## PURITY FLOUR

And Its Keeping Qualities

SOME people find it necessary to buy a considerable quantity  
of flour at one time—sufficient to last for a long period.  
Naturally they are anxious to procure a flour of the kind best  
adapted to lengthy storage.

There are two important reasons why PURITY FLOUR  
possesses these qualities. One is that it is made entirely from  
Manitoba Hard Wheat. The other lies in the fact that the careful  
milling necessary to produce "Purity" absolutely excludes all  
low-grade particles of the wheat berry. It's the high grade  
Manitoba Hard Wheat Flour that keeps—stands longest storage.  
That's "Purity."

"Purity" flour may cost a little more,  
but is more than worth the difference.  
Try it. Watch results both for quality  
and yield.

ning, A. E. Worrall,  
or any of the principal dealers.

Green Fly and other garden pests look  
harmless to the naked eye, but when  
placed under the microscope one is better  
able to appreciate its powers of destruc-  
tiveness. With its deadly sucking tentacles,  
it quickly absorbs from the stem the  
sap, which is the blood of the plant!  
The day following the use of CIRENGOL  
the green fly will be found of a brown  
color and powerless to do further harm.
