

Farm Prosperity is Directly Dependent on Good Roads

The only kind of road surface that will not be torn by either fast moving vehicles or heavy slowly-driven trucks are those known as Permanent Highways of Concrete.

Concrete is just as important a factor in improving Road conditions as it is in bettering a farm. It makes a Road as durable and satisfactory as your Concrete Silo, Concrete Tank or Concrete Barn Foundation.

The Greatest Help a Farmer Ever Had

This is the book that over 100,000 Canadian farmers are now using as a text-book for the improving of their farms. In it you will find 100 pages of valuable advice—each page devoted to some one money-saving improvement that you can make yourself quite easily of **CONCRETE**

Tells how to build a Silo, a root cellar, a water-trough, a culvert, a retaining wall, or a gate post. Explains why it is better to build these (and numerous other farm utilities) of concrete, than of any other known material. Gives simple yet complete directions. All the buildings and small jobs the farmer needs to build can be constructed of concrete, which is nothing more nor less than a combination of cement, sand, pebbles or crushed stone—all staple products easily and cheaply obtainable.

Consider these important advantages of Concrete: fireproof; water-tight; durable, vermin-proof; sanitary; weatherproof; rigid; rapidly built; no repairs; no painting.

CULTIVATE For Greater Production

The better the cultivation, the better the growth.

Men right around you found the benefit of first-class cultivation last year. In the construction of the Peter Hamilton Cultivator, every need has been considered and every requirement provided for. The different groups of three rows of teeth are subdivided again, and the front teeth are attached to one tooth-frame, back row to another. All teeth cultivate to an even depth and thoroughly work up every inch of ground. The

PETER HAMILTON Cultivator

is a light draft implement, in spite of its superior strength. Teeth are strongly reinforced and will stand all the hard work they will get. Sections are made from extra heavy steel. See the Peter Hamilton Cultivator before buying.
