MANAGER  
**New Williams Sewing  
Machine Co.**  
LORNVILLE, St. John, N. B.  
Machines sold and delivered on  
easy terms

### SYNOPSIS OF CANADIAN NORTH-WEST HOMESTEAD REGULATIONS

Any even-numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 1 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Application for entry must be made in person by the applicant at a Dominion Lands Agency or Sub-agency for the district in which the land is situated. Entry by proxy may, however, be made at any Agency on certain conditions by the father, mother, son, daughter, brother or sister of an intending homesteader.

DUTIES.—(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) A homesteader may, if he so desires, perform the required residence duties by living on farming land owned solely by him, not less than eighty (80) acres in extent, in the vicinity of his homestead. He may also do so by living with father or mother, on certain conditions. Joint ownership in land will not meet this requirement.

(3) A homesteader intending to perform his residence duties in accordance with the above while living with parents or on farming land owned by himself must notify the Agent for the district of such intention.

W. W. CORRY,  
Deputy of the Minister of the Interior  
N.B.—Unauthorized publication of  
this advertisement will not be paid for.

### NOTICE

I have put my boat in first class condition and installed a new engine. Will take pleasure parties out at reasonable prices.  
JAMES S. MCKAY

**Western House,**  
A. & M. J. WILSON, Proprietors.  
Favorite Hotel for winter port employees.  
Private Boarders on Reasonable Terms.  
Modern Improvements.  
Hotel for Summer Tourists; near the  
Favorite Bathing Beaches. Heated  
throughout with Hot Water, and Lighted  
by Electricity.  
RODNEY STREET,  
WEST ST. JOHN.

## PAIN

Pain in the head—pain anywhere, has its cause. Pain is congestion; pain is blood pressure—nothing else usually. At last, says Dr. Shoop, and so prove it he has created a little pink tablet. That tablet—Dr. Shoop's Headache Tablets—drives the blood pressure away from pain centers. Headache is charming, pleasantly delightful. Gently, gently, gently, it surely equalizes the blood circulation.

If you have a headache, it's blood pressure. If it's a painful period with women, same cause. If you are restless, nervous, it's blood congestion—blood pressure. That surely is a certainty for Dr. Shoop's Headache Tablets stop it in 20 minutes, and the tablets simply distribute the unnatural blood pressure.

Brush your finger and doesn't it get red, and small, and pale? Of course it does. It's congestion, blood pressure. You'll find it where pain is—ways. It's simply common sense.

We sell at 25 cents, and cheerfully recommend

**Dr. Shoop's  
Headache  
Tablets**  
"ALL DEALERS"

### Coming, the Airship

Readers of the daily papers cannot fail to note the increasing frequency of local items, despatches and articles on the balloon and the air ship. Now it is an account in a Toronto paper of a balloon race; now a despatch from Baddeck about Graham Bell's progress with his tetrahedral kites, again we have a notable flight by Wright Brothers, Count Zeppelin or some other of the many inventors working towards the conquest of the air.

The prediction is freely made that within a few years airships will be as common as automobiles or gasoline launches. We are in the period of the perfecting of a new method of locomotion. Just what the effect of the change will be it is impossible to say, but it is fraught with tremendous possibilities. It may mean the extinction of the railroad and the ocean liner, which may become as dead as the stage coach is to-day, a toy for a Vanderbilt of the 21st century are the Curtis, Wrights, Bells and the others who are the Stevensons of the air ship.

### New Provincial Health Act

Fredericton, July 31.—At a meeting of the Provincial Board of Health, held at St. John recently, a resolution was passed making the provincial regulations apply to all cities and incorporated towns. The resolution must be approved by the lieutenant governor-in-council before becoming law in this city. The regulations referred to are the same special provisions which were made to apply to St. John and Moncton at the time of their enactment and which among other things give the local board of health power to appoint sewerage and plumbing inspectors and to make it compulsory for any property in the city to be connected with the sewerage system. Some time ago the regulations were made to apply to the town of Campbellton and several weeks ago the local board made application to have the regulations come into force in Fredericton. The provincial board has also determined that it is time to have another public health act for the province. The present act has been in force since 1889 and is inconsistent in parts as well as being far from up-to-date. The acts of Ontario, Manitoba and other provinces and recommendations from the local boards of health will be used to make up a new act, which is hoped to have enacted at the next session of the legislature.

of job work

### A GREAT EXHIBITION FEATURE

**Machinery Hall In the St. John  
Exhibition to be Part of the  
Big Show**

The big boilers in the Machinery Hall of the Exhibition building in St. John were tested the other day and found in first class condition. Now that they are sure of plenty of power the applications to show machinery in motion are becoming a feature of the big show.

There is nothing more interesting in an exhibition than a well stocked Machinery Hall, such as St. John will have.

Some splendid amusement features have already been booked, the railways and steamboats are making rates that will induce most every one to visit St. John Exhibition week, and there the people are making all sorts of plans to make their stay pleasant.

These include just now a decorated city—a competition in decorations having developed within the last week. Remember the date, September 12th to 19th.

### An Albert County Poet

An Albert county boy has composed the following poem, which is a rather creditable production for a youth still in his teens:

In sailing o'er the sea of life, my brother  
do not think,  
If you should leave the progress craft,  
and go to wreck and sink,  
Don't feel that you possess the earth,  
and all that in it lies,  
And hold a chattel mortgage on the  
planets in the skies.  
You are but a tiny, single drop of water  
in the sea  
Of all the great and active tide of humanity,  
And you should always bear in mind the  
smallness of your might,  
The earth will spin out just the same  
when you drop out of sight.

