

A Remarkable Invention FOR THE CULTURE OF HAIR.

THE EVANS VACUUM CAP is a practical invention constructed on scientific and hygienic principles, by the simple means of which a free and normal circulation is restored throughout the scalp. The minute blood vessels are gently stimulated to activity, thus allowing the food supply which can only be derived from the blood, to be carried to the hair roots, the effects of which are quickly seen in a healthy, vigorous growth of hair. There is no rubbing, and as no drugs or chemicals of whatsoever kind are employed, there is nothing to cause irritation. It is only necessary to wear the Cap three or four minutes daily.

60 DAYS' FREE TRIAL! The Company's Guarantee.

An **EVANS VACUUM CAP** will be sent you for sixty days' free trial. If you do not see a gradual development of a new growth of hair, and are not convinced that the Cap will completely restore your hair, you are at liberty to return the Cap, with no expense whatever to yourself. It is requested, as an evidence of good faith, that the price of the Cap be deposited with the **Chancery Lane Safe Deposit Company of London**, the largest financial and business institution of the kind in the world, who will issue a receipt guaranteeing that the money will be returned in full, on demand, without questions or comment, at any time during the trial period.

The eminent **Dr. I. N. LOVE**, in his address to the Medical Board on the subject of Alopecia (loss of hair) stated that if a means could be devised to bring nutrition to the hair follicles (hair roots), without resorting to any irritating process, the problem of hair growth would be solved. Later on, when the **EVANS VACUUM CAP** was submitted to him for inspection, he remarked that the Cap would fulfill and confirm in practice the observations he had previously made before the Medical Board.

Dr. W. MOORE, referring to the invention, says that the principle upon which the **Evans Vacuum Cap** is founded is absolutely correct and indisputable.

An illustrated and descriptive book of the **Evans Vacuum Cap** will be sent, post free, on application.

THE SECRETARY, EVANS VACUUM CAP CO., LTD.,
REGENT HOUSE, Regent St., London, Eng.

AYRSHIRES AND YORKSHIRES

We offer several young calves of either sex, of choice dairy breeding, a few young cows and heifers in calf. We are importing several head of both sexes from Scotland. Our John Reeson has already selected 1st and 2nd winners of "The Derby," 1906, and 1st and 2nd in the Official Milk Record by Highland and Ayr Society, 1906. He is bringing out young stock of the same stamp and breeding, which will be for sale. Write us if you want something right at a reasonable price. Young boars fit for service. Young sows just bred. Feb. and April pigs for sale.

ALEX. HUME & CO., MENIE, ONT.
Long distance 'phone (Campbellford).

Imported direct. Price: Imperial pints, 50c; Imperial half gallon, \$1.35; Imperial gallon, \$2.50. Sold by druggists, or charges prepaid on order from **THE WORTHINGTON DRUG CO., Toronto, Ontario.**

QUESTIONS AND ANSWERS. Miscellaneous.

WALL-EYED COLT.

Clydesdale mare foaled a colt with white all around the eyeball, just as natural as the other. She was bred to a general-purpose horse. Can you give a reason or cause? Would it make any difference in the value of colt? J. C.

Ans.—This is called a wall-eye; the cause is unknown. It is not considered a defect or disqualification, as it does not affect the usefulness of the animal. The color of the eye is due to the iris or curtain located in front of the crystalline lens. In most horses it is of a brownish-yellow tint; in others white or gray. When the latter color the horse is said to be wall-eyed.

REGISTERING A BULL.

A had a credit auction sale; B put a bull in the sale, Shorthorn, eligible for registration; C bought bull, did not ask B anything about who would pay the registration fee; now C wants to make B pay the fee. Who should pay it?

SUBSCRIBER.

Ans.—There being no agreement or promise in the case it would appear that unless B is willing to bear the expense of registration C will have to pay the fee if he decides to register the bull, but B should sign the application for registration as the breeder of the animal and should also sign a transfer certificate if required.

GYPSUM ON RUN-OUT MEADOW.

