

Courses in Domestic Science at the same time and place as courses in Agriculture are being given to the men and boys. Full particulars regarding the same will be sent to the Women's Institute at or near the place chosen for the holding of the Short Course in Agriculture. These joint courses proved of great value and interest last winter and have been followed at many centres by aggressive work along patriotic and community improvement lines, and we strongly urge the Institutes so fortunate as to be located in or near a centre chosen for a Short Course in Agriculture to form classes in Domestic Science. Most of these courses will continue for only two weeks, but if the Institutes so desire, arrangements will be made for an extension of the time for another week, especially if a large number of girls promise to take advantage of the same.

Instruction in any of the courses announced herein will be given as soon as classes can be formed, and satisfactory arrangements made. We would advise the Institutes desiring to take instruction to make application at once, and if it is thought well an instructor will be sent two or three weeks in advance to assist in organizing the class and to complete arrangements.

If you wish one of the courses outlined for your centre, ask your secretary to make application.

GEO. A. PUTNAM,
Superintendent.

Toronto, August 25th, 1917.
