

G.G.G. Galvanized Woven Fencing and Gates

We give you below the prices on a few of the leading styles of our G.G.G. Woven Wire Fencing. All fencing F.O.B. Winnipeg. We invite comparison of our prices and quality with those of any other fence on the market.

HEAVY FENCE

This is manufactured from full gauge, No. 9 extra heavily galvanized Hard Steel Wire. 4-34-8. Heavy Horse and Cattle Fence, 4 line wires, spaced 11-11-12 in. apart, 34 in. high, stage 22 in. apart. A very Popular Fence. This Fence is fitted with the Famous Wrapped Lock instead of the ordinary lock as used on most fences. We know positively that you cannot equal the value we are giving in the same style and size of fence.

5-40-9. We find this to be the most Popular Fence we have. It is made from all No. 9 wire, has 5 line wires, spaced 10 in. apart, is 40 in. high, stage 22 in. apart.

6-40-9. This is practically the same fence as style 5-40-9, except that it has one more line wire. The line wires are spaced 8 in. apart.

7-40-9. This is made from all No. 9 Wire, has 7 line wires, spaced 5-6-6-7-8-8 inches apart, stage 22 inches apart.

8-47-12. This is one of the very best of General Stock Fences, made from all No. 9 Wire, has 8 line wires, spaced 6-6-6-7-7-8 inches apart, stage 16 inches apart. This fence is also fitted with the Wrapped Lock, making it one of the very best values we are offering.

9-48-9. General Stock Fence. Has 9 line wires, spaced 3-4-5-6-7-7-8-8 inches apart, 48 inches high, stage 22 inches apart.

10-50-12. This is one of the very best Stock Fences. Has 10 line wires, spaced 3-4-5-6-6-7-7-8 inches apart, 50 inches high, stage 16 inches apart. This Fence is also fitted with the Wrapped Lock. Price, per rod 211c

11-50-12. A very popular Hay Fence, made of all No. 9 wire, has 11 line wires, spaced 3-4-5-6-6-7-7-8 inches apart, 50 inches high, stage 16 inches apart. Fitted with Wrapped Lock. Price, per rod 26c

12-50-12. Extra Heavy Hay Fence. Made from all No. 9 Wire, has 12 line wires, spaced 3-3-3-4-5-6-6-6 inches apart, 50 inches high, stage 16 inches apart. Price, per rod 311c

13-50-12. Extra Heavy Hay Fence. Made from all No. 9 Wire, has 13 line wires, spaced 3-3-3-4-5-6-6-6 inches apart, 50 inches high, stage 16 inches apart. Price, per rod 351c

14-50-12. Extra Heavy Hay Fence. Made from all No. 9 Wire, has 14 line wires, spaced 3-3-3-4-5-6-6-6 inches apart, 50 inches high, stage 16 inches apart. Price, per rod 441c

15-50-12. Extra Heavy Hay Fence. Made from all No. 9 Wire, has 15 line wires, spaced 3-3-3-4-5-6-6-6 inches apart, 50 inches high, stage 16 inches apart. Price, per rod 481c

16-50-12. Extra Heavy Hay Fence. Made from all No. 9 Wire, has 16 line wires, spaced 3-3-3-4-5-6-6-6 inches apart, 50 inches high, stage 16 inches apart. Price, per rod 54c

17-50-12. Extra Heavy Hay Fence. Made from all No. 9 Wire, has 17 line wires, spaced 3-3-3-4-5-6-6-6 inches apart, 50 inches high, stage 16 inches apart. Price, per rod 40c

18-50-12. Extra Heavy Hay Fence. Made from all No. 9 Wire, has 18 line wires, spaced 3-3-3-4-5-6-6-6 inches apart, 50 inches high, stage 16 inches apart. Price, per rod 461c

G.G.G. WRAPPED LOCK

This lock is considered to be the best one on the market. Absolutely prevents slipping.

This lock is used on styles 4-34-8; 5-47-12; 10-50-12; and 7-30-16.

OUR GUARANTEE

The G.G.G. Fence is all made from full gauge extra heavily galvanized hard steel wire, and carries with it an unconditional guarantee of quality. If the Fence is not what we claim for it, or if for any reason you are not satisfied with it, return it to your dealer and every cent you have paid for wire or freight will be promptly refunded. What could be fairer?

