

SEASONABLE SOUPS.

Tested Recipes For Cheap and Easily Made Soups.

Brown Broth.—Put two tablespoonfuls of butter in a frying pan, add two tablespoonfuls of chopped onions and two of chopped carrots and cook until a golden brown. Put these in a kettle with a quart of boiling water and a bay leaf and simmer fifteen minutes. Press through a sieve. While the soup is simmering put about a tablespoonful of sugar into an iron saucepan and when it browns and burns add two tablespoonfuls of chopped onions, then two or three tablespoonfuls of water. Add this to the soup, with a teaspoonful of salt and a saltspoonful of pepper. Strain the soup, return it and let settle. Add half a pint of blocks of bread that have been stirred up with beaten eggs, bring to a boil and serve with grated cheese.

Tomato Bouillon.—Use one can of tomatoes, add a pint of water, a slice of onion, a bay leaf, a little celery seed and boil rapidly for ten minutes. Press through a colander as much of the flesh as possible. Add the well beaten whites of two eggs, bring quickly to the boiling point, boil five minutes and strain through cheesecloth. The fleshy portion of the tomato that remains in the cheesecloth may be put aside for flavoring sauces. Reheat the bouillon, add a cup of whipped cream and serve at once with strips of toasted bread.

East Indian Soup.—Put into a kettle a tablespoonful of butter, two tablespoonfuls of fine chopped onions, two tablespoonfuls of grated carrots and the same of grated turnips. Stir carefully for about two minutes, add a quart of water or stock, a dash of red pepper, a little black pepper, a tablespoonful of chopped parsley, a sliced apple and simmer gently for fifteen minutes. Add a teaspoonful of curry and four or five tablespoonfuls of boiled rice, which should be boiled while you are making the soup.

Quick Turkish Soup.—Stir a teaspoonful of beef extract into one quart of boiling water; add a tablespoonful of grated onion and a saltspoonful of celery seed. When this reaches the boiling point, pour it slowly over the well beaten yolks of two eggs. Have ready drained four tablespoonfuls of boiled rice; add and serve at once.

Cream of Potato Soup.—Pare four small potatoes, cover with boiling water and boil rapidly for five minutes. Throw the water away and cover with a pint and a half of boiling water. Add a slice of onion, a bay leaf and a few celery tops chopped fine. The green leaves of the celery will answer the purpose. Cover and boil fifteen minutes or until the potatoes are soft. While these are boiling put a pint of milk in the double boiler, add a tablespoonful of butter and one of flour rubbed together; press the potatoes through a fine sieve, using the water in which they were boiled; add this mixture to the hot milk in the double boiler. Stir until thoroughly heated and serve.

Stands For Spools of Cotton.

Women who do a great deal of sewing will find a little stand to hold spools of cotton a great convenience. The only materials required are a solid piece of wood perhaps an inch thick and either round or square for the base and either a knitting needle or a round piece of wood some six inches long for the upright piece. If the needle is used it can be forced into the wood of the base, but in case the slender round piece of wood is preferred it can be kept in place with a screw or long tack. This holder has place for three or four spools of cotton, which revolve freely when you take hold of an end of the thread and begin to draw it off. The point of the holder makes a convenient resting place for a thimble. Of course if you are of a decorative turn of mind you will sandpaper your wooden base and then paint or stain it.

How to Walk Upstairs.

A physician, describing how a person should walk upstairs, says: "Usually a person treads on the ball of his foot in taking each step. This is very tiresome and wearing to the muscles, as it throws the entire suspended weight of the body on the muscles of the legs and feet. You should in walking or climbing upstairs seek for the most equal distribution of the body's weight possible. In walking upstairs your feet should be placed squarely down on the step, heel and all, and then the work should be performed slowly and deliberately. In this way there is no strain upon any particular muscle, but each one is doing its duty in a natural manner." The doctor might have gone a little further in the same line and protested against the habit which many persons have of bending half double when they ascend a flight of stairs.

How to Keep Furs.

