

Better Than A Windmill For Pumping

A Windmill only pumps water when it pleases the WIND to blow. The Renfrew Standard pumps water whenever it pleases YOU to have it pumped.

Renfrew Standard
It starts without cranking

A Windmill costs a good deal of money, while a pump jack attachment for a Renfrew Standard engine costs only a few dollars.

Pumping water is only one of the many uses to which the Renfrew Standard gasoline engine may be put on the farm. Our booklet and circulars show many other ways in which you may use this engine to advantage.

The Renfrew Standard is the most talked about, and the most favorably known, gasoline engine in Canada today. The very fact that it starts without cranking in all kinds of weather would be cause enough to bring about widespread discussion. But there are other reasons, too, for making people talk. There is, for instance, the remarkable simplicity of construction. So simple, a young boy can understand and run the Renfrew Standard. Has no pipes or fittings to leak or freeze, no cooling pumps or fans to get out of order.

Then there is the governor of the fly-ball (steam engine) type that allows speed of engine to be varied at will, without stopping the engine. And a carburetor of wonderful simplicity. And valves so arranged that the gases explode as perfectly as a cartridge in a shotgun. Other features, too, which are fully described in our booklet. Write for a copy.

This Outfit Was Made for You

THERE was a time when all farmers hitched up every other morning—part of the year every morning—and took their milk to the creamery. Today many of them use cream separators, because they find more advantages, fewer difficulties, and much profit in the modern way.

Do you still plod the uncertain creamery route, or have you the efficient little team shown above at work for you? This outfit, an

I H C Cream Separator Dairymaid, Bluebell, or Lily

and a one-horse power back-gear I H C engine, will save you, in cream, from five to fifteen dollars per year on every cow milked, separate your milk and cream cleanly and thoroughly, and give you clean, fresh, warm skim milk to feed that will build up fat, healthy pigs and calves. I H C separators are the best separator bargains you can buy, because they will do better work and last longer than others.

Then the engine half of the team is always ready to pump water for you, run the grindstone, washing machine, sausage grinder, churn, and other machines. It is economical, sturdy, steady and reliable.

The I H C local agent will show you the outfits. Write for catalogues and full information to the

CLEARING AUCTION SALE OF 47 HEAD OF REGISTERED HOLSTEIN-FRIESIAN CATTLE

AT
Hillview Farm, Komoka, Ont.

(10 miles West of London on C.P. and G.T. Railways. C.P.R. Stn. on Farm;
G.T.R., 1 mile.)

On WEDNESDAY, OCTOBER 22nd, 1913

At 1 o'clock Sharp, Storm or Fine.

This comprises one of the best herds of dairy cattle in Western Ontario. The twenty-one cows in milk are a grand lot of producers, including a number of specially promising two-year-olds. Five calf-yearlings are a feature of the offering and nineteen calves, eleven heifers and eight bulls are second to none, big fashionably bred and showing high individual merit. All these cattle, over one year old, were subjected to the tuberculin test in May and not a single animal reacted. Catalogue on application to D. Campbell, Prop., Komoka, Ont. O.P.R. noon trains going both ways will stop at Komoka on day of sale.
