land, and 1,409,896,000 pounds from Canada, making a total of 1,927,129,-000 lbs. Canada is still a long way in the lead, but Australasia is coming on fast.

The classification made by Dr. Bruce Smith, of Toronto, of the causes of poverty, in percentages is Intemperance, 16; shiftlessness, 15; immortality, 13; stupidity, 8; ignorance, 5. Information of as much value, and probably wider interest. would be a similar classification of the causes of riches

To place the merchantmen of Can ada and the U.S. on an equal footing as regards the use of the Panama canal should toll be imposed on Canadian ships, the Canadian Government has provided for subsidies to ships that will have to use that route sufficient to offset any charges made by the United States. In fact Canada is preparing to give free tolls to her shipping through the Panama canal, no matter how the controversy re-free tolls for Yankee ships ends.

A six year old girl, attending school in Brooklyn, N. Y., died from the effects of swallowing a piece of lead from a blue peucil which she had been in the habit of putting in her mouth while at school. Doctors used every antidote known to sci-ence, but the child died from the effects of the poison. The habit of putting pencils in the mouth should not be tolerated for a moment. It is

## A FIREMAN'S PERIL

How Zam-Buk Delivered Him.

At 215 Fraser Ave., Edmonton, Alta., lives W. P. Mahy, a former member of the local fire brigade, who has wonderful cause to be thankful for the curative powers of Zam-Buk. He says:---''A serious skin disease broke out on my face, and spread until I was in a terrible state. The snots and little ufcers were state. The spots and little ufcers were frightfully irritating, and yet when scratched or rubbed they bled and smarted. Shaving caused me agony, and sometimes I would have to go two weeks without a shave. I tried home-made remedies, herb salver, and various other remedies, herb salver, and various other preparations, but the sores got no better. When Zam-Buk was mentioned I had little farth that it would be able to do me any good. My case was such an obstin-ate one. I gave it a fair trial, however, and the first box made such a wonderful change for the better that it gave me encouragement to continue. I did so, and to cut a long story short. Zam.Buk and, to cut a long story short, Zam-Buk in the end quite cured me. My face is now clear of all traces of the terrible disease, which troubled me for so long." Thousands of sufferers from eczema blood poison, ulcers, chronic sore, piles ringworm, cold sores, cuts, burns and skin injuries, have been relieved and cured, as was Mr. Mahy, by Zam Buk.

.

THE AGE OF BEAUTY. Time-Honored Question Being De

bated By Paris Artists. Just at present Paris is deeply in-terested over a delicate problem which terested over a delicate problem which several famous aesthetes are trying to solve. The question—as old as time itself but an ever absorbing topic for c\_gument—is. "what is woman's hour of beauty and at what age is she most charming and most irresistible?" Henri Harpignies, the famous land-scape painter, gives his opinion that woman's period of greatest charm is between the ages of 16 and 20. He save:

between the ages of 16 and 20. He says: "The sovereignity of human beauty is in pure and limpid perfection when it has not suffered the least injury from time, care, grief, or illness. It is only the things of nature which have their beauty accentuated by the passage of years. "A very young man (M. Harpignies recently celebrated his 93d birthday) is as yet unable to appreciate the ad-mirable and unique qualities of youth, and in allured by the artificial and questionable beauty of the more ma-ture woman, and is attracted by what is called the charm of experience. It is only later that he learns the differ-ence between the sham and the real. sony later that he learns the differ-ence between the sham and the real. "Woman's hour of beauty is not in artificial light, but in the full power of the sun." Antonio de Lagandara, the well-

known portrait painter, declares that he finds it impossible to fix the age he finds it impossible to fix the age of the most charming women, saying: "Their period of beauty ranges from 18 to 40 and even later. Quite young women are most beautiful in the morn-ing, during which there seems to be an understanding between them and the atmosphere, which gives them the adorable appearance of flowers and fruit, sprinkled with dew. "But the hour of beauty for women less young is the evening, under the glittering. Lights which accord better made to support the admirable but dangerous complication of jewels and intelligent articles which add what may be called literary beauty to the plastic one.

