GUIDE-ADVOCATE, WATFORD' SEPTEMBER 3, 1920

CHILDLESS WOMEN

Piease Read This Letter And See What Normal Health Will Do For You.

Rerwick, Ont. - "I had organic trou-ble, and after taking Lydia E. Pink-ham's Vegetable Compound and Blood Medicine all my troubles passed away. I was made strong and well and have been ever since. Now we have a fine baby boy six months old, and I know that I would not have this baby and would still be suffering if it had not been for your remedies. My husband and myself say that your remedies are worth their weight in gold, and I recommend them to my friends. One of my aunts is taking them now."--Mrs. NAPOLEON LAVIONE, Berwick, Onto: Mrs. NAPOLEON LAVIONE, Berwick, Onto: Mrs. VapoLeon Gavina Stability to correct sterility in many cases, This fact is, well established as evi-denced by the above letter and hundreds of thems. The many other homes once childles

columns.

In many other homes, once childless, there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal,

Compound makes women normal, healthy and strong. If you have the slightest doubt that Lydia E. Pinkham's Vegetable Com-pound will help you, write to Lydia E. Pinkham Medicine Co. (confidential), Lyrn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Just push back the rugs and start the Victrola

Then-"On with the dance!" That's how easy it is to "put life into the evening" when you have a Victrola. And good dance music is only one of the endless joys it brings.

Have you a Victrola? You can have on the easiest of Harper Bros. Watford

which is about 0,000 reet in neight. Another sulphur deposit has been dis-covered on Akun Island, in the same group, and a third near Stepovak Bay, on the southern shore of the Alaskan Peninsula. eription \$2 00 per annuni in advance. \$2.50 in advance to the United States.

Plundering Churches.

Vandals and robbers in Vienna have turned from plundering graveyards to robbing churches. Several famous Vienna edifices have been en tered recently, among them the his-toric Mariahilf and Rochus churches, and robes and altar vessels of great value have been stolen. The police say there are about 40,000 persons in Vienna who may be classed as criminals. They report 1,405 bur-glaries in the city within minety days, with 965 arrests and the recovery of loot to the value of 60,000,000 crowns.

Millions In Salmon.

Since the Columbia river salmon canning industry was started by pioneer fishermen in 1876, a total of \$130,000,000 worth of salmon has been taken from the 90,000 acres of fishing territory in the river from Cascade locks to its mouth.

Many children die from the as saults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, en-feebling them and endangering their lives.

HAVE PLENTY OF BOCHE GUNS

ssertion Made That Every County in the United States That Wants

One Can Have It.

Before the summer heat becomes oppressive and the patriotic Independence day fervor is extinct veterans will have a chance to tell the home folks gathered in the town square the mechanism of the captured German annon or heavy machine gun that will be given the township.

Last summer requests for such cannon were so numerous that it was thought there would not be sufficient material for every county in the Unit-ed States. But Chairman Kahn, of the house military committee, thinks differently.

In the house the other day he said there were approximately 1,300 cap-tured cannon and 4,000 abandoned machine guns to the credit of the United States army and that only delay on the part of the war department has prevented general legislation which would grant at least one piece to every township in every member's district. Such a measure be intimated, ought to pass both house and senate before early summer.-Stars and Stripes.

Artesian Wells.

Lightning Rods. Though electric storms reach their highest frequency during the heat of summer, they often occur in the spring, and fire losses caused by lightning are by no means unknown in May and early June. Lightning rods have proved an almost absolute protection. Only in

almost absolute protection. Only in very rare instances have they been known to fail, and even in these cases the failure was probably due to defect installation or to de-terioration. Examine your lightning rod in-

stallations for broken insulators, for bends in the cable which allow con-tact with the framework, or for corrosion where it enters the earth. The latter is an important point. The electricity is carried into the ground by means of the cable; if it corrodes, the ground connection is thereby broken, a fire is liable to result. See to it that the cable is sound and is deep enough in the ground to always be in damp earth. When building wire fences it is always advisable to use ground wires about every five rods. Lightning is attracted by wire fencing, and as during a storm animals will congre-gate near fences many of them are killed by contact with the wire These grounds may be made of No. 9 gauge wire given one turn around each strand of the fence and carried into the earth beside the fence posts.

Canadian Dairy Production.

The Dominion Monthly Bulletin of Agricultural statistics reports that the value of Canadian dairy produc-tion increased from \$146,000,000 in 1915, to \$252,000,000 in 1919. The value of holdings in farm animals in Canada increased in the same time from \$73.958.000 to \$1.452.000.

Mr. John Farrell now sports a handsome gold-headed cane present-ed to him by the directors of the Shetland picnic.

