MANHOOD HOW LOST, HOW RESTORED!

New Edition of Dr. Gulverwell's Celebrated Essay on the radical and permanent cure (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses

"Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the use of the knife pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and raducally.

This Lecture should be in the hands of every youth and every man in the land. Address

of Sale-For Lands, halt cash would require ten men, each of hours' labor to the watering of one acre. This process requires repeathis loins, is compelled to apply him-self to his task with all the energy at his command. In the delta and

At last he asked, "Have you cotsome distance above the point where it is used, is kept for a considerable

with nothing except a cloth round portion of the year, on very nearly the same level as the land. If, howfew feet, the more ordinary method is that of the "sakia," a rude machine propelled by oxen, cows, and horses, and sometimes causels and donkeys, and which raises the water by means of earthen jars attached to Harper's Magazine for October. an endless rope chain passing over

There are a few steam pumps, but tuel is too expensive, and labor too cheap to permit of their general use. The number employed is about 400, and these are mostly in Lower Egypt. They are used principally on large estates, but in some cases by those who irrigate the lands of the small farmers, at a fixed price per acre. This is generally where cotton is produced, which requires watering once in eight or ten days throughout the season. The water has ordinarily to be raised but an few feet, and the quantity required each time, when the wattering is so frequent, is much less. The usual price paid per acre is about 30es, and it is only the low price of farm labor that renders it practicable to cultivate lands requiring so much

Canadian Agriculture.

From Scientific American.

The American Consul-General at Cairo states that the tillable land of Egypt consists of the delta of the Nile, and a parrow valley extending. Nile, and a narrow valley extendingfrom Cairo southward. This valley is generally from one to ten miles wide, though for about one hundred and fifty miles above Cairo it has a width of from ten to thirty miles. Both the delta and the valley, except so far as the former borders on the Mediterranean, are bounded on all sides by mountainous deserts, and

Mediterranean, are bounded on all sides by mountainous deserts, and for more than two thousand miles from its mouth the river has not the smallest tributary.

It rolls on toward the sea, unlike other rivers, constantly decreasing in volume. As there are no rains of real properties of cattle and 9,465 sheep were all sides with the season of the season any practical importance, it sus-tains all vegetation, and all the inhabitants of Egypt and its herds drink of its waters. For two or tains, is attracting much attention three months in the year, a considerable portion of the country may be irrigated by the natural rise of the river, but with the exception of certain sections, the water is not permitted to flow freely over the land. It is taken from the river world to Consider The great of the control of the river. land. It is taken from the river and conducted by canals alongside the fields where it is to be used, and from 12,000 tons in 1880 to 15,601 the fields where it is to be used, and spread over the different parcels of land, if it is sufficiently high, and if not, it is raised by some of the various modes for that purpose. Small embankments prevent the water from running on to other lands that may not at the time be in a condition to receive it; in fact, the processes of overflowing the condition to receive it. In the processes of overflowing the condition of the country generally, lands, plowing, sowing, and harvest. lands, plowing, sowing, and harvest-ing are often being carried on simul-are also subjects of comment. Scotsman, August 20.

Why the Rev. Mr. Mulkittle Laughed.

From the Arkansaw Traveler maturity of the crop, the quantity of the water depending very much upon the kind of product. Rice entering the library of a well-known "Is this the Rev. Mr. Mulkittle?"

Let's go take something."

Let's go take something."
