A nice glove for Spring and
Summer wear. All sizes.
Price \$2.65 pair.

Mainly About People.

Mrs. Holm, an Icelandic woman living in Canada, was the author of the first novel ever published in the Icelandic tongue.

Coal strikes may come and coal strikes may go—but they don't bother Miss Ricks Ott, twenty-one years old, who industriously mines coal day after day in a little "wagon mine" on her father's farm in the hills of Mount Oliver, Pa., near Pittsburgh.

Lloyd George asked M. Clemenceau his opinion of the great orators of the French Tribune. The doctor placed M. Viviani in the forefront, and M. Gambetta and M. Jaures next. The latter two he had quarrelled with, but admired their great powers as orators.

The household of Miriam Cooper, Jim star, is one of the most cosmopolitan imaginable. She possesses an American husband, a French maid, an Irish groom, a Japanese chauffeur, a Scottish housekeeper, a Spanish cook, a Chinese gardener, a negro page boy and an English butler.

Professor Elihu Thompson, of Swamscott, present head of the Massachusetts Institute of Technology, has 500 inventions to his credit, among them that of electric welding. He is among the great electrical experts of the world. He is an Englishman who came here as a child. He has been honored by nations, colleges and associations.

The beautiful statuesque Duchess of Westminster, recently wife of the noblest duke in England, and chateaine of Britain's lordliest castles, has given up all that to be the bride of a modest soldier, Captain J. Fitzpatrick Lewis, a war hero, who is a business man. In order to make this love match the duchess was compelled to relinquish all her interests in the estates and heirlooms. She is older than the groom, whom she saved from war wounds.

Men classed as New Yorkers have had leading parts in the shaping of the destinies of nations. Paderewski had a home in Gotham. Leon Trotsky, Russian terrorist, was a former Bronx resident; Georges Clemenceau started

PALE ANAEMIC CHILDREN NEED VINOL

It Makes Puny, Thin, Ailing Children Strong, Robust and Rosy

Physicians Recommend It and Druggists Guarantee It

Rapidly growing children need a great deal of vitality. They not only grow fast but play hard and work hard at school and often are tired, thin, pale, worn and listless when they should be strong, robust and rosy.

If mothers could only realize how VINOL will build up strength for their pale, delicate, ailing children, create a hearty appetite, sound flesh and muscle tissue, rich, red blood, and make them strong, robust and rosy, they would not rest until they had started their little ones taking it.

It is the medicinal, body building extractives of fresh cod's livers, aided by beef, peptone and tonic iron, three of the oldest and most successful tonics known to medicine, that act so quickly in VINOL, and you know what you are giving your little ones.

If VINOL fails to benefit them, your druggist will return your money.

ed to practice medicine in this big city. Dr. Thomas G. Massaryk, life president of the Czechoslovaks, made the public library his workshop; Dr. Wolfgang Kapp, who had the latest German fiasco, was born in Manhattan.

The eyesight of Viscount Grey, England's noted statesman, is improving daily. He writes: "We have great advantages in many ways over our predecessors. There are more opportunities for enjoyment. There is no whole loss poverty; and yet we are living in an age of discontent. All efforts should be made to bring happiness to the people. Real pleasure is the enjoyment of recreation, not too much or too little."

During the war Field Marshal Sir William Robertson and a works company were quartered in a Lincolnshire village, the men being in furnished billets. A dispute arose with one of the "landladies" and the officer, considering that she was in the wrong, refused redress of her alleged grievance. "Oh, very well," said the dame, folding her substantial arms, "I'll just write to Willie Robertson. Him and me were children together and he'll not see me put upon."

Corporal Francis Paghamagabow, a Redskin Indian, of Parry Sound, Ontario, is officially credited by the Canadian army with having shot 379 Germans during the war. The corporal, who was a hunter and trapper in Canada before he enlisted, served as a sharp-shooter with the Canadian expeditionary force, and it is stated that he never missed. He was awarded the Military Medal with two bars. Some airmen who were engaged in bombing raids over the German lines claim to have killed thousands of men, but it is considered likely that Corporal

Peghamagabow holds the record among infantrymen.

James F. Corrigan of New York has been a newspaper man for 50 years. He arrived in this country from Ireland in 1870 and got a job on the New York Herald. Some of his stunts: He interviewed Joseph Chamberlain, the tight-mouthed Englishman. He put in the head of Sir Thomas Lipton the idea of lifting the America's cup. He scored a world beat on the San Francisco earthquake. "Federal Courts Practice" is one of his volumes. He never deliberately wrote a lie or injured a friend.

Why Prices Are High.

(Daily Mail.)

On several occasions Lord D'Abernon has emphasised the inflation of currency as the connecting link between high prices and industrial unrest. In our columns this week he again emphasises the pivotal fact that in each country prices have risen in proportion to the amount of paper put into the currency. It is not so much that goods have risen in price as that money has fallen in value.