plastic one. "The third hour of beauty is at dusk -the exquisite and consoling moment of illusion."

of illusion." Says the sculptor, Albert Barthol-ome, "no expression of beauty touches me if not illumined by the reflection of goodness, and I believe that it will be found in women easiest when they are young-between 18 and 25-when they still retain their illusions, and hence this reflection is sublished by are young-between 18 and 25-when they still retain their illusions, and before this reflection is abolished by the veil influence of men and things." "As an artist," says Ferdinand Humbert, director of the Academy of Beaux-Arts, "I believe, with Bar-tholome, that the most beautiful time of womanhood is from 18 to 25-the form. But as a man I find that woman is never more seductive, more appeal-ing, be she plain or lovely, than from 30 to 35. Intelligence, experience, tact and a divine sympathy for the sorrows and sins of the world add to whatever of natural charm she may have and the result is, to me, at any rate, s

Hot Soda Bath. Once a week take a hot bicarbonate of soda bath. Buy a package of bi-carbonate of soda (naking soda) and put three heaping teaspoonfuls in eight quarts of water. After the soda is put in the water stir it carefully so it will be all dissolved. Then stand in the tub and go over all the body with a stiff brush. It is all right to use soap too. Rub the body until it is a bright pink. Then rinse off with clear water. You will find this a most refreshing, healthful bath. Hot Soda Bath

#### A Reforming Influence.

"That automobile I bought has been doing wonders for me," said Mr.

Chuggins. "Fresh air and all that sort of thing?" "It has benefited me morally as well as physically. It has led me to avoid intoxicants and to lead a life that will insure me as beautiful an obituary as possible."

#### Father Fixed It.

Her Father-My boy, I like you, and I want you to marry my girl, but have you spoken to her mother about it?

Suitor-No, sir. Her Father-Then to make it a sure thing for you I'll oppose the match.

#### Costermongers In Morocco.

In Morocco the costermonger recom In Morocco the costermonger recom-mends his wares by pledging the cre-dit of a saint. "In the name of Mulai Idriss! Roast chestnuts!" "In the name of our Lord Mohammed Al Hadj! Popcorn! Popcorn!" "In the name of Sidna Ali-bu-Rhaleh!. Mei-ons! Nice, sweet melons!" "Allah is gracious! Beans! Fried beans!" "There be no might nor maiesty save "There be no might nor majesty save in Allah! Water! Cool Water!" These in Alian' Water Cool Water These and the like are heard at every turn. Even the auctioneer who is calling out the price of a slave or the bids for a Rabat carpet is careful to inter-lard his professional talk freely with allusions to his Maker and the ple-thorie roll of Morrish saints thoric roll of Moorish saints

#### Air Pressure.

Air Pressure. At the level of the sea the pressure of the atmosphere on the piston of an engine is about fifteen pounds to the square tuch, but decreases at higher altitudes. As this atmospheric pres-sure must be overcome by the steam pressure 1 cfore any work can be done, it is evident that at the diminished are pressure of high altitudes more work can be obtained from a given pressure of steam than at the sea level, or, in other words, an equally effective pressure of steam can be obtained with the expenditure of less fuel. The dif-ference, however, is not great enough to be of any pressure.

#### A Familiar Path.

"Well, Jorrocks, I understand you are to lead Mrs. Wintringham-Jones-Smythe to the altar," said Bubbleton. "Not on your life," returned Jor-rocks. "She knows the way, I'm inst going along". just going along."

#### A Conservative.

"I don't like to be always moving about," declared the cook.

WATFORD, MARCH 14, 1913.

