New McLaughlin Light Six K-6-63

Is a continuation of
and improvement on the H-6-63

This new model embodies all the splendid features which have made the McLaughlin Light Six the outstanding car for power and economy in gasoline consumption. But it includes many new points which make the K-6-63 more efficient from a mechanical standpoint.

Among the outstanding changes are an increased wheelbase 2-115 inches; a stronger frame with box type centre cross member and a much wider rear cross member; new special expensive design cushion and back construction, making the upholstery of the most comfortable and luxurious type; improved fenders, heavier wheel spokes; improved design tire carrier equipment and a specially designed top.

Longer New Springs—Width of plates increased: front from 1 1/2 to 2"; rear from 1 1/2 to 2 1/4". Fitted with special phosphor bronze bushings, eliminating squeaks and improving the riding qualities.

The new K-6-63 McLaughlin Light Six touring car is a genuine McLaughlin model and upholds the established McLaughlin reputation for quality.

This model is finished in green with black fenders and chassis. The upholstery is of genuine black pleated hand-buffed leather. Instrument board is of walnut; the top is made of mohair top material.
