"FRUIT-A-TIVES" SAVED HIS LIFE

Mr. Dingwall was Superintendent of St. Andrews Sunday School in Williams town for nine years and License Commissioner for Glengarry - and Tax Collector for Charlottenburg-for fourteen years continuously. Read how strongly Mr. Dingwall comes out in favor of "Fruit-a-tives."

Williamstown, Ont., April 5th., 1907. I have much pleasure in testifying to the almost marvellous benefit I have derived from taking "Fruit-a-tives." I was a life long sufferer from Chronic Constipation and the only medicine I ever secured to do me any real good was "Fruit-a-tives." This medicine cured me when everything else failed. Also, last spring, I had a severe attack of bladder trouble with kidney trouble, and 'Fruit-a-tives' cured these complaints for me, when the physician attending me had practically given me up. I am now over eighty years of age and I can stronghly recommend "Fruit-a-tives" for Chronic Constipation and bladder and kidney trouble. This medicine is mild like fruit, is easy to take, but most effective in action.

The young man tramped about with his porters through the tall grass and was given a shot or so at two lions, both of which he missed. Had he tried for big game it

would have cost him \$250 more. On a long hunt the expenses of all kinds can be considerably reduced, and I should think that \$40 a day for each sportsman in the party would be a fair estimate. I am told that a man can be fitted out with porters, gunbearers and personal servants for \$250 a month. One can get a good cook for from \$5 to \$8 month, a gunbearer for about \$10, and a personal servant for from \$8 to \$10. The cense for big game in all cases costs \$250. The traveling expenses from New York to British East Africa direct are about \$300.

FOOD WHEN ON SAFARI.

As to provisions for the trip, this depends much upon the tastes of the individual sportsman. There are native villages almost everywhere at which some fresh food can be bought at cheap rates Chickens are plentiful at 8 cents a pound, and meat costs the same. In the streams and lakes there are fish; the guns of the party ought to supply plenty of game, and one need never suffer for the want

of antelope or zebra steak.

As to the other food, it should be packed up in boxes of 60 pounds each; and in case the outfit is prepared here, each box will have sufficient for one man's requirements for one week. The most of the stuff is in tins, and it usually includes plenty of Chicago canned beef, Canadian bacon and London biscuits, jams and marmalades. Such boxes are labeled with numbers, No. 1 containing the first week's supply, No. 2 the second week's, and so on. Each box weighs just 60 pounds, as no more than that can be carried on the

head of one porter.

I would advise the American sportsman who intends coming out here to shoot to stop off on the way in England and get much of his supplies there. There are London firms specialty of outfitting for African travel and for hunting expeditions .- Frank G.
