CAMPBELLTON, NEW BRUNSWICK, THURSDAY, SEPTEMBER 13, 1917.

THE CHIEF CHARM OF LOVELY WOMAN

Soft, Clear, Smooth Skin Comes With The Use Of "FRUIT-A-TIVES".

WOMAN WATSON, 55 Drayton Ave., Toronto, Nov. 10th, 1913.

A beautiful complexion is a woman's chief glory and the envy of her less fortunate rivals. Yet a soft, clear skin—glowing with health—is only the natural result of pure blood.

"I was troubled for a considerable time with a very unpleasant, disfiguring rash, which covered my face and for which I used applications and remedies without relief. After using 'Fruit-a-tives' for one week, the rash is completely gone. I am deeply thankful for the relief and in the future, I will not be without 'Fruit-a-tives'."

50c. a box, 6 for \$2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

LADY SECRETARY GETS GOOD SALARY.

Next to David Lloyd George, prime minister of England, Miss F. L. Stevenson, his private secretary, is perhaps the most important person in the British Empire. She performs duties for which men have been knighted amid the plaudits of the nation.

Everything that reaches Lord George necessarily passes through Miss Stevenson's hands. The private secretary of the prime minister is his chief confidant, his tactful counselor and in a sense even the keeper of his conscience.

Some prime ministers as for instance Lord Beaconsfield have caused peerage to be bestowed on their private secretaries. Herbert Asquith not only rewarded his private secretary with a knighthood of the Order of the Bath but with the hand of his daughter.

In view of the fact that many distinguished men have occupied the position of alter ego to the British premier, Lloyd George overruled an almost prescriptive precedent when he appointed Miss Stevenson. The nomination created a sensation, being particularly welcome in the ranks of those who are working to broaden the estate of women in the realm.

The woman who now occupies the spacious private secretary's room at 10 Downing street, the historic official residence of the prime minister of England, is London born the daughter of a Scotch father and a French mother.

After serving him as a private secretary in connection with his preparation of the national insurance act, she was continued as one of his official secretaries when he became chancellor of the exchequer in 1915. She was retained in the same capacity when he

EMPIRE STRONG BECAUSE OF WAR

MR. LLOYD GEORGE SAYS DOMINION AND MOTHER COUNTRY ARE ONE.

Germany has not yet felt the final strain of war, said Premier Lloyd George, speaking at the Royal National Eisteddfod here yesterday. When she did, he continued, she would feel the binding value of real freedom.

If Russia had enjoyed more freedom in peace time, declared the Premier, she would have been more united in war, for unity of action was not a suppression of freedom, but its highest expression.

Speaking of the affection of the Dominions for the Mother Country, the Premier said this would continue to grow and become deeper, more indelible, more compelling as the years rolled by.

This was the great day of the Empire, the Premier declared. "What would have happened to the liberty of nations?" he went on. "If it had not been for the British Empire? When the war is over humanity will know how much human liberty owes to the fact that the British Empire is no sham, but a reality."

"Great Empires are necessary for protection and security, and for strength, but small nations are necessary for concentration and intensive effort. The British Empire is made up of four nations, but they to-day are one in purpose, one in action, one in sacrifice, and, please God, soon will be one in triumph."

COLD FEET.

"Do you suffer from cold feet?" the doctor asked the young wife.

"Yes," she replied.

He promised to send her some medicine to take.

"Oh," she said nervously. "They're not—mine."

"Do you always let your wife have her own way?" "Yes, and mine, too," Louisville Courier-Journal.

Silence—We never hear the best things that are said about us. Cynics—No; we are dead then.—Judge.

"Hello, Bill! glad to see you! I've just got back from my vacation."

"Sorry, old man! I can't lend you a cent. I'm just going on mine."—Boston Transcript.

The accused whose head, scarcely reached to the level of the front of the dock, said in reply to the magistrate that he was only eight years of age.

"Only eight," re-echoed the magistrate, "and yet you already have been caught in the act of thieving! This is very shocking!"

