McFARLANE'S PATENT IMPROVED GANT DOGS

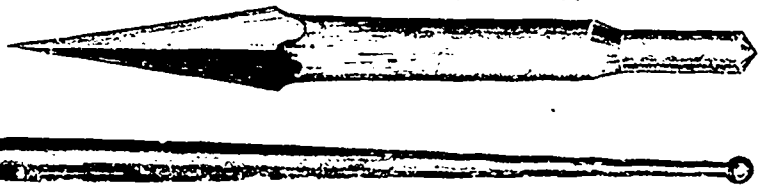

WITH FORGED SOFT STEEL SOCKET (as shown in cut).

AN ENTIRELY NEW INVENTION—the result of years of hard study and a large expenditure of money. The aim has been to make a cant dog light enough to be easily handled, yet strong enough to meet the required strain. This, I am pleased to say, has been obtained in THE BOSS GANT DOG. It is forged of the best quality of material, manufactured with the latest improved machinery, and I invite an intelligent inspection of its merits and workmanship, guaranteeing it to be all that is represented. Made in three sizes, No. 1, No. 2 and No. 3. No. 1 is 2 1/2 in., No. 2 is 2 3/4 in., and No. 3 is 2 7/8 in. diameter. Any length handle, from 2 to 6 feet, and suitable for the different grades of work, from handling the smallest to the largest logs. Manufactured only by

WALTER McFARLANE