MEDIUM FENCING

If you do not wish to invest in as expensive a Fence as any of those quoted above, we would recommend one of the following styles of our Medium Fencing, which has No. 9 top and bottom wires, and No. 12 filling.

10-30-15. Medium General Stock or Sheep Fence, has 10 line wires spaced 3-4-4-5-6-6-7-7-8 inches apart, is 30 inches high, stage 15 inches apart.

11-30-15. Medium Sheep Fence. Has 11 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

12-30-15. Medium Hay Fence. Has 12 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

13-30-15. Medium Hay Fence. Has 13 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

14-30-15. Medium Hay Fence. Has 14 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

15-30-15. Medium Hay Fence. Has 15 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

16-30-15. Medium Hay Fence. Has 16 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

17-30-15. Medium Hay Fence. Has 17 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

18-30-15. Medium Hay Fence. Has 18 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

19-30-15. Medium Hay Fence. Has 19 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

20-30-15. Medium Hay Fence. Has 20 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

21-30-15. Medium Hay Fence. Has 21 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

22-30-15. Medium Hay Fence. Has 22 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

23-30-15. Medium Hay Fence. Has 23 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

24-30-15. Medium Hay Fence. Has 24 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

25-30-15. Medium Hay Fence. Has 25 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

26-30-15. Medium Hay Fence. Has 26 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

27-30-15. Medium Hay Fence. Has 27 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

28-30-15. Medium Hay Fence. Has 28 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

29-30-15. Medium Hay Fence. Has 29 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

30-30-15. Medium Hay Fence. Has 30 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

31-30-15. Medium Hay Fence. Has 31 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

32-30-15. Medium Hay Fence. Has 32 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

33-30-15. Medium Hay Fence. Has 33 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

34-30-15. Medium Hay Fence. Has 34 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

35-30-15. Medium Hay Fence. Has 35 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

36-30-15. Medium Hay Fence. Has 36 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

37-30-15. Medium Hay Fence. Has 37 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

38-30-15. Medium Hay Fence. Has 38 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

39-30-15. Medium Hay Fence. Has 39 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

40-30-15. Medium Hay Fence. Has 40 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

41-30-15. Medium Hay Fence. Has 41 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

42-30-15. Medium Hay Fence. Has 42 line wires, spaced 3-4-4-5-6-6-6 inches apart, is 30 inches high, stage 15 inches apart.

The Mail Bag

AN OPEN FORUM

This page is maintained to allow free discussion of all questions vital to western farmers. Up to the limit of space letters will be published giving both sides of all such questions. It is not possible to publish all letters received, but an effort will be made to select those most fairly representing different views. Short letters will be given preference. All letters must be accompanied by name and address of writer, the not necessarily for publication. Unused letters will be returned if accompanied by postage.

U.F.A. HOME DEFENCE

Editor, Guide:—The U.F.A. home defence is a purely voluntary force, and is being organized for three or four reasons. The first, perhaps, is that so many thousands of men have been taken from the west for overseas service, and many thousands may yet be taken and needed. Thus it is the desire of those working in this cause, who for many reasons cannot go to the front, to in this way help the Dominion and the Empire, by taking training and preparing themselves for service at home, thus relieving as many as possible of the regular force.

The second reason is that a large number of homes are left with mother and little ones, while the father has gone overseas, to perhaps make the supreme sacrifice for the empire, and the U.F.A. feel it their duty to be prepared to protect the homes and families of the brave brothers who are fighting for freedom and homes.

The third reason is that many young men who have been turned down as medically unfit for service at the front, if trained, would be of great service at home should they be required for home defence, and it gives them the opportunity of doing all they can for the empire.

Another reason is that there are thousands of good farmers who feel the call of the mother land for help; and yet they have duties to perform other than that of fighting. The nation must be fed, and it is their duty to produce the food. Yet many find it hard to resist the call to fight.