"Oh, but please your wushup," piped the urchin in his squeaky voice, "I don't go out reg'lar! Only father is ill now, you see, and so I was bound to go out in his place."

became minister of munitions two years ago. Of five secretaries she was the second in rank. When Lloyd George succeeded to the war office he took Miss Stevenson along in the secretarial capacity.

As the chief private secretary of the prime minister, Miss Stevenson received a salary of \$4,000 or \$5,000 a year.

NOBODY KNOWS STOPPED IN U. S.

PRESIDENT WILSON ABSOLUTELY FORBIDS MAKING OF WHISKY.

Washington, Sept. 5.—Manufacture of whiskey will cease throughout the nation at 11 o'clock to-night, when the prohibition clause of the Food Act becomes effective.

Millions of bushels of grain which would otherwise be ground up for whiskey will thus be released for food. How many millions no one knows, for the manufacture of alcohol for beverage purposes is so closely blended with the production of alcohol for industrial and medicinal purposes that there is no way of determining the exact amount.

Of the one hundred million bushels of grain and fruit which goes into the distilleries each year about forty per cent, experts estimate, comes out in the form of whiskey and other distilled beverage drinks. The remainder, made into alcohol of exactly the same characteristics as that used for whiskey, eventually finds its way into perfumes, toilet waters, bay rum, medicines and to industries where denatured alcohol is used in ever increasing quantities.

Approximately 116,000,000 gallons of whiskey is produced each year by American distilleries. Production of alcohol by the same distilleries for commercial and medicinal purposes other than beverages approximates 146,000,000 gallons. The manufacture of alcohol for the latter purposes will continue as usual, probably in greater volumes, and few of the larger distilleries, if any, will have to shut down.

The class of distilleries which will be put out of business is composed almost entirely of small plants operated by one man to half a dozen men, located in California, Ohio and New Jersey, and producing brandy from grapes, apples and peaches. These produce approximately 2,000,000 gallons a year. Stopping whiskey manufacture instead of curtailing the government's revenues, will increase them for the next two years, officials believe. Coupled with the operation of the pending revenue bill, the withdrawal of whiskey from the stock already accumulated will probably treble the revenues within the next twelve months, as the present law imposes a tax of \$1.10 and the revenue bill contemplates a tax of \$3.20 a gallon. A stock of approximately 220,000,000 gallons has accumulated in the bonded warehouses and on the shelves of wholesale and retail liquor dealers. Approximately 190,000,000 gallons are in warehouses, and upon that quantity the government will collect taxes as it is withdrawn.

MARRIED.

An interesting event took place in the Church of England at Campbellton, on Thursday afternoon, when Mr. Robert Minto Boyd, recently appointed assistant manager of the main office of the Royal Bank at Vancouver, B. C., was united in marriage with Miss Marjorie, daughter of Mr. and Mrs. Daniel McAlister of Jacquet River, the ceremony being performed by the Rector, Rev. Mr. Barnes.

The bride's party, which included Mr. and Mrs. McAlister, Mrs. Desbrow, aunt of the bride, Mrs. (Dr.) McMillan, of West Virginia, who has a summer cottage at Jacquet River, and Mr. Knight, of Port Daniel, Quebec, were entertained at Campbellton in Mrs. McMillan's car. Other guests included Mr. J. S. Boyd, of Moncton, father of the groom, Mr. and Mrs. Montgomery and Mr. Murchie. The bride, who looked charming in a traveling suit with white furs, was given away by her father. After the ceremony the wedding party had luncheon at the St. Louis Hotel, after which Mr. and Mrs. Boyd took the Ocean Limited en route to their honeymoon home in Vancouver, stopping off for a few days in Montreal and Calgary. At the depot the bride was showered with rice and confetti and the happy couple received the best wishes of many friends.

Optimistic views as to Manitoba's crops were set forth lately by the Deputy Minister for Manitoba. There have been reports of black rust but fortunately there is no indication that it is dangerous.

