There's more than meets the eye

That's why SWAZEY'S uses the DIAMOND - MICROSCOPE to help set the proper value on diamonds before they're offered for sale. This DIAMOND - MICROSCOPE is the newest, most modern and best in the world. It is the only one in Eastern Canada. This scientific three-dimensional magnifier explores the heart of a diamond, reveals the secret of true diamond value. SWAZEY'S have purchased this expensive instrument, and many other scientific instruments for YOUR benefit and PROTECTION. A diamonds beauty is scientific. . . BEFORE BUYING A DIAMOND ANYWHERE, you should ask to see it through the DIAMOND - MICROSCOPE. After observing a diamond through this instrument, you should ask the following QUESTIONS: Ask exact color grade, Cutting proportion grade i.e. angles, thick, spread or ideal cutting, exact clarity grade and finally the last and least important, is the exact carat weight or size. Our DIAMOND - MICROSCOPE reveals all this information for YOU, except color and weight. For color we have American Gem Society "master graded" diamonds to accurately check this factor, and carat weight is checked by our sensitive and delicate diamond balance. . . Our diamond selling is scientific, WITH ALL GUESS WORK ELIMINATED. For more information, and answers to your diamond purchasing questions, visit our store.
