Me have people who say we can't afford it. They forget that we must provide for the continued increased motor and truck traffic on our roads. These 1,800 miles of road are aimed to take off every county of the main artery, and so relieve the municipalities. There has been a big misconception as to the character of the roadwork. In certain sections the traffic has so increased that it is now necessary to improve and strengthen the road to stand the strain. Must Be Careful.

Discussing further the value of the farmer to the country, the speaker asked if it would not be better if a city like Toronto was divided into ten cities of 60,000.

"I want to say a little about roads," he continued. "The premier has already spoken of the different classes of crities.

Must Be Careful.

Touching briefly on the issue of recall the speaker cautioned the farmers in their selection of a candidate for the federal elections as well as other times and impressed upon them the fact that when elected such a member was still subject to their wishes. "You have now a Cavernment as a Cavernment as a Cavernment as a continued." For instance, there has been, we found, a tremendous laxness as regards the timber resources. The province has been defrauded out of vast sums. This was one of the first questions considered, and our commission, I declare, has justified itself. It certainly showed that conditions needed instant readjustment. Action, however, has been entered, and prosecutions will finish the deal.

MONTREAL, August 3.—Both song and story have always depicted the young man as leaving home and mother to build a "little grey home in the West" for the girl he loves, but Miss May V. Hazlett, an English ady, has reversed the order of things. For four years she has lived alone on a farm, homesteaded by her brother, in the big Touchwood Hills, Saskatchewan, has worked the land herself, made money at it and is now in Montreal on her way to England to get married. After a three months' stay there she will return with her husband to settle on her Saskatchewan face. Saskatchewan farm.

Her brother, Lieut. Robert Hazlett, was killed at Vimy Ridge when serving with the Canadian forces, and he left the farm to her, advising her to sell it. She was a stenographer in Saskatoon at the time, and although she had never lived on a farm she was tired of "pounding the keys," she said, and decided to try to make it go.

Many children innocently cheated out of the very food they need daily

Everyone knows that health is the most valuable asset of life. From birth to maturity is the "construction period."

A robust and healthy child will usually develop into a vigorous man or woman. But malnutrition will invariably hamper normal growth and when the child reaches maturity he or she is anemic, poorly nourished and liable to disease.

Many children today are innocently cheated out of the very foods they need. Some parents, either through lack of knowledge, or carelessness, do not provide those foods which strengthen and nourish the growing child.

It is the duty of parents to think for the child in these matters.

Grape-Nuts, the well-known food made of whole wheat flour and malted barley, served with milk or cream, is one of the most nutritious foods in the world. It provides the elements necessary to nutrition and is a balanced food.

Quite aside from its superior nutritive value, is its delicious appetite appeal. Especially attractive with fresh fruits or
