MI Recting Vesterday-The Movement will go on Until it Encircles the Earth. PARIS, March 10.—An advanced Irish nationalist declares that the nationalists are annoyed but in no wise dis- ouraged at the failure of their dyna- mite attempts. They are determined to persevere, and he predicts a long series of explosions in England in the finmediate future. Mechanism has been invented which renders explosion certain, and ob- viates the use of clock-work. Robert Jaffrey said he understood the bill was to come before the railway com- mittee of the house of commons to-day, and Mr. Willis, the secretary, was in- structed to forward a copy of the resolu- tion to Ottawa last night. At a meeting of the corn exchange as- sociation held previously the following resolution was offered by W. D. Matthews and J. L. Spink and carried: "That the corn exchange views with satisfaction the effort being made by the Grand Trunk railway to obtain funds for the double-tracking of its line between Toronto and Montreal, and hopes that a work so manifestly in the interests of the trade and commerce of this country will be carried through, and that no unnecessary obstacle will be placed in the way of the attainment of this most de- sirable object." He them gave an accountof the formation of the league, which had been alto of briefless barristers, etc., with noth- ing else to do. The platform of the tabu- lated grievances were published in the dily papers. A. act, we were entitled to the control of our lands, timber and min- erals, but we cannot get them. We were also entitled to construct railways and other public works within the limits of the province. But the authorities at Ottawa deny us this right, too. It is evi- dent that our liberty as British subjects is in danger; and in the name of the peo- ple of Manitoba, we would impeach the dominion government at the bar of the imperial parliament as guilty of disloy- alty to the Canadam confederation. He had ever been a loyal supporter of the British constitution, but now he found that magna charter was a dead letter in at least one part of the empire. The declara- tion of rights drawn up at the last conven- tion had since been endorsed at hundreds of meetings throughout the country. This declaration had been submitted to the local and dominion governments—they all knew with what little result. The next step to be taken is what has now to be considered. Would they quictly sub- mit to the existing state of a things, and remain the serfs of a des- potic government? or would they carry their grievances to a higher tribunal? The ime had, he thought, come when they should ask for something more than the mere carrying out of the British North America act in its integrity. Confeder- ation had been on its trial and found want- ing. The interests of the eastern ard west- ern provinces, so far from being identical, were absolutely conflicting. The eastern provinces might desire to build them- selves up and develop their industries by a motective tariff. The tariff meant a	EXCLUSION AND AND AND AND AND AND AND AND AND AN

This settled the matter as far as the board of trade was concerned. During the discussion Ald. Turner and G. B. Smith had their usual little tift across the room. A parting blast was given to the "agree-ment" at a largely attended meeting of citizens in St. Lawrence hall last night. Mayor Boswell called the gathering by proclamation and presided in its first stages, but a previous appointment having called him away, John Baxter fillet the chair for the rest of the night.