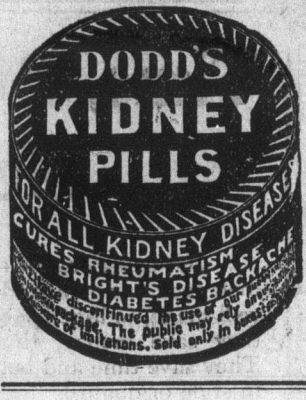

If garments are not cleaned before they are laid away and there are moth eggs in them, neither camphor nor any other preventive will keep them from developing and eventually destroying the fur.

If furs are well brushed and freed from dust, they need not be packed away in any of the much used moth preventives.

In packing furs away for the summer they should first be well aired, cleaned and sunned or moth eggs that are not visible now may develop during the hot weather.

The whipping of the furs should continue until no dust arises. Then the pieces should be put out in the sunshine for a day or two and then beaten again.

If the lining is soiled or worn, remove it before putting the garment away.

Year In Central.
Toronto, April 4.—Joseph Gurofsky, manager of the Chestnut street branch of the Bank of Toronto, charged with feloniously wounding Dominico Trevanni in a fracas in the "ward" on Thanksgiving Day last, was sentenced to one year's imprisonment by Judge Winchester.

The verdict was a great shock to the relatives and friends of the prisoner in the court.

Five Died In Flames.
Passaic, N. J., April 4.—A mother and four of her children perished in a tenement house fire here yesterday. The victims were Mrs. Philomena Settop, 26 years old; Mary, aged 7; Libriabe, aged 5; Antonia, 3; and Joseph, aged 7 months.

GOOD REASONS FOR ITS SUCCESS

The majority of catarrh remedies are useless. But one that does cure is Catarrhzone. It clears the head of all mucous discharge. Putrid matter in the nostrils, phlegm in the throat, and disease germs are completely swept away. The cause of the disease is destroyed, its results are destroyed, and the system is so thoroughly cleansed of catarrhal poison that cure is permanent. All types of catarrh, throat and bronchial trouble, colds and coughs are more certainly cured by Catarrhzone than anything else. Two sizes, 25c. and \$1, at all dealers.

Stricken With Paralysis.

Montreal, April 4.—Dr. William Henry Drummond, one of Canada's best known literary men, author of the "Habitant" and other volumes of verse, was stricken Tuesday with paralysis at Cobalt, where he had gone in charge of work on the Drummond mine, owned by his brother and himself. The best medical aid obtainable has been hurried to Cobalt from this city. The condition of the stricken man is said to be serious.

STOP LIMPING, CURE THE CORN.

Quickly done by Putnam's Painless Extract. In a few days, causes no pain, removes every trace of soreness. Fifty years of success proves Putnam's is the best. Refuse substitutes.

Physician Shoots Himself.

Berlin, April 4.—Made melancholy and morbid by serious differences with his fellow physicians, Dr. Huetzler, head of the Gisela Children's Hospital at Munich, committed suicide Tuesday there by shooting himself with a revolver. News of the physician's death was a shock to the other heads of the institution, and as a result of the tragedy the Princess Glucka has resigned as protectress. Dr. Huetzler was a native of New York. His mother, Sarah, who died some years ago, was well known in German circles as an authoress. She was twice married, her second husband being Josef Kainz, the actor.

OPEN PUBLICITY THE BEST GUARANTY OF MERIT.

When the matter of a medicine, sold through druggists for family use, takes his patients fully into his confidence by frankly and fearlessly publishing broadcast as well as on its bottle wrappers, a full list of all its ingredients in plain English, this action on his part is the best possible evidence that he is not afraid to have the search light of investigation turned full on its formula and that it will bear the most thorough investigation. Dr. Pierce's Favorite Prescription for the cure of weaknesses, periodical pains and functional derangements of the organs distinctly feminine, is a medicine put up for sale through druggists for woman's special use, the maker of which takes his patients into his full confidence by open and honest publicity.

