THE BEST FARM LUBRICANTS

Proved best by years of use.

PRAIRIE Harvester Oil

The most durable oil for farm machinery. Unaffected by changes in temperature. Will not gum or corrode. Reduces friction to a minimum. A splendid lubricant.

STANDARD Gas Engine Oil

Meets all requirements for a cylinder oil for gasoline and kerosene engines. Lubricates properly under all conditions; practically free from carbon. Equally good on external bearings.

Recommended by the leading engineers and engine builders.

Eldorado Castor Oil
Thresher Hard Oil
Arctic Cup Grease

SERVICE AT LOW COST

is the explanation in a nutshell.
All users of

"LONDON ENGINES"

say so. Who is a better judge than yourself, at your own work? Let one prove it to you. It is "your right" and "our pleasure."

All the advantages of both water-cooled and air-cooled.

Vertical non-freeze sizes, 1½, 2½, 3½ and 4½ h.p.

Horizontal single cylinder and double opposed, 10 to 50 h.p., and all kinds of outfits.

SAW 10 LOGS WITH AN AMERICAN SAW MILL

AND GET LUMBER WORTH \$25 TO \$40

Ten 16 foot logs averaging 14 inches thick make 1000 feet of lumber worth \$25 to \$40 in the local market. Costs you only \$4 to \$5 to saw them with an "American" Portable Saw Mill. Think of the profits! Why, that lumber on your woodlot is just like wheat. Reap it with an "American" Portable Saw Mill you can own it yourself. No experience needed. An 8 H.P. gas engine and an "American" mill saws up to 2500 feet per day. Get an "American" because it saws more and better lumber with less help and power than any other. Stake big money every winter when the farm doesn't need you. Hundreds of farmers are doing a paying lumbering business with "American" mills. You can do the same, for there are wood lots around you if you have none yours. If, for instance, you write from farmers to our free Book No. 32 that tells all about farm lumbering.

"Literally a Sheet of Flexible Stone"

Perfect Protection for All Buildings— in All Climates—Under All Conditions

The hottest weather can not cause J-M Asbestos Roofing to dry out or melt. The coldest weather can not crack it. Gases, chemical fumes or salt air can not injure it. And it gives perfect protection against fire.

In a word, being mineral through and through, it is practically indestructible. There isn't a particle of perishable material in

J-M ASBESTOS ROOFING

It is composed of Asbestos and Trinidad Lake Asphalt. Asbestos is a rock, and therefore everlasting. And Trinidad Lake Asphalt has withstood the terrific duties of street paving for over forty years.

J-M Asbestos Roofing is lower in first cost than shingles, tin or slate—and cheaper than all other roofings when cost-per-year is considered. Tin, iron and most prepared roofings have to be coated or graveled every few years. As J-M Asbestos Roofing contains nothing to rot, rust or otherwise deteriorate, it never needs a single cent's worth of coating or other protection. Its first cost is the only cost.

Comes in rolls and flat sheets, easy to lay. Also furnished in built up form. J-M Roofing Cleats, packed in each roll, make absolutely water-tight laps, and give the entire roof an unbroken, handsome white surface. Sold direct if your dealer can't supply you. Write today for sample of the curious Asbestos Rock and Book No. 374

INTERNATIONAL Harvester manure spreaders have a score of good features in their construction. Each one is the result of careful field experiment.

An I H C spreader is low enough for easy loading, yet it has plenty of clearance underneath. The rear axle is well under the load, rear wheels have wide rims and Z-shaped lugs, insuring good traction under all conditions. Frame, wheels, and all driving parts are of steel. Apron tension is adjusted by a simple device. Winding of the beater is prevented by large diameter, and beater teeth are strong, square and chisel-pointed.

International manure spreaders are built in several styles and sizes, low or high, endless or return apron, for small farms or large. Examination will show sturdiness of construction in every detail. Repairs, if ever needed, may always be had of the local dealer.

Examine International spreaders at the dealer's. We will tell you who sells them, and we will send you interesting catalogues.
