

McLAUGHLIN CARRIAGE
COMPANY, LIMITED

No. 273½. "Roseland" Trap

(Second View)

Most sleighs of this class are too heavy and too long on the runner for a one-horse job. In introducing this design, we have produced a sleigh which is at once handsome in outline, comfortably proportioned, and light enough for one horse; workmanship, material and finish the best; rear seat reversible. (See first view, page 5.) Side panels of body are plain for 1913.

Painting—A handsome combination of green and black, or bike red and black.

Trimming—High grade cloth; spring cushions; velvet carpets; driver's box; part brass finished body rails and line rail; shafts full leathered. Supplied regularly with shifting shafts.

Telegraph Code: *Abitiso*.
