BOARD OF TRADE TO GIVE FITTING WELCOME

Made-in-Canada Train Has No Terrors for the Manufacturers of Calgary and Will Be Officially Received—Resolutions Prepared

COUNCIL TAKES UP IMPORTANT MATTERS

Want Trunk Road Completed from Vancouver Through Calgary to Winnipeg—Better Care Should Be Exercised for Production of Live Stock by Not Killing Calves.

The Calgary board of trade will not take any action against the coming of the "Made-in-Canada" train from the west until an official welcome will be given to the train on its arrival in Calgary.

NOISE OF BLASTING WAS A SCARE TO MANY

A loud noise heard over most part of the city about midnight on Saturday appears to have scared many people in their beds, and yesterday The Albertan was kept busy answering calls on the phone asking where the big explosion was. After the calls began to come repeatedly, it was found out that the cause of all the din was the blasting of some blue clay on Roxborough Heights.

TORIES ARE CHARGED WITH CIRCULATING BOGUS TICKETS

Prominent Officials of Party and Government Accused of Printing and Distributing Forged Passes for Laurier Meeting at Toronto

OWN ATTORNEY IS ASKED TO PROCEED

Reform Association Took Up Matter After False Tickets Were Observed at Meeting and Information is Laid Against Two Conservatives

Toronto, May 18.—Information has been laid before County Crown Attorney Corey asking that proceedings be instituted for the punishment of R. C. Leaman, vice-president of the First Ward Conservative association, and inspector of plumbing at the City Hall, and of W. P. Curtis, formerly license inspector, an active member of the First Ward Conservative association.

"WAIT AND SEE," IS OPINION EXPRESSED ON FRIEDMANN CURE

The above picture shows Dr. Frederick Friedmann, the Berlin physician, whose results of the serum test for the cure of tuberculosis physicians are watching. They are divided on the question of efficacy of the new treatment. The general opinion expressed, however, by officers of institutions where the Berlin physician held clinics in the United States and Canada is:—"Wait and see."

It is believed that the Berlin physician's results of the serum test for the cure of tuberculosis physicians are watching. They are divided on the question of efficacy of the new treatment.

DR. BLOW ISSUES OPEN LETTER ON UNIVERSITY

These letters are addressed, not of course, to those constantly we are glad to say, increasing in number who are backing my associates in the university work and myself to ultimate success, but to those in the province who, perhaps from not having heard several aspects of the case, have been opposed to us.

WATERS OF PACIFIC ARE LET INTO CANAL

Panama, May 18.—The waters of the Pacific ocean were today let into the Panama canal. A giant blast, composed of 22 tons of dynamite, was exploded, demolishing the dyke at the south of the Miraflores locks and allowing the water to flow into an extensive section in which excavations have practically been completed.

DEPARTMENT OF STATE MAKES ANNUAL REPORT

Ottawa, May 18.—The annual report of the department of state for the fiscal year shows that there was incorporated in 1912-13, no less than 855 new companies, with a total capitalization of \$655,212,259.58.

TOWER AND ELEVATOR FOR BOW BRIDGE, SAYS MAWSON

Celebrated Planner Suggests a Low Level Bridge With Tower and Elevators Which Would Lift Street Cars and Other Vehicles Up Big Hill

HIGH LEVEL BRIDGE WOULD COST \$520,000

While the Low Level Bridge, With Elevator Would Cost Only About Half This Figure; Mr. Mawson Says High Level Bridge Unsatisfactory

City Planning Expert Mawson has suggested a somewhat novel idea for the bridging of the Bow river at Centre street.

He advises substituting a low level bridge and dan elevator, for the proposed high level bridge which tenders were originally advertised.

The preliminary estimates prepared by the city engineer for the single deck high level bridge, at Centre street, place the cost at \$520,000.

The construction of a low level bridge and tower would be much less expensive, and would also reduce the cost of operation of street cars on steep grade from the bridge to the top of the hill, and would eliminate the danger of the elevator in case of a fire.

Mr. Mawson has not yet gone thoroughly into the special use for which this suggestion was merely thrown out in the course of conversation. It is receiving consideration by several members of the town planning commission, and will probably be fully discussed with Mr. Mawson later.

DR. BLOW ISSUES OPEN LETTER ON UNIVERSITY

These letters are addressed, not of course, to those constantly we are glad to say, increasing in number who are backing my associates in the university work and myself to ultimate success, but to those in the province who, perhaps from not having heard several aspects of the case, have been opposed to us.

Let me say right at the beginning that this is most emphatically a non-political question. Outside of certain supervision by the government, in power (of which I shall speak later) this question, like others of the higher moral development of the people, is certainly beyond the limits of party politics.

Members of the University of Calgary governing board, senate, faculty and supporters comprise members of all political parties and creeds. It is a matter of the needs of a large section of our province, and it is a very serious matter for those who take the responsibility of opposing an institution which has for its aim only the betterment of the whole community.

Need is Demonstrated. The need of a university in southern Alberta has already been demonstrated by the success of the Calgary university this year, a success all the more remarkable because attained in spite of the lack of encouragement by the present government and other initial difficulties.

How much the more this need will grow with each succeeding year one can easily imagine from the continuous rapid development of southern Alberta, a number of members said prominent local Conservatives.

FIFTEEN MINERS ARE BURNED TO DEATH WHILE AT WORK

Imperial Mine at Belle Valley, Ohio, Scene of Terrible Tragedy When Fire Damp Expoded—Men Were Entrapped Without Warning

BODIES RECOVERED ON MORNING OF SUNDAY

One of the Rescuers and Assistant Superintendent Included Among the Dead—All Bodies Identified on Being Recovered

Belle Valley, Ohio, May 18.—Burned and blackened, the bodies of 15 miners who lost their lives early this evening, when an explosion of fire damp partially wrecked the Imperial mine, were brought to the surface today by the rescuers who worked under the direction of Deputy State Mine Inspector, Ellwood.

Several attempts were made to rescue parties to enter the mine last night, but the gas had not vanished sufficiently to allow the rescuers to reach the bodies until this morning. As each body was brought to the surface it was identified and taken into the engine room of the mine where it was prepared for burial.

The bodies were found a mile and a quarter from the mouth of the pit. They were lying on their faces, and were badly charred.

An investigation into the cause of the explosion will be made tomorrow by officers of the state mining department. The Imperial mine is owned by the O'Gara Mining company, composed principally of Cleveland stockholders.

Rescuer Overcome by Gas. Henry Fairhurst, a member of the first rescue party to enter the mine last night, was overcome by gas, and died soon after the explosion. He was found by the rescuers on the surface. Norville McCune, a companion, also was overcome, but was revived and will live.

Fairhurst and his party found the body of Roy Yeager soon after entering the mine. The body was light-colored and was placed in a casket. Fairhurst went ahead to clear a passage way for the cart and took them to the surface. The other members of the party fell down on their faces and waited a few minutes until the gas became lighter.

Then they placed Fairhurst's body in the cart and took them to the surface. Yeager was discovered to be alive and was removed to the hospital. It is said he will recover. He was thrown down by the explosion and was the only man to escape from the section of the mine where the explosion occurred. Yeager attributes his escape to the fact that his thigh was broken. He had to lie on the floor and was prevented from rising and inhaling the poisonous air. After a few hours he was able to get up and the rest of the party was found by the rescuers.