A glance at the published ingredients on each bottle wrapper, will show that it is made wholly from native American medicinal roots, that it contains no poisonous or habit-forming drugs, no narcotics and no alcohol—pure, triple-refined glycerine, of proper strength, being used instead of the commonly employed alcohol, both for extracting and preserving the active medicinal properties found in the roots of the American forest plants employed. If interested, send name and address to Dr. R. V. Pierce, Buffalo, N. Y., for his little book of extracts from the works of eminent medical writers and teachers, endorsing the several ingredients and telling just what Dr. Pierce's medicines are made of. It's free for the asking.

There is nothing humbler than ambition when it is about to climb.

A tissue builder, reconstructor, builds up waste force, makes strong nerves and muscles. Some people do not realize what a great remedy Hollister's Rocky Mountain Tea is. 35 cents, Tea or Tablets.

A. J. McCall & Co.

It is much pleasanter to skip a board bill than to walk the plank.

Calamity is virtue's opportunity.

FINE TYPE OF SEA DOG

GREAT NAVAL HERO MADE COMMANDER AT THE NORE.

Sir Gerard Noel Has Had a Distinguished Career—Son of a Country Parson—Averted Death of British Soldiers on the Turks—Averted Further Serious Disaster When Victoria Was Run Down.

Admiral Sir Gerard Henry Uvedale Noel is the new commander in chief at the Nore, the naval station nearest the metropolis. In times past it has been the scene of many attempts to strike a blow at the capital, and the appointment of such a fine type of the old sea dog to such a responsible post is an exceedingly popular one.

Admiral Noel is 62 years old. Like Nelson, he is the son of a country parson, and was born in Nelson's own country, Norfolk. He had no "pull" to help him along in the navy. He has made his way by merit.

While in command of the British squadron in Cretan waters in 1898 he particularly distinguished himself. News reached him of a Moslem rising in Megafa-Kastrom, where, as a result of Turkish treachery, 100 British soldiers and 1,000 Christians lost their lives. Sir Gerard Noel acted with characteristic promptitude. Surrounding the Turkish barracks by a forced night march he present an ultimatum to

ADMIRAL SIR G. H. U. NOEL, K.C.B.

Edhem Pasha, the Turkish leader. His terms were instant surrender or immediate attack. Edhem Pasha sent a messenger suggesting that they should talk things over. The answer he took back was that the British guns would begin to speak in five minutes if the Turkish flag did not come down. Before the five minutes were up the Ottoman soldiers were stacking their surrendered arms.

Seventeen of the ringleaders were hanged in the market place of Candia to teach the Turks proper respect for the power of the "Widder of Windsor." For this exploit Sir Gerard received a knighthood.

Had it not been for the admiral's promptitude in the presence of danger on another occasion a sad page in the history of the British navy, which is set aside for the mournful story of the Victoria and the Camperdown disaster, would have been sadder still. When the order was given which made a collision between the two ships inevitable he was commanding the Nile, which was following close in the wake of the Victoria, and Capt. Braekenburg was in charge of the Edinburgh. Had they carried out the order signaled the Edinburgh and the Nile would have shared the fate of the Camperdown and the Victoria, but at the critical moment Sir Gerard altered the course of his ship, and Capt. Braekenburg followed his lead. Like Nelson before them, both disobeyed an order to avert a second disaster.

Heirlooms Stolen.

Following the robbery of valuable old masters from Park lane, and a few days later from an art gallery at Fetheli, comes news that a similar theft of heirloom pictures has taken place at Lydiat Hall, near Ormskirk, a mansion belonging to Charles Weld-Blundell.

In addition to the paintings, the thieves took away some beautiful carved paneling work, which formed part of the ornamentation of the principal rooms. The house has been unoccupied for some time, and is unfurnished, but the pictures, being family heirlooms, had to be left in the house under a clause in the will of a previous Squire of Ince Blundell. Lydiat Hall stands in a secluded part of the country, and the thieves seem to have gone about their work with great deliberation.

Entrance was obtained by a window. The stolen pictures were cut out of the frames with a sharp knife. The police have the matter in hand. Mr. Weld-Blundell is a member of an old Lancashire family. He has spent large sums in acquiring works of art, and his seat, Ince Blundell Hall, which is not far from Lydiat Hall, has a European reputation for its art treasures, which comprise by far the largest private collection of antique marbles in the country. Mr. Blundell spends a great part of the year at Lulworth Castle, in Dorset, where he entertained the King some years ago.