In Great Britain we have watered our currency less freely than other European countries. We have taxed ourselves more heavily in proportion to our borrowings, and the tendency of the government to resort for fictitious relief to the printing-press shows at last some signs of being checked.

Every country is suffering from financial disease. Every coin is worth less than it was before. There can be no remedy save by international conference and international action. Lord D'Abernon complains that "for some unexplained reason" the Governments of the world appear unwilling to meet in conference on the subject. The explanation is, probably, that State treasures find it hard to escape from the slippery descent which has a printing-press at the top and the Bankruptcy Court at the bottom. But this dwindling of money's value cannot be allowed to go on. Wages and prices will not stop rising until the value of money stops falling. That—apart from the question of increased production of goods—is the currency problem in a nutshell.

HOW YOU CAN TELL GENUINE ASPIRIN

Only Tablets with "Bayer Cross" are Aspirin—No others!

If you don't see the "Bayer Cross" on the tablets, refuse them—they are not Aspirin at all.

There is only one Aspirin, that marked with the "Bayer Cross"—all other tablets are only acid imitations. Look for the "Bayer Cross". Then it is real Aspirin, for which there is no substitute.

Aspirin is not German but is made in America, and is owned by an American Company, all rights being purchased from the U. S. Government.

Genuine "Bayer Tablets of Aspirin" have been proved safe by millions for Pain, Headache, Neuralgia, Colds, Rheumatism, Lumbago, Neuritis.

Handy tin boxes of 12 tablets—also larger "Bayer" packages, can be had at any drug store.

Aspirin is the trade mark (Newfoundland Registration No. 761), of Bayer Manufacture of Monocacetic Acid, of Salicylic Acid.

The Bayer Co., Inc., U.S.A.

Pliable Uppers, Weatherproof and Wear-Resisting. Tough Tire-Tread Soles. Hard to wear out.

You know from experience what happens to ordinary boots when used in fishing. You've seen how salt water seems to take the life out of the rubber and how the rubbers crack and the soles wear through in a surprisingly short time.

The "EXCEL" is a different and better kind of boot. It has been made especially to stand up under the unusually hard use a fisherman's boot gets.

The rubber and fabric in "EXCEL" boots are of the very highest quality. But it is the special method of curing, under tremendous pressure, that makes the "EXCEL" so wear-resisting. The pressure forces the layers of rubber and fabric together so that they are actually "one-piece", without losing the least bit of the life of resiliency of the rubber. Salt water has practically no effect on "EXCEL" boots. The UPPERS remain pliable and weatherproof, and resist the drying-out action of sun, heat and cold far longer than other boots, consequently they don't crack anywhere so quickly. The SOLES are almost wear-proof, because they are made like an Auto Tire, with 8 plies of rubber and fabric welded by tremendous pressure into a "tire-tread"

Fishermen!

Here's the Boot for You!

Excel Boots

Have Pliable Uppers. Weather Proof and Weather Resisting. Tire-Tread Soles. Hard to Wear Out.

For Men and Boys.

sole that rivals an automobile tire for toughness and durability.

These are exclusive features of "EXCEL" boots.

The picture at the left, of an "EXCEL" boot, with every detail of construction visible, shows how "EXCEL" boots are reinforced at every point of strain. There is not a single feature but what has been proved necessary and desirable by tests of severest use. Your own experience will tell you that a boot with these features simply must be a better boot.

Study this picture. Learn these features. Remember them when you compare "EXCEL" boots with ordinary boots. And remember, too, that very important point which the picture cannot show, namely, that "EXCEL" boots are cured under tremendous pressure which leaves the rubber pliable, weather-proof, and wear-resisting. It is only by the use of this tremendous pressure combined with highest quality materials that the best results are obtained.

Below are listed seven special features which make "EXCEL" boots superior. Read them carefully so that when you need boots you will know how to get the best value for your money.

Seven Special Features that make the "Excel" Best.

FEATURE No. 1—The entire boot is cured under heavy pressure, forcing all parts together in "one-piece", and retaining the full life and resiliency of the rubber.

FEATURE No. 2—An 8-ply double sole of tough, durable rubber, made like an Auto Tire, running all the way under the full moulded heel. This sole and heel are so wear-resisting that they are commonly called the "tough on rocks" sole and heel.

FEATURE No. 3—A heavily reinforced boot which will withstand the hardest kind of wear.

Most reliable dealers sell "EXCEL" boots. Be sure to look for the name "EXCEL". Substitutes and "just as good" boots will not give you "EXCEL" service. If your dealer does not have them in stock, write us for name of nearest dealer.

FEATURE No. 4—Six plies at the instep relieves strain and prevents wrinkling or cracking.

FEATURE No. 5—Reinforced five-ply leg for extra wear. Just the right amount of strength to stand up, yet not be uncomfortable.

FEATURE No. 6—Four-ply top, very pliable.

FEATURE No. 7—Heavy duck lining, and a heavy insole prevent dampness and keep feet dry and comfortable.