Though you be rich in gold and lands  
and bear an honored name,  
Though as a star you glitter in the firmament of fame,  
Remember that the humblest man you  
scornfully pass by  
Will stand your equal at the bar of  
justice up on high.  
And when by hand of fate, the seals of  
that Great Book are riven,  
The man of toil may be a prince, the  
king shut out of heaven,  
And you should always bear in mind the  
smallness of your might,  
The earth will never feel a jolt when  
you drop out of sight.

Though you may think yourself above  
the honest working man,  
And look on him as dross, while you're  
a nugget in the pan;  
The proudest monarch of the earth will  
some day take his stand  
As humble as the lowest slave that  
breathes ever fanned.  
Now just consider what you are; don't  
for a moment think  
That in the endless chain of life you are  
a leading link;  
But you should always bear in mind the  
smallness of your might,  
The earth will never split a clog when  
you drop out of sight.

### Weak Women

#### Read Below

One woman in three is struggling against weakness.

Are you one of the weak ones?  
Not exactly sick, but oh, how miserable!

You discharge your daily duties, but who can measure the burden, the trial? Talk of bravery, where find a finer spirit than among half-sick women, fighting, struggling to do their duty against terrible odds—and they never give up until they drop.

If you could put a drop of blood under the microscope the cause would be revealed.

You would find the blood thin and watery, red cells far too few, the carrier of life very greatly reduced in vitality, and this means slow death.

Ferrozone cures weakness by fortifying both appetite and digestion, and making plenty of blood.

Ferrozone cures weakness by supplying nutriment and building material, by giving the body the constituents it requires for restoring tired organs.

It gives vim, vigor and endurance.

Ferrozone is a tissue builder.

It adds force to all the vital functions—the stomach, liver, kidneys.

Ferrozone gives sound sleep, sound digestion, promotes perfect removal of all the body wastes.

Ferrozone makes the body glow with health.

Any weak, pale or sickly woman that Ferrozone won't cure—why she must be hopeless. Wonderful power in Ferrozone, wonderful cures it makes, and this you can prove by trying it. Sold everywhere in 50c. boxes.

### Gleanings About

#### Canada's Fisheries

Government reports, crammed as many of them are with tables of statistics, are apt to be dry reading. But, if you persevere, you can easily find something to interest you even in a government report. Some times, as the TRIBUNE once showed by reference to the report of the Postmaster General of the Dominion, you will even find amusing things in those blue books despite their uninviting appearance. The Fisheries report just issued does not provide much in the way of amusement but it certainly has some interesting facts tucked away between its covers. The worst feature of these reports, by the way, is that very system of "tucking" things away. This Fisheries report tells us, among other things, that the fisheries of Canada are the most extensive in the world. Do you know that the eastern sea coast of the Maritime Provinces from the Bay of Fundy to the Straits of Bellefleur covers a distance of 5,600 miles, which is more than double that of Great Britain and Ireland while salt water in shore areas covers more than 1,500 square miles? These figures, of course do not include the area of the lakes in Manitoba and other parts of the west. And do you know that the total expenditure on account of the various services in connection with the fisheries of the Dominion for the fiscal period ending last March was over \$600,000? Do you know that during the season of 1906 the deep sea fishermen of the Maritime Provinces received over \$159,000 in bounties on their catches that of this sum Nova Scotia received nearly double the total amount received by Quebec, New Brunswick and Prince Edward Island put together; that since the inception of the bounty system in 1882 nearly \$4,000,000 has been paid by the Dominion to the fishermen of these four provinces to aid them in developing their fisheries; that in New Brunswick Prince Edward Island and Quebec the value of the catches in 1906 was greater than in 1905, the banner year in the history of Canadian fisheries; that the value of the salmon catch in 1906 was over \$5,800,000, of the cod catch \$3,471,186, of the lobster catch \$3,422,927, of the herring \$2,704,596, of mackerel \$1,369,728, while among the other fish even the despised eels that were caught were worth over \$128,000—did you know these things about Canada's fisheries? During the season the value of the bait alone was over half a million and the fur seal skins secured by British Columbia hunters were worth \$316,224. There are many other points that might be culled from the report but enough have been given to show that after all a government report isn't all as dry as dust.

Now just consider what you are; don't for a moment think  
That in the endless chain of life you are  
a leading link;  
But you should always bear in mind the  
smallness of your might,  
The earth will never split a clog when  
you drop out of sight.

Engineers and Machinists. Iron and Brass Moulders

Makers of Saw Mill Machinery and Engines

Shafting Pulleys and Gears. Stone Cutting and Polishing Machinery

Bridge Castings and Bolt Work

SPECIAL ATTENTION GIVEN TO REPAIRS

### HAVE YOU MADE A MISTAKE

We all make them occasionally and when we discover our mistakes the best thing we can do is to correct them with as little delay as possible. Many honest people have been induced to buy inferior cream separators because of false statements made by the manufacturers and their agents. Others have bought cheaply constructed machines for which great claims are made and which are advertised as being sold at a great reduction in price by mail order houses and others who have no reputation to sustain, and information regarding our exchange who have no interest in the separators proposition.