## NOTE AND COMMENT.

It is stated on good authority that the next governor-general of Canada will be General Lord Methuen, who was commander of the first division of the First Army Corps in the South African War from 1889 to 1902, and has had a most distinguished military career. As the Duke of Connaught returns to England in the spring on account of the illness of the Duchess of Connaught, it is likely his successor will be in Canada by the fall, the belief being that the Duke and Duchess will not return to Canada at all, having already served a longer term in the Dominion than was expected would be the case when the Duke was appointed to succeed Earl Grey.

Up to the late eighties the United States was the principal source from which Britain's outside cheese was drawn. Then Canada took the lead and still retains it. Now, according to the Scottish Trader, Australasia threatend to overtake this country During the twelve months ended August 31, 1912, there was imported into the United Kingdom 1,473,000 of cheese from Australia, 515,760,000 pounds from New Zea-

PPLY CO.

CHOP STUFF. Tilbury is on the lookout for a \$2,500

clock from the government for its new town hall, Dr. W. B. Rowe, of Blenheim, received notice from the Department of his appointment to the inspectorateship and complete charge of all hog cholera cases in Western Ontario. His duties begin at once.

In connection with the recent anniver-sary of the Kingsville Methodist church \$2,450 was paid on the parsonage debt, together with the annual interest of \$228. This leaves \$1,350 to be met at the anni-versary of 1914.

Nearly all children are subject to worms, and many are born with them Spare them suffering by using Mother Graves' Worm Exterminator, the best remedy of the kind that can be had. m Mr. Dan Freele had his left hand badly

lacerated Friday afternoon at the basket factory, Forest. He was tightening some bolts on the veneer machine when the wrench slipped, and in an effort to keep it from damaging the knife, his hand was caught between the bolt and the machine.

At Kingsville on Tuesday William Rollo was working with a gang of men testing and repairing the main gas line east of Wheatley, when the pipe sudden-ly burst, blowing Rollo about twenty-five feet into the air. In falling to the ground his leg was fractured and his face badly cut and bruised.

Allan McDougall, recognized as one of the best teachers in the West Middlesex inspectorate, has tendered his resigna-tion to the trustees of S. S. No. S. Cara-doc, where he has taught continuously for over 20 years. Mr. McDougall gives up the school to manage his farm, owing to the scarcity of help.

perfect woman

perfect woman." The average vote places 25 as the age when a woman is fairest. It has been noticed in the course of the argument that the older the expert the youngel the age which he declares his ideal The artist of 70, for instance, sees love liness only in the girl of 20 or 25, while 35 appeals to the critic of 30 of 40.

#### Aerial Taxicabs.

Aerial Taxicabs. The of the great French aeroplant milders has constructed a veritable body which looks like that of any taxi cab. The passengers enter by a sidd of and view the landscape below through mica windows. Pneumati-cushions protect the passengers in front of the machine, like a chauffeur There is even a speaking tube to facili-tate communication between the pas-sengers within the taxi and the chauf-feur. A 100 horse power engine if it he fuel tanks. The spread of wing is forty-three feet from tip to tip and the over all length is forty-six feet when the taxis 1,540 pounds.

#### Lalande and Neptune.

Lalande and Neptune. The astronomer Lalande narrowly escaped being made famous by a dis-covery. He accidentally struck Nep-tune with his glass on May 8, 1785, but supposed it was a star and re-corded its exact situation. Two days later he struck it once more and made a record of it. But when he looked over his notes he found he had it down as being in two different places, and as a star cannot move in forty-eight hours he supposed he had made a mistake in one of his notes. If he had used his mind a little less mech-anically he easily might have been a columbus.—London Chronicle.

"I've been in this apartment house a year. There's ninety families in it. I'm good for a year more."

#### At Cross Purposes.

When a mother detects from the writh ings and fretting of a child that worms are troubling it, she can procure no better remedy than Miller's Worm Powders, which are guaranteed to totally expel worms from the system. They may cause vomiting, but this need cause no auxiety, because it is but a manifesta-tation of their thorough work. No worms can long exist where these Powders are used.
