

NEWS AND COMMENT FROM THE FINANCIAL WORLD

MARKET RISE
EARLY, THEN
RECEDED

Short Interest in Precarious
Position — More Rumors
of Peace — Russian Rubles
Weak

New York, April 26.—Additional advances in stocks today, only a small part of which were finally retained, again received their impulse from the precarious position of the short interest, that faction making further strenuous efforts to cover contracts. This was most noticeable in the first half of the session, when leading issues were rushed up one to three points over yesterday's highest levels.

At today's best prices many of the more prominent stocks registered maximum quotations this far this year, and United States Steel, which added 1 1/4 points to yesterday's substantial gain at 117 3/4, was within a point of its record for that period, receding almost two points from its peak of 119 1/2.

Other industries, the list embracing all the better known equipments and munitions, as well as a score of specialties, relinquished most of their advantage in the last hour, some showing moderate net losses. Almost the only exceptions were the shipping and railroads, these rising steadily in the face of heaviness elsewhere.

The market closed with an irregular tone, total sales amounted to slightly over a million shares, the largest in several weeks.

Peace rumors were brought into play in the later dealings, but these received little credence in high quarters. Factors which militated against an immediate further advance of prices were found in the small accession of outside inquiry and the well known attitude of banking interests, who have reiterated their opposition to any sustained market movement at this time.

Announcement that the leading steel manufacturers had placed orders for the government at prices far below those obtainable by private consumers served to revive interest in the broad question of supplies to foreign governments with which the well known now acting. Some reflection of the more adverse features of the international situation was again seen in the weakness of rubles, although all other foreign currencies were firm to steady. Local money rates were easier, call loans holding between 2 and 2 1/2 per cent, as against yesterday's maximum of four per cent.

Bonds were irregular on broader trading. Total sales, par value, aggregated \$4,550,000.

POTATOES—Per bag, car lots, \$3.75 to \$4.00.

MONTREAL MARKET
IN NERVOUS STATE

It Was Strong Yesterday Until Just Before Close When Prices Receded

Montreal, April 26.—The markets opened steady and were strong most of the day until the close. After the advance yesterday, the markets did very well to keep their advance.

The Canadian market is still nervous and governed by the fluctuations in Wall Street. The room traders sell our market every time they see any weakness in Wall Street. Evidently a lot of the last Dominion Loan was purchased by people on margin and the tightness in the money market seems to have forced them to sell, and it is at about a point below the issue price now.

It will take some time for this new taxation to be forgotten by the local market. We doubt very much whether the government will get any more in 1917 on their increased taxation than they did in 1916, as there is nothing like the profit in the munition business today. The tremendous fluctuations in the wheat market are also restricting trading in stocks.

TIME NOT RIPE FOR
BIG BULL MARKET

Situation Created by Entry
of U. S. Into War Does
Not Warrant Wild Speculation

Special to The Standard.

New York, April 26.—Substantial interest is not opposed to better markets than those of the last few weeks. They believe that stability in prices will encourage sentiment most favorably and prove of assistance to the government war financing, but on the other hand they maintain that the very nature of the new situation created by the entrance of this country into the European war does not warrant any wild outburst of bullish speculation in the securities market.

The public does not appear to be in the mood to make large bullish commitments with so many uncertainties involved in war financing. Great strength in underlying conditions as shown in the extraordinary position of the U. S. Steel Corporation begs confidence in financial and business circles, but it should not be taken as an endorsement of the theory put out in some quarters that irrespective of war and its problems the time is now ripe for a bull market greater than any ever before recorded in the stock exchange.

UNCERTAINTY IN IRON
AND STEEL MARKET

Political Developments in
United States Principal
Factor in Situation

Toronto, April 26.—In its summary of the iron, steel, metal and machinery markets for the week ending April 24, Canadian Machinery and Manufacturing News, makes the following observations:

"Political developments in the United States continue to affect the situation in Canada, principally with regard to prices of iron, steel and metals. Uncertainty as to what the American government may do in the way of regulating prices is the cause of the unsettled outlook, meantime prices of steel products continue to advance, due entirely to the question of supply. Brackets of iron and steel bars and small shapes have advanced, iron bars are now 4 1/2c, steel bars 5c, and shapes 5 1/2c. Higher prices on a number of other steel products are looked for in the near future, since with our own production has increased our general stock of the precious metal in the country by more than \$1,198,000,000 of which \$884,481,018 was in circulation on April 1st.
