

European Intelligence.

LIVERPOOL, August 6.

The fears which were entertained on this day week of a formidable rebellion in Ireland have, we rejoice to say, been considerably relieved within the past few days, and the danger of any outbreak in this town or in the manufacturing districts for the present, at least, is very remote.

Waterford, Aug. 1.—At Carrick a great change in the tone of the people is manifest within the last two days. The Rev. Dr. Connolly, Roman Catholic pastor, has denounced the leaders, and cautioned all under his care against breaking the peace. At Cahir the Dean denounced the movement on Sunday; at Cashel the parish priest pronounced against it; at Clogheen, the Rev. Mr. Kelly lent his voice to its suppression; and Archdeacon Laffan, at Fethard, gave his powerful assistance from the altar in withdrawing his parishioners from being led away.

From the strong opposition given to the confederates by the greater portion of the Roman Catholic clergy, and the Old Irelanders being disinclined to fraternise, I think I may assure you of peace, at least in the districts I have mentioned in this report.

Mr. Halpin, secretary to the Irish League, was arrested on Saturday at the League Rooms, Dale Street, under a warrant authorised by the Habeas Corpus Suspension Act. Mr. Rea, of Belfast, who was in company with Halpin at the time, was also taken into custody, and both sent to Kilmainham prison. The police afterwards seized all the books and papers in the League Rooms.

The Confederate or rebel clubs in the cities and throughout the country are all being dissolved.

Seizure of Gunpowder bound for Ireland.

PLYMOUTH, Aug. 2.—Yesterday, a gentleman residing in Stonehouse received information that a vessel named the Emerald Isle, Captain Buck, had left London bound for Ireland, with a quantity of gunpowder on board, which she had entered on her papers as flour. We have also heard that the gunpowder was taken on board at Yarmouth. When the information was received here it was immediately communicated to the pilots and officers connected with the coast service, in order that they might keep a look-out. Yesterday the Emerald Isle put in the Sound, in consequence of adverse winds. She was immediately boarded, and the captain was asked what he had on board. He replied that he had flour, and was bound for Dublin. Mr. Rea, the tide surveyor, asked to look at some of the flour, and directed that some of the barrels should be handed up to him; on this being done, they were found to contain gunpowder. The whole of the other barrels are also believed to contain gunpowder, and it was bound for Ireland for the benefit of the insurgents.

There were 300 barrels on board. The vessel and all parties connected with it are in care of the authorities.

Double Guards on the Mails.—Yesterday evening the different mails leaving the Post Office had double guards mounted on them, as if the authorities were apprehensive of an attack.

At Nenagh the police have been strengthened and furnished with muskets and ammunition. A squadron of dragoons and the 59th from Templemore, were ordered to occupy the town.

Arrests in Drogheda.—On Thursday evening, about three o'clock, Mr. Marron, editor of the *Drogheda Argus*, with Messrs Hart and Drew, were arrested on a charge of "training and drilling." They were brought before Captain Derinzy, S. M. in the Tholsel, and, after a lengthened investigation, the charge against our respected and popular townsman, Mr. Drew, was dismissed. Messrs Hart and Marron were held to bail to appear at the next Month-assizes. On leaving the Tholsel office, a large crowd of respectable traders and others cheered Mr. Marron and his friends most enthusiastically to the *Argus* office, in West Street, concluding with one deafening cheer for—"the Queen and Repeal!"—*Freeman*.

The last accounts from Ireland report the continuance of tranquillity. There is no intelligence of the movements of the rebel leaders.

CONTINENTAL NEWS.

The news from the Continent is important, and not by any means favourable to peace. All hope of amicably arranging the Danish question has been abandoned, and consequently hostilities, with all the attendant pressure of blockade, seizure, and embargo, will be, or are already renewed. On every hand the note of preparation for the prosecution of energetic measures is heard. The German ship-owners have been officially warned by the Government of Berlin, of the renewed risk of capture by the Danes. The German Parliament has declared an intention to wrest Limburg from Holland. The speech of the Archduke John, in opening the Austrian Diet, breathed amity and peace towards all the states of the Empire, and all foreign countries. Even of Italy, he averred that the war "is not directed against the liberties of the people of that country," and that the task of the army is "to conquer an honorable peace."—Accounts from Bologna state that four of the legations have risen against the authority of the Pope, and a committee of war has been appointed, charged to take such measures as they may think necessary, without reference to the central government of Rome. The principal adopted as the basis of action with this committee is, not only the defence of the Pontifical states, but the total expulsion of the Austrians between the Alps.

From France the news is comparatively unimportant. The correspondent of the *Daily News* mentions a rumor that Lord Northampton is about to quit Paris, and that Lord Holland will succeed him, not as an ambassador, but as a minister, conformably to the usages of the republic, which only names ministers or charge d'affaires to the foreign courts, with the exception of the Holy See. Gen. Oudinot is ordered to form a division from the troops at Moulins, Lyons and Orenoble, and to march to Toulon, where orders are already sent to a division of our fleet. These troops with it is said, sail for the Adriatic, and occupy a city near the Po, in concert with the Pope. His Holiness seems, however, in want of assistance in re-against his own subjects, than against another power.—In Spain, the Monarchist insurrection continues; in Catalonia, bands of Carlists are beginning to be mischievously active.—The Porte is represented as about to take serious measures respecting the Danubian principalities. Troops and cannon are on their way to the Lower Danube, and the army at Baghdad has been ordered to hasten to Constantinople in forced marches. Meanwhile the Russian troops have entered Lower Wallachia without the slightest opposition.—The arrival of another Indian mail removes the anxiety created by the reports of serious plots at Lahore, corroborated by the summary execution of two natives of rank in the service of the Ranees. It now appears that the steps taken to punish treasonable intrigues have been successful in preventing the anticipated spread of dissatisfaction beyond the Beas and the Sutlej. The only actual movement has been that of Maharaj Singh, who raised the standard of sedition with about 300 followers. A pursuit was set on foot for the capture of this Eastern O'Brien, but had not succeeded at the date of the advices.

