Ideal Green Feed Silos "last a life time"— Why?

BECAUSE nothing but sound lumber of
a kind which long experience has shown
to be best suited for the purpose is used
in their construction.

BECAUSE the staves are carefully
tongued, grooved, bevelled and splined—
all painstakingly finished with machinery
especially designed for the purpose.

BECAUSE the staves are held together
by extra heavy iron hoops, so as to be able to withstand the
tremendous pressure at the time of filling and fermentation
and to resist the ravages of the weather at all times.

BECAUSE the doors and staves are treated with specially
prepared wood preservative, which insures maximum life.

BECAUSE, in fact, the Ideal Green Feed Silo represents
the best of silo building knowledge in detail, embodying right
design, specially selected materials, skillful workmanship and
the benefit of long experience in silo manufacture.

Thousands of Canadian farmers "swear by" the Ideal.

And so will you when you have installed one.

Write today to our nearest sales headquarters for our
silo catalogue, which contains much valuable information
about silos and silage.

THE DE LAVAL COMPANY, Ltd.

LARGEST MANUFACTURERS OF DAIRY SUPPLIES IN CANADA.
Sole manufacturers in Canada of the famous De Laval Cream Separators
and Ideal Green Feed Silos. Alpha Gas Engines, Alpha Churns and
Butterworkers. Catalogues of any of our lines mailed upon request.

GONE! THE OLD STYLE PAIL

Yes, they're gone! Sad wrecks, aren't they?—
fit only for the junk pile or the dismal places
where the rubbish is shot.

Familiar objects, these, in the days when the coopered
or metal pail was in common use. But those days are
passing. With the growing use of

EDDY'S INDURATED FIBREWARE HOUSEHOLD PAIRS

such losses are reduced to a minimum. Wood pulp, shaped by tre-
mendous hydraulic pressure and baked with intense heat, pro-
duces the most durable and economical container for liquids and
semi-solids. Eddy's wash-tubs, milk pails, butter tubs, etc., not
only outlast the old-fashioned articles of metal or woodenware,
but actually cost less money. Your dealer has them.

You Get More Work With a Cleveland

Buy a tractor that will do more than plow.

Buy a tractor—for faster, less-man-power, less-
horse-power, more profitable farming.

But buy a tractor that will—disc, harrow, seed.

Without spoiling the seed-bed.

Buy the Cleveland Tractor.

Lays its own track as it
travels. Pressure only 5 pounds
to the square inch. Less than
a man walking. Can't pack the
plowed ground. Can't wallow
in soft ground. Will work over
rough ground, hilly ground,
gullies. And uses less fuel do-
ing this because it rides on top
without slippage.

And will harvest, thresh,
haul loads, cut feed and en-
silage, operate machinery—
work more days in the year.

The Cleveland Tractor is the
product of a giant organization
embracing engineering genius
and manufacturing facilities of
the highest type. That is why
the Cleveland operates success-
fully on kerosene (coal oil), uses
no more kerosene than other
tractors use gasoline. That is

why the Cleveland stands up
to its work day in and day out,
year after year. That is why
the Cleveland is an investment,
not an expense.

Most farmers plow 10 acres a
day with a Cleveland—saves 9
horses and 2 men.

Use double discs, two 60-
tooth harrows, and heavy wood-
en drag for fitting—40 acres a
day.

And every month in the year
these Cleveland owners have
their tractor at work.

Of course it pays for itself.
Your nearest Cleveland dealer
can show you how. Write to
him or to us for our booklet,
"Our Owners Say," giving ac-
tual experiences with Cleveland
Tractors.

R. R. 5—BELLEVILLE, ONT.

THE CLEVELAND TRACTOR CO. OF CANADA, LIMITED
WINDSOR, ONTARIO.

Gentlemen—

I have been operating my Cleveland Tractor for over three months,
doing all my Fall plowing, discing, cultivating, etc., using three
15" bottom plows, with excellent results, on clay land which is more or
less stony.

I have had it operating a 18" Gilson ensilage cutter on a 36-foot silo
with like results, and was surprised at the simplicity in lining up this little
machine for belt work—I used no bracing.

Before purchasing, I attended the Cobourg demonstration, where I
carefully looked over all tractors on the grounds, and finally decided on
the Cleveland on quality of construction, simplicity and principle.

And, Brother Farmer, I am at your service any time you care to come
to my farm and see this little boss doing the work quicker and better than
it has ever been done before.

(Signed) John M. Boyd.