Misused Words.

"One of the most misused of quoted words is the 'other-worldliness,'" wittily invented by George Eliot," says an English critic. "In Mrs. Craigie's posthumous book we find the customary mistake. For she takes it to mean a real spirituality, the 'conversion in heaven' of those who realize that they have here no continuing city. She writes of the everlasting clash of worldliness and other-worldliness. George Eliot meant something far different; she made the word to fit a prosaic eighteenth century religious temper, a provident self-interest carried forward into the affairs of a world to come—a spiritual attitude unknown to authentic saints."

WEAK HEART SYSTEM WAS RUN DOWN

When the heart is healthy and performing its functions naturally, it should beat regularly seventy-two times a minute without causing its owner the slightest inconvenience or distress.

When it begins to beat irregularly or intermittently, palpitate and throb, skip beats, beat fast for a time, then so slow as to seem almost to stop, it causes great anxiety and alarm.

The least excitement or exertion seems to affect it.

Many people are kept in a state of morbid fear of death, become weak, worn and miserable, and are unable to attend to either social or business duties, through unnatural action of their heart.

To all such sufferers **MILBURN'S HEART AND NERVE PILLS** can give prompt and permanent relief.

Mrs. E. Fletcher, Sanit St. Marie, West, Ont., says: "I have been troubled for four or five years with weakness, and run down system. My feet were always cold and I felt almost dead. My heart was weak and I was so nervous I could hardly walk across the street. I started taking Milburn's Heart and Nerve Pills, and after using three boxes I felt much better. I continued their use until I had taken twelve boxes and, I am now well."

Price 50 cents per box or 3 boxes for \$1.25 at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The One and the Naught.

Oliver Wendell Holmes once sent two Episcopals to the "poetoffice" of an Episcopal fair at Pittsfield, Mass. In one of them the first stanza was:

Fair lady, whosoever thou art
Turn this poor leaf with tenderest care
And hush, oh hush, thy beating heart.
The one thou lovest will be there.

On turning the "poor leaf" there was found a dollar bill, with some verses beginning:

Fair lady, lift thine eyes and tell
If this is not a truthful letter.
This is the one (3) thou lovest well,
And naught (0) can make thee love it better (00).

Occultism.

It is noteworthy that supernaturalism prevailed just as strongly at the other side of the globe among the aborigines of the new world. The coming of the Spaniards had been prophesied to the Mexicans by their caciques, and the prophecies were sung amid loud lamentations at their festivals—London Outlook.

The Hot Wind From the Desert.

"The khamsin" is the hot wind from the desert which blows out of the Sahara upon Egypt. The word means fifty, from the idea that it lasts for fifty days. The "khamsin" is terribly hot and dry, and sometimes brings pestilence with it.

Fine Salt—that dissolves quickly

on the food—flavouring deliciously—never gritty, never bitter, WINDSOR TABLE SALT, of course!

Sewing Up the Heart.

Several years ago when a fight occurred in Chicago one of the combatants received a stab wound in the heart. The first physician to reach the apparently doomed man was Dr. Daniel H. Williams, a negro practitioner, who succeeded in sewing up the man's heart. This was the first time any such operation was ever reported in the history of medicine. At the last account the patient in this remarkable case was still alive. Dr. Williams has since served on the Illinois state board of health.

LAND OF FARM HOMES.

Census Shows Remarkable Progress In Manitoba and the Northwest.

A census book, giving the population of Manitoba and the Northwest Provinces by sexes, and a summary of statistics of field crops and stock for 1906, as compared with the census of 1901, has just been issued at Ottawa.

In Manitoba the census of last year showed 205,183 males and 160,505 females. Winnipeg has 50,461 males and 39,692 females. Brandon 5,756 males and 4,652 females. Saskatchewan has 152,793 males and 104,970 females. Alberta has 108,281 males and 77,131 females. In all three provinces there are 466,267 males and 342,606 females, leaving a preponderance of 123,661 males.

