Waterman's Ideal Fountain Pen

GOLD pens of all styles and actions can be furnished in every Waterman's Ideal to suit the handwriting of the user, fine, medium, coarse, stub, turned-up points, and may be exchanged, to suit, after Christmas. All pens are tipped with selected iridium, the hardest mineral known, to insure many years of use, without change. Waterman's Ideals excel in workmanship and materials used. The precision in construction makes these pens strong and tight. The patented Spoon Feed is the important feature that accurately controls the supply of ink. Every pen bearing the name "Waterman's Ideal" is absolutely guaranteed everywhere. Perfect utility for home, business, and social writing; an end to inky fingers and scratchy penmanship.

Illustrated Booklet on Request.

In Attractive Xmas Boxes.

Avoid Substitutes.