I have a field which has been in hay too long, but on account of wages being so high I cannot afford to plow it. The land is in good order, but hay is run out. Was thinking of sowing land plaster and running light harrow over it. How much plaster should be applied to the acre? J. W. C.

Nipissing District.

Ans.—We fancy our friend will wait a good while before he sees wages much lower, and it seems to us the field had better be plowed now. As for fertilizing with land plaster, this may give profitable results on the soils of Nipissing District, Ont., but it should be borne in mind that land plaster is not in itself a fertilizer of any particular value. It merely has an effect in rendering available fertility already in the soil. In this respect it is unlike wood ashes, which contain in themselves large quantities of potash, together with some lime and phosphoric acid. As a rule gypsum gives best results on clover and turnips. On virgin soils it is said the effect of land plaster on clover is often marked. Very small quantities are sufficient. Roberts writes about applications of one or two bushels per acre. Two or three hundred pounds would be about the limit.

GROWING ONION SETS.

I have five acres of land I am thinking of growing Dutch sets onions on. Can you tell me the best commercial fertilizer to use; also, what strain of seed is best suited for growing same? If you wish, I can forward you a sample of the land. If this would be better, let me know what quantity to send. Awaiting your early reply. C. W. E.

Ans.—Unless you have had some experience in growing Dutch sets onions, you are running considerable risk in growing five acres at the start. This is a business which has to be managed carefully, and as sixty pounds of seed are usually sown per acre for sets, you will see that it will soon mean quite an outlay, even for seed alone. With regard to the kinds usually grown for sets, I may say that both the white and yellow varieties are used. At present the white varieties appear to be in most demand. The variety of white onion usually grown is the White Portugal, although this is not such a long-keeping onion as some of the yellow varieties. Of the yellow kinds, the Yellow Danvers is the variety principally grown.

With regard to commercial fertilizers, I cannot do better than refer you to the Ontario Agricultural College Bulletin 153, in which you will note that the statement is made that "Every farmer, gardener and orchardist must settle for himself by experiment just what his soil is most in need of in the way of commercial fertilizers, and to what extent it will pay him to use them." H. L. HUTT.

ECZEMA AGAIN OVERCOME

ZAM-BUK CURES A CASE WHICH FOR TWO YEARS HAD DEFIED EVERY REMEDY TRIED.

A Farmer's Grateful Testimony.

No case of eczema, skin disease, or ulceration, should be despaired of until Zam-Buk has been applied. The case of Mr. Francis Penoit, of St. Anne's, Man., is a powerful illustration of Zam-Buk's efficacy. He says: "I suffered from eczema for two years, and tried a great number of remedies. None of them, however, seemed to do me any good. The ailment was mostly in my legs, and both these were actually raw from the knees down. A small sample box of Zam-Buk was given to me, and even so small a quantity as that did me a little good. I then obtained a proper supply, and by the time I had used a few boxes I was completely cured."

Zam-Buk differs from ordinary salves and embrocations in containing no animal oil or fat. It is compounded from rich, healing, herbal essences, and is an ideal natural combination of power and purity. It is highly antiseptic, and instantly kills bacilli and disease germs, which settling on to wounds and skin diseases set up festering, blood poison, etc. For cuts, burns, bruises, ulcers, abscesses, pimples, boils, skin eruptions, scalp sores, spreading sores, children's skin troubles, chafing sores, etc., Zam-Buk is unequalled. It also cures piles. All druggists and stores at 50c. a box, or from Zam-Buk Co., Toronto, for price; 6 boxes for \$2.50.

250,000,000
Sheep Every Year
Dipped in

COOPER DIP

Has no equal. One dipping kills ticks, lice and mites. Increases quantity and quality of wool. Improves appearance and condition of flock. If dealer can't supply you, send \$1.75 for \$2.00 (100 gallons) packet to **National Drug and Chemical Co., Limited, Toronto and Montreal.**

Fairview Shropshires

Orders can now be booked for sheering rams and sheering ewes, for ram lambs and ewe lambs, fitted for showing or for condition. Don't forget that this flock has produced more winners than any other flock in all America, and stock sold are producers of win ers.