In 1906 there were in the three provinces 120,439 farms, as compared with 89,295 in 1901, an increase of 65 per cent. Manitoba now has 35,441 farms, Saskatchewan 54,737, and Alberta 30,211. The increase in the number of farms over 1901 were: Manitoba, 3,629; Saskatchewan, 41,407; Alberta, 30,778.

In 1906 there were 682,919 horses in the three provinces, as compared with 340,820 in 1901; 354,908 milch cows, as compared with 244,318; 1,560,892 horned cattle as compared with 698,407.

The area of wheat under cultivation last year was 2,422,345 acres for Manitoba, 1,381,921 for Saskatchewan, and 1,471,921 for Alberta, a total of 3,865,187 acres, as against 2,406,497 in 1901.

Sugar Taken by Canada.

One of the features of the gathering of Colonial Ministers in London next month will be the mutual congratulations over the ever-increasing bonds of preferential trading between colony and colony. The West Indies, were they represented, could join with Canada in satisfaction over the results of inter-colonial preference, for it is announced that out of a total import of 420,000,000 pounds of raw sugar into Canada last year, 323,000,000 pounds were from the West Indies and British Guiana.

London's Rainfall.

If all the rain that falls in London in a year could be gathered and collected, the supply would amount to 40 tons of water for each person.

The French Census.

The French census, taken on March 4 last year, shows that the total population of France was 39,252,267, an increase over 1901 of 290,323.

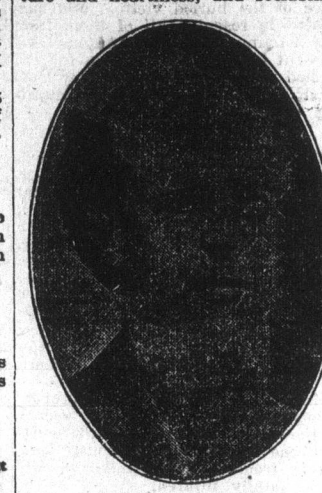

London's fire brigade consists of 1,304 men.

Minard's Liniment for Sale Everywhere.

WILL REPRESENT CANADA.

Statesmen Who Will Speak For Dominion At Colonial Conference.

At the Colonial Conference, which takes place in London in April, Canada will be represented by the Premier, Sir Wilfrid Laurier; Hon. W. S. Fielding, Minister of Finance; Sir Frederick Borden, Minister of Militia and Defence; Hon. Louis P. Brodeur, Minister of Inland Revenue; and Hon. William Patterson, Minister of Customs. Only the Premiers of the various British colonies will have the power of voting. In speaking of the conference and the men selected to represent Canada at this important gathering, The News of St. John, N.B., says: "Sir Wilfrid Laurier will be our chief representative at the conference. Grace he will have, and dignity, suavity, and delicacy, which belong to his race. Anglo-Saxon ardor he may not, cannot have, in the full measure, though he has always thought highly of the Anglo-Saxon idea, as that is exemplified in the conquering instinct and political history. The Hon. Mr. Fielding will be dapper and pleasant, and calculating, while Sir Frederick Borden will offer bluff, good nature and heartiness, and sociability."

SIR WILFRID LAURIER.

Sir Frederick could tell a story. You would not expect him to formulate a constitution. The Hon. Mr. Brodeur will command respect for his serious attitude, his willingness to receive ideas, and for the sense of responsibility which he feels as a public man. The other colonies will send their best men, no doubt. Australia breeds the buoyant, the volatile, the brilliant mind, for it is elementary that large spaces, warmed by a constant sunshine should produce a creature full of courage and mental brilliancy. Dr. Fichett, the author of "Decisive British Battles," and the editor of the Australian Review of Reviews, while in this country, gathered the impression that our winter must make for temperamental depression, and some- times, but perhaps if he had remained with us during our summer and fall, he might have modified his views.

The effect of climate, however, is not to be doubted, and in Australia, which Lord Elgin wrongly said, the other day, was the eldest daughter of the Empire, you have a temperament of optimism which cannot be equalled in the world, coupled with a degree of intellectual brilliancy which, though possibly it may be short-lived, is unsurpassed by people of any other country.