NOBODY KNOWS

NEW BRUNSWICK CAN HAVE AS GOOD IF PROPERLY UNDERTAKEN

Capitalizing the revenue received from automobile licenses gave the State of Maine a sum sufficient to inaugurate a road-building policy which has resulted in a tremendous increase in automobile ownership and in the development of a State-wide demand for good roads, even though good roads necessitate some additional taxation. The people of Maine realize that the money comes back to them in the added pleasure from the use of roads it is a comfort to drive upon, in the lessened repair bills, and directly in the largely increased revenue derived from the greatest tourist travel of those who pay as they go and want nothing but the best. What Maine has done is what many other states have done. The idea of using the revenue from a fair and reasonable automobile tax is now too generally followed to be regarded as an experiment. It is the recognized method of good road financing, and is justified on the ground that it is right that those whose necessity and pleasure demand good roads should pay for the production of good roads. Experience in many communities has proven that they are willing to pay if given roads that measure up to standard and if assured of honest, non-political expenditure of the money realized from the capitalization of their automobile tax. New Brunswick, following the example of Maine, and by following it in the same business-like way, could raise sufficient money to build a series of trunk roads that would gridiron the province in a way reasonably and adequately to meet the demands of those in whose interest the work is primarily suggested. By good roads is meant: real roads properly constructed, not patchwork repairs which are not permanent and only good in good weather. Because good roads are a necessity, and because under the conditions the automobile has created they pay for themselves, the new Brunswick government should seriously grapple with the problem and give over once and for all the present wasteful extravagant and wholly unsatisfactory policy of patchwork repairs. The time of a real, progressive, non-partisan, business-like road policy has come, and the government will find the public sympathetic and friendly in grappling with the problem it gives evidence of a determination to solve it in the only way that it can be satisfactorily solved.

SEASONABLE—HINTS TO THE SPORTSMEN.

The Game Laws were enacted for your benefit. Their violation means a greater loss to you than to others because this is your sport.

If your record is good, what will you do this year to force guilty persons to understand that they are threatening the existence of YOUR sport?

The Deputy Warden is working for YOUR interest. He is your servant but will appreciate your help. His interests should be your interests. A good many hunters think that violating the Fish and Game Laws and getting away with it, is part of the game. The more you think this over, we believe the less willing you will be to subscribe to this doctrine. Don't shoot until you clearly see your game, and not even then unless you have your partner located.

Theory: safe gun in the one apart in your case. You can't be too careful with it at any time.

Every square mile burned over means less shooting ground for game. Report a fire to the nearest Warden. Help fight it. It destroys the hunting grounds and the game.

Make sure it's a lawful head. It may be cow or a man; how would you feel?

Leave a clean camp and a clean record; you may want to come back.

REMEMBER that by shielding the poacher you put a premium on his work.

"The best sportsman and hunter is the man who finds the most game, kills the least, and leaves behind him no wounded animals!" BE A SPORT.

Remember this is a lean year.

Remember the meatless days and waste nothing. Bring it all out. If you don't want it somebody else would be glad to get it.

Remember the H. C. L. and what you consider worthless will be highly prized by your less fortunate neighbor.

Let the above propositions sink in. Our desires is to make this grand old Province more and more attractive to live in every year, and among other things to increase and perpetuate your sport. But we can't do that without your assistance. We shall always be glad to hear from you on the problems involved and we wish you good luck and wholesome recreation when you go hunting or fishing.

A. F. O'LEARY, CHIEF GAME AND FIRE WARDEN, N. B.

After the garden project here comes another suggestion of supreme interest: In September on opening the schools all over the country the teachers will teach their pupils four things, to conserve wheat, fats, meats and milk and the reason why. Such suggestions are timely, being uttered by the advisory committee on Home Economics at Washington.

Food is being wasted in Canada and it is a plain fact that every pound of bread and bacon that is saved in Canada can be eaten in the war ravaged countries of Europe. It is no news to you that the people of France and Britain have submitted cheerfully to an unheard-of restriction in their food supplies. The people of Canada stand for the same cause; let us then be determined to help our heroic allies to the finish.

Livery Stable AUTOS IN CONNECTION

I am now ready for spending and summer business, getting in a lot of new horses and carriages.

I run an automobile in connection with my stable. We would appreciate a call from you.

Call by phone or otherwise.