CANADA.—The Montreal Gazette gives the following "important if true" rumors, viz:—That His Excellency the Governor-General has tendered his resignation of the government of the Colony.

That His Excellency is recalled, and is to be succeeded by Sir George Grey.

That three regiments of militia are immediately to be ordered out and drilled.

That the Irish of the United States are about to make an irruption into Canada, for objects which no human being seems able to conjecture.

That in the event of Mr. Sullivan being made a judge, Mr. Cameron will be made Commissioner of Crown Lands.

From all we can learn, we believe the Potato disease will not be half so dangerous as was apprehended a week ago. We are led to this conclusion from the fact, that those vines which were first infected, yet retain a great portion of their growth and vigor. The blight indeed appears to be very capricious, as may be seen from several fields

in the vicinity of Fredericton, where a scattered spot here and there may be seen infected, and all the rest green around them.—*Fredericton Reporter*.

Pic Nic.—On Wednesday last the children belonging to the Roman Catholic Congregation in this city had a Pic Nic provided for them at the expense of their clergyman, the Rev. Mr. McEade, and the Teachers of the Sabbath School, which is said to have delighted the children, and afforded the highest satisfaction to their teachers and the numerous members of the Roman Catholic Church who took a share in the festivities of the day. The children left the city, for the opposite side of the River, about seven o'clock in the morning, and proceeded down the left bank until they came to the farm of Mr. Duffy, about two miles below the Ferry, where everything was prepared for their reception. During the day they were joined by numbers of young people of both sexes belonging to the same Church, and such of the parents as could, made it convenient to witness the fête given to the children; and we are informed that at one time there could not have been fewer than 500 men, women, and children, on the ground. The bulk of the children returned to the city about 9 o'clock in the evening, and having formed in procession at Lees Ferry, with the girls in front, they marched up Queen and Regent Streets, until they came to the Roman Catholic Chapel, which they entered, and after listening to a short address from Mr. McEade, they were dismissed with the blessing of their spiritual guide.—*Head Quarters*.

VISIT OF FATHER MATTHEW.—Intelligence has been received that Father Matthew will leave for New York in the packet ship *New World*, during the present month.

IMPORTANT DECISION.—Yesterday, Mr. Justice Day pronounced a very elaborate judgement in the case of *Cuvillier vs. Monro*.

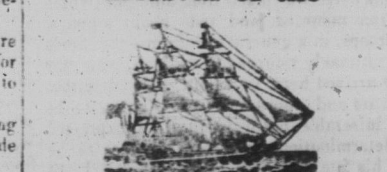

Mr. George Monro was member for the Third Riding of York in the late Provincial Parliament, and having been arrested on a visit to Montreal, at the suit of Mr. Cuvillier, moved the Court to quash the writ, on the ground that a member of parliament is privileged from arrest. The decision was against the pretensions of Mr. Monro. We shall give a fuller report, as the case is very interesting, and involves some highly important points of constitutional law.—*Herald*.

A NEW SPECIES OF POTATO.—Mr. Elwin Bryant, in his tour to California, says that he was presented by one of the Kaness Indians with a root or tuber of an oval shape, about an inch and a half in length, and an inch in diameter. This root is called the prairie potato. Its composition is farinaceous and highly nutritious, and its flavour more agreeable than that of the finest Irish potato. "I have but little doubt," adds Mr. Bryant, "if this plant were cultivated in our gardens, it would be an excellent and useful vegetable for ordinary consumption, and very probably it would be so improved as to form a substitute for the potato.—*U. S. paper*."

ST. ANDREWS, WEDNESDAY, AUG. 23, 1849

Arrival of the

Steamship Cambria.

The R. M. Steamship Cambria arrived at Halifax on Wednesday last, in 14 1/4 days from Liverpool; the English mail was received here on Saturday evening last.

The Irish news is highly important. On the

20th ulto, a collision took place between a detachment of police and a party of followers, which resulted in the death of a sergeant. In our columns we give an abridged account of the news from the Continent.

Lord Hardinge has been of the Forces in Ireland.

FATAL ACCIDENT.—We learn that on Saturday last, a young man, named Young, jr., was engaged in cutting timber at Chamcook, saw bolts of the saw became struck him in his left side, to leave him speechless. He was conveyed to his residence, but every effort was made to procure aid, but every effort was in vain. He lingered in a state of insensibility until Monday morning, when he died. He was an industrious, honest young man, and was in the twenty-eighth year of his age.

GREAT FIRE AT ALBANY.—Our Boston papers, that we have seen, state that on Friday last, by which 5 boats, 10,000 barrels of stroyed; loss estimated at \$100,000. It is also stated that grants were drowned in from the canal boats. The boats belonging to Boston were

We learn from the Boston papers that the steamer *Admiral* is expected in a few weeks, to have new