THE DRESSMAKER.

Practical Points For the Woman Who Does Her Own Sewing.

In hemming a lot of bias ruffling there is nothing more aggravating than to have it twist in the machine. This is because there is a right as well as a wrong bias. Which is which can be determined only by testing.

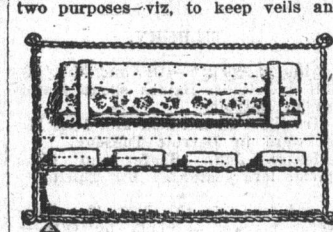

Take your length of goods and fold over your bias corner from both ends. Lay your rule parallel to this, so that you can cut off the short corner from both ends. Try these in the machine in order to discover which one it is that will run askew and produce the twisting so often seen. The other will run easily. One little idea as to the fastening of vents in dresses in the case of both wash materials and the thin, transparent laces and nets is to use, instead of hooks and eyes for the placket fastening, small lace buttons and worked loops. And then another way is to use a strip of silk cord on the eye side of the placket and small buttons on the opposite side which catch into the silk cord. This keeps the placket firmly fastened. The placket of a skirt is considered one of the most important parts of the skirt on account of its finishing, as this adds to the general appearance of the skirt. One reason why so many plackets are gaping is because the hooks and eyes are placed too far apart and insufficient room is given against the strain at this point. Care should be taken in arranging and sewing on fasteners of any kind, as a few extra stitches will help to hold them firmly in place and prevent the fasteners or hooks and eyes from falling off. A placket may be made at the back, front or side of a skirt, the location depending on the style of skirt. The skirt closes at the center of the back and forms an inverted plait, leaving an opening for placket from ten to twelve inches, which allows the skirt to be put on and off easily.

TWO USEFUL TRIFLES.

That Make Convenient Places to Keep Handkerchiefs and Veils.

Most women have odds and ends of silk, brocade and fancy material generally, which they wonder "what on earth can be done with," that perhaps the accompanying sketch may give another idea for the utilization of these scraps and unconsidered trifles.

The design shows a case combining two purposes—viz, to keep veils and

TWO USEFUL TRIFLES.

handkerchiefs, the former of which will last much longer if some little care be given to them when not in use. The sachet sketched could be made of silk, brocade or pretty cretonne, lined with pongee silk. It is twelve or fourteen inches in length and wide enough to fold over and form a pocket for the handkerchiefs and leave the flap for the veil. On the inside of this are sewed two strips of elastic, through which the folded veil is slipped, as the sketch clearly shows. The edges are outlined with cord to match the silk or harmonize with the colors if a patterned material be selected.

Small Boy Suggestions.

Give the small boys a room of their own, where they may be allowed to work, play, read or whatever the boyish fancy may dictate. If they be fond of reading, give them plenty of good books and magazines and an easy chair to sit in while they read.

A boy loves comfort just as much as a girl does, and money spent in making him comfortable at home goes a long way toward keeping him off the street. Some boys are not content to spend a whole evening reading. They should be provided for in some other way. Let them have games and invite their boy friends into their room and feel that they have a share in the home.

If the boy wants to make money and can do it without interfering with his school work, let him do so. It will teach him to be industrious and will cultivate business habits.

Boys like to be trusted, and it makes them manly. If a boy deserves praise, give it to him freely. There are boys and boys, but there was never yet one who was not susceptible to kindness and who could not be managed if the right course was pursued.

Laundry Suggestions.

Things to remember in washing: That flannels are washed first. That white things come next. That colored things are done while white things are boiling. That dirty kitchen aprons and cloths come last of all.

That soaking is done in tepid water. That rinsing is done in tepid water. That extremes of heat and cold cause shrinking.

That soap jelly is necessary for woolen things. That soap must be thoroughly rinsed out before bluing. That blue must be well mixed through the water.

That wringing well after bluing is most important.

Things to remember in drying: To have the lines, pegs and clothes-horse scrupulously clean.

To hang things up wrong side out. To hang colored things in a shady place.

Not to hang woolen things in too great heat.
