Too late for publication yesterday, a brief synopsis of the following very important orders just received from Ottawa by Mr. J. Laglois Bell, assistant gold commissioner for this district, was given. Here are the orders in full: Privy Council of Canada. Order 2117. Extract from a report of a committee of the honorable the privy council, approved by his excellency on the 4th September, 1900.

On a memorandum dated 27th August, 1900, from the minister of the interior, stating that by an order in council, dated the 5th of September, 1889, the action taken by the minister of the interior in instructing the commissioner of the Yukon territory to reserve from entry until further notice the hill and bench claims on Bonanza and Eldorado creesk which were not entered for at the date upon which the instructions were received by him, was approved.

The minister is of the opinion that the time has now come for throwing open to entry the claims to which reference is made in the above mentioned order in council.

The minister therefore recommends that the order in council of the 5th of September, 1899, above referred to, be not acted upon hereafter.

The committee submit the same for your excellency's approval.

JOHN J. M'GEE, Clerk of the Privy Council.

The Honorable the Minister of the Interior:

I hereby certify that the above order in council comes into force upon the 9th day of October, 1900.

### Will They Make It?

In Dawson at present are several of the most uneasy men the city has ever contained, the cause of the uneasiness being that their individual wives are supposed to be somewhere between Seattle and this place, but headed this way, the question of concern being Will they make it or will they be delayed because of low water and caught in the ice? None of the C. D. Co.s' steamers will make another round trip and it is extremely doubtful if the smaller boats will succeed in doing so. The small streams and feeders all being frozen or frozen so as to greatly reduce the volume of water which they have been pouring into the Yukon or its tributaries, the water in the 'steamer channel has fallen very rapidly lately, so much so that navigation is now a matter of difficulty and cousiderable
