RELIABILITY AND ECONOMY

The heating and cooking appliances designed and manufactured by the Canadian General Electric Company mark a new epoch in domestic science in that they employ electricity to generate heat with absolute reliability and (when properly used) with excellent economy. They are SAFE even in the hands of the unskillful, and are practically INDESTRUCTIBLE.

Serviceability has been a SINE QUA NON in the design of these appliances, and they may be expected to withstand about the same treatment that ordinary household utensils receive. They will not "burn out" when the current is thoughtlessly left "on," although such practise is, of course, not recommended. The dishes are made without solder, and the heating unit has remarkably LONG LIFE.
