W. C. T. U.

Extracts from the Report of the World's W.C.T.U. Convention, held in London, G.B., in April.—

The work of the Convention proper began promptly at 10 o'clock on Wednesday, the 21st, in the great Central Hall, Westminster, Lady Carlisle, the President, being in the chair. The hall was crowded and was decorated with the banners and flags of the various National Unions.

The roll call of officials and the Presidents of the different countries present and the Superintendents of the Departments with which the Union at large was concerned, was then read.

Miss Agnes Slack reported 42 countries represented, and stated that cablegrams of greetings had been received from South Africa (Acts 1: 8), Finland, Norway, Japan, the President of Scotland ("Remembering Convention all the time in prayer"), New Zealand, Victoria, Michigan (W.C.T.U. officers and members), and from Mrs. Helenius (Finland), who had been taken ill on the way. It had also been learnt that Miss Johansson, of Iceland, and the Swedish President and Secretary were held up at a Copenhagen through the strike in Denmark.

In Miss Slack's condensed summary of her General Report she said that the membership of the Union was 479,113, showing an increase of 31,394.

The following resolution, proposed by Lady Cecilia Roberts (who was most warmly received), seconded by Mrs. Clarkson, was cordially adopted:

"To our victorious comrades of the United States, Canada, Iceland, Finland, and Faroe Islands, we extend heartfelt congratulations. These triumphs over the liquor traffic are significant and presage a sober world."

Lady Cecilia said they must feel rather in the dust in England in view of the temperance victories of which they had heard. How much better chance there would be if every child born into this world had not before it the trouble arising out of the drinking system. The countries they were congratulating were all trying this wonderful way of doing without the cursed thing—drink—and it was difficult to acknowledge the help afforded them in the Motherland from the circumstance that both great and small countries had been able to accomplish these great tasks, and thereby bring about a better and sweeter life. She wished all the representatives had been able to be there.

The Japanese President, who was with them, was 88 years of age. There had been an increase of 1,000 in the membership of that country. The Union there had a Woman's Home and a Girl's Home entirely run by the W.W.C.T.U. As regards China, she said the liquor people in the United States wanted to make that country a centre for the sale of their liquor, but it was hoped to keep the liquor trade out.

As Miss Anna Gordon, who was the Co-Honorary Secretary with Miss Slack, was elected Vice-President, another was chosen to fill her place.

The British and United States ladies and others wished this office to come to Canada. She chose a Canadian and much to the amazement and quite unexpectedly the honor was bestowed upon the Editor of the Dominion official organ, "Canada's White Ribbon Bulletin," Mrs. Gordon Wright.

Keep Minard's Liniment in the house.

Save the surface and you save all Paint & Varnish

How much will it cover—How long will it last?

MAKE your home attractive and give it a protection that will prevent deterioration—and do both these things economically. The man who knows paint asks the two questions above, and his search for paint of proven economy must lead him to

B-H PAINT "ENGLISH" 70% Pure White Lead
30% Pure White Zinc
100% Pure Paint

Scientific investigation reveals a higher percentage of finely-ground white lead in B-H than in any other brand. The B-H guarantee stipulates 70% Brandram's Genuine B.B. White Lead (famous for two centuries) with 30% zinc white. Added to this is pure linseed oil and turpentine—all correctly mixed with the utmost care in a plant equipped with every modern device which ensures paint purity. These things all contribute to the B-H results, which is not only beautiful to look at when freshly applied, but also satisfactory to contemplate long after surfaces covered with ordinary paint have cracked and peeled and chipped away.
