The point most dwelt upon is he heavy increase in expenditure, as shown by the fact that, though the gross receipts for the half increased by £178,400, all except £39,000 was wiped out by working expenses, the ratio of expenses advancing from 71.45 to 72.03 per cent.

The directors will have the shareholders strongly behind them in some stringent measures in which they promise to restrict expenditures in different departments in future

The half year's accounts give no sign of this restriction, except a small reduction in taxes under the head of maintenance of equipment. It is not ed also that the Canada Atlantic is still the chief brake on the progress of the system.
