was hauling into the siding, and it is supposed that the driver of the C. P. R. mistook the signals being given by the freight train men and thought the line was clear. About five or six feet of the van was still on the main line when struck by the C. P. R. engine.

AN INTERESTING CASE. CHARLOTTETOWN, P. E. I., Nov. 5.—The case of Isaac Lane v. John Wheeler was argued before the supreme court today. This is a suit instituted by the plaintiff to recover from the defendant eight thousand dollars, a penalty alleged to have been incurred by the defendant by occupying a seat in the provincial legislature after becoming disqualified, and thought by acting as counsel in certain crown business before the supreme court and being paid for his services. The defendant denied, claiming that the engagement of a barrister who is also a member does not under the statute disqualify him. The case is exciting curiosity.

REV. FREY'S STATEMENT: Rev. P. J. Frey, Pastor of the Maple St. Baptist Church, Buffalo, N. Y., says he has been greatly troubled with colds, catarrhal powder with best results. In fact he has done wonders for me, and I wish to recommend it to everyone. This remedy is also a perfect specific for influenza. Frey's Ointment is without an equal for skin diseases of pills, etc.

There is no guesswork about the virtues of Dr. Chase's Syrup of Linseed and Turpentine. It has been before the people too long, and withstood too many a battle brunt from aspiring rivals, to be considered an experiment of unknown value.

Coughs, Colds and Croup.

Children especially are fond of Dr. Chase's Syrup of Linseed and Turpentine, because it is sweet and pleasant to the taste, and quickly relieves and cures them when gasping for breath with choked-up air passages, or tearing the linings of the throat and bronchial tubes with a severe and painful cough.

Dr. Chase's Syrup of Linseed and Turpentine aids expectoration, clears the throat and air passages, soothes the bronchial tubes, and cures coughs of every description. But it is far more than a mere cough cure, for its action is far-reaching and it thoroughly removes the cold as well.

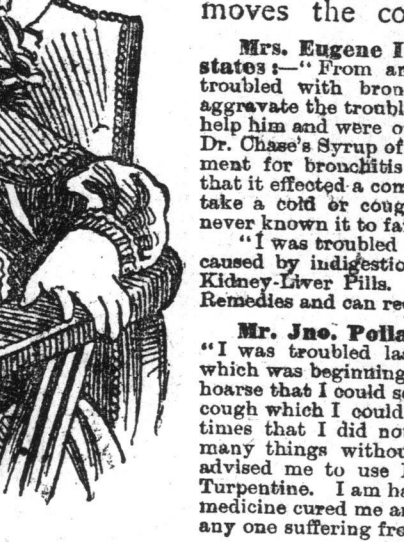

Dr. Chase's Syrup of Linseed and Turpentine. Sold by all dealers at the advertised price of 25 cents a bottle, family size, three times as much, 60 cents. Edmandson, Bates & Co., Toronto.

CANCER PARASITE HAS BEEN ISOLATED. Treatment Goes a Long Way Towards Curing Disease—German Savant's Discovery.

LONDON, Nov. 5.—In a lecture before the Abnormal Society of London, Dr. Jesse Johnson gave the details of a cancer treatment discovered by Dr. Otto Schmidt of Cologne, which Dr. Johnson has been investigating, and proposes to try in England. Dr. Schmidt believes he has isolated the parasite, on the presence of which in a sufferer he believes cancer to depend. Regarding the numerous parasites found by Dr. Gaylor, an American investigator, and others, Dr. Schmidt is convinced that they are identical, varying only in shape and appearance under different conditions, and he claims that he has produced these variations in his parasite by subjecting it to such conditions.

den has been resting at his home in Canning during the past two weeks. Mr. Campbell of the Dufferin hotel was in Canning a few days last week. The death of Archibald Canning recently occurred at his home in Arlington at the age of seventy-three years.

WHICH IS WHICH? (Worcester Spy.) If the sun spots cause electrical disturbances of such great magnitude as those observed recently in Europe and the United States there will be new developments in the electrical world. If the electrical storms are caused by sun spots and sun spots are caused by electrical storms, we should like to know what causes the electrical storms.

HERE'S A PUZZLE FOR YOU. Nearly a hundred years ago this problem was propounded by one of the puzzle-makers of that day: When first the marriage knot was tied Between my wife and me, My days did burn as fast as wax As 3 times 3 does 9. My wife when 7 years and twice 7 years My man and wife had been, Her age came then as near to mine As 8 is to 16.

THE CANADIAN BANK OF COMMERCE

The Halifax Banking Company.

Paid Up Capital, \$6,700,000. Rest, 3,000,000.

HEAD OFFICE, TORONTO. EON. GEO. A. COX, President. R. B. WALKER, General Manager.

LONDON (ENGLAND) OFFICE, 60 LOMBARD STREET, E. O. S. CAMERON ALEXANDER, Manager.

NEW YORK AGENCY, 16 EXCHANGE PLACE, WM. GRAY & H. B. WALKER, Agents.
