

The Republic of New Haven.

A History of Municipal Evolution.

By CHARLES H. LEVERMORE, Ph. D.

Fellow in History, 1884-85, Johns Hopkins University.

This work is a new study, from original records, of a most remarkable chapter of municipal development. Beginning with an English germ in the Parish of St. Stephen, Coleman Street, London, Dr. Levermore has traced the evolution of the Rev. John Davenport's church into a veritable commonwealth, in which the life-forces of Old England circulate anew.

The Republic of New Haven is unique and one of the most interesting of all American commonwealths. It was a city-state, self-contained, self-sufficing, like the municipal commonwealths of antiquity. It is impossible to measure the greatness of Greek cities or of the Italian republics by their extent of territory. It is equally impossible to estimate the colonial and municipal life of America by any standards of material greatness. And yet few persons realize how far-reaching in American History is the influence of a single town like New Haven. Not to speak of the intellectual forces which have gone forth from that local republic, from its vigorous church-life and from Yale College, born of the Church, New Haven, like her Mother England, is the parent of a wide-spread colonial system, not unworthy of comparison with that of Greek cities.
