

Province of Nova Scotia Adopts PEDLAR'S "PERFECT" TONCAN METAL CULVERTS

The highway authorities of Nova Scotia have adopted pure iron culverts, including Pedlar's "Perfect" Toncan Metal Culverts, as the standard for all provincial highways.

This is a high tribute to the established reputation of Pedlar's "Perfect" Culverts. And the authorities in charge of Nova Scotia's highways will always have reason to feel that they have exercised the soundest judgment in making this selection. These culverts have

been giving good service to the leading railways and municipalities for a great many years.

Pedlar's "Perfect" Culverts are easily and quickly installed. They have the requisite strength to withstand all external stresses caused by live and dead loads and all internal stresses from frost and ice. The galvanized Toncan Metal from which they are made staunchly resists rust and corrosion. Experience proves they will give many years of service without maintenance cost.
