

NEW MACMILLAN BOOKS IN DOMESTIC SCIENCE

ELEMENTS OF THE THEORY AND PRACTICE OF COOKERY.

By Mary E. Williams and Katherine B. Fisher - - - \$1.00
381 pages—Illustrated—Revised.

A practical text-book of Domestic Science for use in Schools. Completely revised and enlarged, many new chapters having been added, and all the subject matter brought up to date and adapted for use in both rural and city schools in all parts of the country.

The text on Food in Relation to Life, the Preservation of Food, Food for Babies, and Digestion has been largely rewritten. Two new chapters have been added, one on the Serving of Food, and one on Laundering. Every other chapter includes new matter which embodies the results either of scientific progress or of practical experience.

FOOD AND HEALTH.

By Helen Kinne and Annie Cooley. Well Illustrated - - - .65

In our new series in **Home Making for Elementary Schools**. The lessons centre about the problem of the simple home meal, its Preparation and Serving, as well as the preparing of the School Luncheon. A most helpful book for those living out of large cities.

CLOTHING AND HEALTH.

By Helen Kinne and Annie Cooley. Fully Illustrated. - - - .65

This volume like its companion "Food and Health", is intended for use in Elementary Schools. It teaches the school girl to be self-reliant, economical in buying and making clothing, and to consider the important relations of clothing to health. Practical lessons are given on Sewing, useful and decorative, Drafting Patterns, the use of Commercial Patterns, Operating a Sewing Machine, etc.

Send for sample copies of Outline Studies to accompany the study and
teaching of the Pocket Classics Series.