There are cases where the father on the farm is aged, and cannot even sow the fields this spring, and has only one boy left to help him and that boy is hard to hold, for often he feels he is being marked as a slacker; yet he is doing his duty in as true a way as is his brother at the front. Yet by giving this boy a chance to drill in the U.F.A. home defence, he feels he will be ready should he be needed, and to that extent he is doing his bit. There are thousands, too, of the farmers who have no boys to give. They are perhaps in many cases above age for active service, yet they are well preserved men, can ride well and shoot straight. All they need is a little training and they will make a formidable home defence. Have you ever thought what it would mean to this province should we have internal troubles, or an attack be made from across the line, if our farmers are trained to the number of 10,000 or 12,000 mounted men, who could take the field any day at an hour or two notice? Do you realize what it means to have a force of this kind at hand provided at next to no expense to the government and yet ready to protect our public buildings, our cities, towns and small settlements, our great storage elevators and railways; the bridges, the telephone and telegraph lines; and, remember, none can do this work as well as the small detachments of farmers if organized at all local points, for they cover the whole province and could safeguard all points, being a mounted force they can at short notice, from a given point, rally a good force for the protection of, say, a small town or an elevator or station. Suppose an attack was expected on Edmonton or Red Deer, or any other town, in less than two hours the farmers from ten miles around could be on their horses and in the town or city to render assistance.

I have sent you this letter, Mr. Editor, because some have questioned the wisdom of this movement, thinking it would prevent men enlisting in the regular forces, but rather than doing that I think it will, later, give many men a chance who otherwise could not have been reached should they be needed. I am glad to say that all points yet visited have responded far beyond our expectations, at most points from twenty to fifty men are signed up, so that if the 600 local unions of the U.F.A. sign up an average of twenty, we shall have a force of 12,000 mounted men for Alberta, and I quite expect to see Manitoba and Saskatchewan take up the proposition,

and if so perhaps a force of 30,000 men will be in training in the west, and at the same time doing their duty on the farms, in providing produce for the men at the front and the nation.

The force in Alberta will be called U.F.A., M.I.C., L.O.F., the letters standing for "United Farmers Alberta, Mounted Infantry Command, Legion of Frontiersmen." The Legion of Frontiersmen have been good enough to offer to help us in the training, and the U.F.A. hope that all our force will become Frontiersmen. The U.F.A. will not become a military institution. It is an educational association and by turning our force over to the Frontiersmen, we shall not conflict with the educational work of the U.F.A., but the U.F.A. feels that it can help the empire in this way.

None of our men will receive any pay, but as the expense of organizing and sending officers to many parts to train the men will be great, it is hoped that large institutions, such as banks, packing plants, wholesale houses, railway companies, our provincial government and such like will make donations to help us with this expense, and I suggest that all who wish to help send the donation to our provincial secretary, P. P. Woodbridge, Loughheed Building, Calgary. He will account and give receipt for all such donations, and a committee of the United Farmers and Frontiersmen will pay all accounts and safeguard the fund.

Farmers who for any reason cannot join the active members of the force can help by sending a small donation to help pay the expenses and in that way do a bit. When sending a donation, state that it is for the U.F.A. home defence fund. I hope, Mr. Editor, this explanation of our movement will satisfy all that it is a worthy and good cause, that will help the Dominion and Empire. God Save the King.

RICE SHEPPARD,
Provincial Organizer,
Edmonton South.

THE ALBERTA ELEVATOR CO.

Editor, Guide:—Being a member of the U.F.A. at Acme, and also a stockholder in the Co-operative Elevator Co., I would like to have this letter published in The Guide. I wish to ask a question thru The Guide to the delegates of the Alberta Farmers' Co-operative Elevator Company at their last convention held in Calgary. I have been reading the proceedings on page 13, by-law No. 7, sections C and D. In section D there should be a limit put on the directors to give them power to borrow up to a stated sum. Anything needed over that stated sum should be referred back for a referendum vote to all stockholders. I have all confidence in the present board and wish to keep it, also think they should have confidence in stockholders by referring back to said stockholders any question. When it comes to pledging all property of the elevator company as security on money borrowed, we can't say what may happen. If we take precaution now to limit the borrowing power of the board we will always be safeguarded. I do not think a referendum vote would take much time, and the interest of all stockholders would be safeguarded. We know from past experience how co-operative organizations have been ruined by investing too much power in a few men's hands. Let us have a referendum vote on all important questions.

Acme, Alta. L.O.R.

THE MAIL ORDER TAX

Editor, Guide:—I would like to say a few words regarding taxing mail order houses, and while it concerns Manitoba chiefly, other provinces will soon follow the lead if the law is enacted. The mail order houses solicit custom thru their catalogs, while the wholesale houses solicit custom by their travellers who, at the end of each day, forward the orders received by mail to the head office. Now, I should call that
