

Cook's Automatic Postal Scales

Indicates instantly the Postage to be paid on
Letters, Newspapers and Parcels

NO SMALL LOOSE WEIGHTS REQUIRED

These Scales are designed to meet a need of something simple, convenient and correct for Postal Weighing.

*Their novelty consists in their **SELF-ADJUSTING WEIGHTS** and **REGISTERING DIAL**, giving instantly the weight of article and the amount of postage to be paid.*

A single indicator tells the whole story by means of four circles of accurately divided spaces, properly figured.

The exterior circle shows the weight by half ounces; the next, the postage required for Letters; the third, that for Book Post, and the inner circle indicates the cost of Parcel Post. All calculated for Canadian Postal Rates.

These scales are built for a capacity to the limit allowed to be sent through the mails, which is four pounds; but in order to offer them as low as possible to many who have no occasion to weigh over one pound, we give price (including weights) to weigh that amount only, and furnish additional weights for 15 cents per pound.

Every business office should have one, they are also a useful and ornamental addition to a private house or library.

Price (nickel-plated trimmings) \$6.00 each.
