

# NATURAL HISTORY EXCHANGE.

A. J. PINEO, - - PROPRIETOR,  
*Kentville, N. S.*

I have for years been engaged in collecting Nova Scotian MINERALS, and have also secured a large stock from other countries, so that my collection now amounts to several tons weight. These I can dispose of at prices below competition. Minerals end in an order for one of the following collections, or send for catalogue of minerals in stock.

## SCHOOL COLLECTION.

The following collection of minerals and rocks has been put up especially for the use of schools. It is a good typical collection, just the thing for teachers, students, and in fact anyone who wishes to begin the study of mineralogy.

No better collection has ever been put up for the price.

Coal (bituminous), Coal (anthracite), Graphite, Quartz (milky), Quartz, (rose); Flint, Jasper, Amethyst, Float Stone, Hornblende, Hornblende, (var.), Actinolite, Beryl, Plumose Mica, Albite, Tourmaline, Staurolite, Stilbite, Heulandite, Natrolite, Serpentine, Steatite, Hematite, Limonite, Magnetite, Iron Pyrites, Siderite, Copper ore, Pyrolusite, Fluorite, Gypsum, Fibrous Gypsum, Selenite, Anhydrite, Apatite, Calcite, Chalk, Marble (white), Marble (black); Limestone (with fossils), Dolomite, Quartzite, Sandstone [new red], Sandstone [millstone grit], Conglomerate [pudding stone], Conglomerate, [shell], Granite, Diorite [trap], Amygdaloid, Slate, Coal Plant [fossil], Rain Prints, [carboniferous]; Worm Trails, [carboniferous].

Price, securely packed and boxed only \$2.50.

By clubbing orders the freight expenses can be reduced to a trifling amount.

## BOY'S COLLECTION.

**20 Minerals, Postpaid, for only 50 cents.**

These are not mere fragments but fine showy specimens. The average size is about 1-1-2x2 inches. We expect to sell thousands of this collection and have therefore put the price very low. We cannot give it in exchange for other specimens.

Quartz (rose), Flint (Eng.), Jasper, Amethyst, Hornblende, Actinolite, Albite, Tourmaline, Zeolite (Stilbite), Hematite, Limonite, Siderite, Gypsum, Selenite, Calcite, Chalk (Eng.), Dolomite, Graphite, Serpentine,

## BLOMIDON COLLECTION.

We often have requests for specimens from Cape Blomidon. For those who wish to associate with a fine collection of beautiful crystallized minerals, the historic and poetic interests of this locality, we have put up the following set. Price, postpaid, \$1.00. We can send larger specimens for \$2.00 and upwards.

Amethyst, Acadianite, Apophyllite, Analcite, Fibrous Gypsum, Heulandite, Natrolite, Selenite, Stilbite (white), Stilbite, (brown or yellow.)

A large lot of shells and fossils to be catalogued soon.
