**General News
Of The World**

**Culled From Many Sources
For Readers of The Mail
and Advocate**

Toronto's directory man gives it a population of 534,322. In truth, it is a Might-y estimate.

In a test vote conducted by a Paris newspaper, 505,972 women declared they wished to vote, and 114 that they did not.

In a British arsenal there has been installed a scale that will weigh guns up to 100 tons with a possible error of less than seven pounds.

Explorations within recent years have indicated that China has coal fields containing more fuel than all the rest of the world combined.

According to the Hon. Seton Robert Beresford, 55,000 horses have been shipped to France from the United States since outbreak of war.

With exactly eleven "hates" in a verse of eight lines, that German Hymn of Hate is easily the most hateful poem ever composed.

The apple crop of 1914 is probably the largest ever produced in the United States, being estimated at 259,000,000 bushels, as compared with 145,000,000 bushels in 1913, about 235,000,000 bushels in 1912, 214,000,000 bushels in 1911, 142,000,000 in 1910, and 146,000,000 in 1909, as reported by the census.

Those who hope to breed a Dove of Peace big enough to dominate the world should not lose courage because of the present setback. All that is needed is persistence. It is related that the natives of the island of Shikoku, Japan, after a hundred years of patient effort, have succeeded in breeding roosters with tail feathers eighteen feet long.—Providence Journal.

A correspondent asks us the meaning of "Von" in German. We endeavoured to master the mysteries of the German language for a period of six months but there was something wrong either with our head or tongue and we gave it up. We got however as far as Von. Literally it means "of" and is a title of nobility in Germany, never being used by any one less than a baron. We are rather pleased that we are able to display our knowledge on this subject, but hope that no more "German" questions will be handed in to us.

**News Items
From Many Sources**

Montreal, Feb. 12.—Completely smothering their opponents with speed and piling up a lead in the first quarter that was almost impossible to overcome the Wanderers won from Ottawa at the Arena last night by 3 goals to 1.

The Hague, Feb. 8.—(via London) —Additional disorders are reported from Prague where the arrest of Czech students and journalists is said to have irritated the population. Five attempts to kill prominent politicians in Bohemia with dynamite bombs are reported to have been made since February 1.

President James E. Gaffney, of the Boston Braves, is much worried over the condition of Captain Johnny Evers and the player's ability to be able to start the coming season with the world's champions. Because of the report that Evers may not recover from the attack of pneumonia which laid him low in New York last December, in time to renew the battle of 1915, the Braves' owner is taking every possible precaution to strengthen his team.

Imports of foodstuffs, raw materials, and other commodities at Liverpool continue on an unprecedented scale, and the congestion which was already acute has been accentuated by the arrival of twenty-one more cargo vessels from various ports of the world.

Shipping, dock, and railway interests in turn assert they are doing their best to relieve the situation and clear the cargoes as rapidly as possible. With several ports in the United Kingdom closed to ordinary traffic, the bulk of the overseas trade is now coming to Liverpool. A suggestion is made that the Government would relieve the situation somewhat by expediting the clearance of prize cargoes and shipments of sugar and nitrate arriving to their orders, as the latter are said to have priority over others.

Some vessels are said to have been lying in the river a fortnight waiting to be unloaded.

BOLINDER'S

DIRECT REVERSIBLE CRUDE OIL ENGINES.

First in 1893 Foremost in 1914
Built in sizes from 5 B.H.P. up to 320 B.H.P.

Nearly 100 vessels fitted with Bolinder's Engines for towage in the British Isles, the object of Messrs. Bolinder's design being for large Propellers at low revolutions and consequent efficiency. As an example mention might be made of the "MIRI" (160 B.H.P.) which tows regularly at Sea a 1500 Ton Tank Barge.

The Bolinder will run light indefinitely without any load whatever, and without any recourse to the Blow-lamps.

The Bolinder will run at any load down to a speed which only enables the engine to just turn over, this manoeuvring is carried out by a special device which entirely does away with the necessity for the Blow-lamps.

Bolinder Engines reverse in under 3 seconds—according to the power of the engine—and what is more reverse without a failure and without a strain on the crankshaft.
