Dr. HALL flings down the glove to all the world's opinion and asserts that pies and pastry are as healthful and more nutritious than roast beef or the best steak. He claims that they contain nutriment in a more condensed form, and that the ill effect so often attending their consumption, solely arises from our habit of eating them after we have made a hearty and sufficient meal of other food. But facts are better than fancy and any one can test this notion for themselves. As for us give us broiled steak justead of pie

GRAND DIET OF WORM!

As this preparation contains no mineral ingredient, the administration of it to young children is not followed by the dangerous, and, in many cases, fatal consequences resulting from the use of many of the Vermifuges at present before the public.

A compliance with the directions accompanying this, will prove that it deserves the character claimed for it above; while the promptness and painless character of it action render it the cheapest and eafest remedy for Worms discovered.
