THAT GRANVILLE GHOST

Probably very few of the patients, personnel or staff of the Granville had ever heard of the Psychical Research Society until a few days ago. Yet next week the report of the society will be the most sought for book in the whole hospital. In the forthcoming number will be published a full account of the notorious Granville Ghost, its nocturnal wanderings, etc. This special article, written by a leading Granville Corporal, is so peculiar, and so obviously a plain record of facts that it is likely to cause quite a sensation in the scientific world generally.