Shetland picnic. Time Has Tested It.—Dr. Thom-as' Eclectric Oil has been on the market upwards of thirty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellen-ce has carried its fame beyond the seas. It has no equal in the whole list of liniments. If it were double the price it would be a cheap lini-

the price it would be a cheap lini-ment. m

Happily Stopped When He Began To Take "Fruit-a-tives"

8 OTTAWA ST., HULL, P. Q. "For a year, I suffered with Rhes-matism, being forced to stay in hed for five months. I tried all kinds of medicine without relief and thought I would never be able to walk again. One day while lying in bed, I read

about "Fruit-a-tives" the great fruit medicine; and it seemed just what I needed, so I decided to try it.

The first box helped me, and I took the tablets regularly until every trace of the Rheumatism left me." LORENZO LEDUC.

50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

TASTE ALONE will tell how good it is

> Just you try a loaf of our delicious Bread and you'll know why it is so popular in Watford and surrounding country.

W. C. AVLESWORTH, Publisher. T. HARRIS, Editor. (Inide-Advocate WATFORD, SEPT. 3, 1920. EXPANDING CREATION. Our Knowledge of the Universe Con-

tinues to Grow. The high priests of Babylonia and Egypt, 3,000 years and more ago had a considerable knowledge of astron-

omy; but, leaving out of question the few thus learned in science, creation to the ancients was a three-storey affair, or rather two stories and a cel-lar, the latter being the abode of the dead, while on the second floor, ornamentally bespangled with stars, dwelt

the gods. Earth, of course, was flat. The sun passed across the heavens once in every twenty-four hours, and, going under, appeared again in the east next morning. There was also the moon, which had a similar habit; and that was about all there was of the cosmos.

Since then our ideas on the subject have vastly expanded, and now, in view of recent discoveries, they seem destined to expand enormously be-yond anything hitherto imagined. We are beginning to grasp the notion of other universes outside of our own-at distances from our own universe well night inconceivable.

The Rev. Jasper declared that "the sun do mewer" He was right. Not only does it revolve on its own axis (as may be plainly seen by the "spots" which travel across its disk), 'spots" but it is moving in a straight line through space, like a gigantic projectile, at a speed of at least ten miles a second. As it thus moves, the earth and its sister planes, of course, go with it.

Astronomers, in the course of centuries, have acutally been able to observe this movement, by the closer gathering of stars in the sun's wake and the widening out of constella-tions ahead of us—just as might be noticed of trees and houses passed or

approached in a railroad train.

CE

J. C. Neelands, 12th con., Plymp-ton, was badly bruised about the shoulders one day last week. when he fell off a load of oats to the barn floor. The trip rope on the slings broke on which he was pulling and caused the accident.

GATARRH CANNOT BE CURED with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a local disease, greatly influenced by constitutionai conditions, and in order to cure it you must take an internal remedy. Hall's Catarrh Medicine is taken in-ternally and acts through the blood on the mucous surfaces of the suy-tem. Hall's Catarrh Medicine was prescribed by one of the best physi-cians in this country for years. It is composed of some of the best blood rurifiers. The perfect combi-nation of the ingredients in Hall's Catarrh Medicine is what produces such wonderful results in catarrhal conditions. Send for testimonials free. GATARRH CANNOT BE CURED

free. F. J. CHENEY & CO., Props., Toledo O. All Druggists, 75c. Hall's Family Pills for constipation.

All the stars are suns, most of them much bigger than our own solar luminary, and every one of them is traveling at a terrific speed. The so-called Runaway Star (known to as-tronomers as 1830 Groombridge) is going at a rate of 200 miles a second. What imaginable power could have set all these suns in motion? And why are they all traveling in different directions, apparently? Our own seeming destination is the constellation Lyra.

It is now thought probable that our universe, which we call the Milky Way (we seem to be not far from the centre of it) is in reality a vast spiral in form, and that this spiral spirat in rown, and that this spirat is revolving, so to speak, in its own plane. Assuming this to be true, the straight line in which our sun appears to travel is actually a curve. What has led to this belief is ob-servation of other spirals which are now thought to be distant universes, many of them so far away that light

many of them so far away that light from them, traveling 186,000 miles a second, takes something like 10,000,second, takes someting like 10,000, boot years to reach us. Their form plainly shows that they are revolving. Everything in the cosmos seems to go round and round. The moon travels around the earth, the earth around the sun; and presumably the sun is following an orbit about some centre whether a clast sum or more by

centre, whether a giant sum or merely a point in space. Our universe (if the theory above outlined by accept-ed) is whirling. Probably, as it whirls, it is making a journey of its own about some centre nervous in own about some centre, perhaps in

concert with other universes. Space being infinite in extent, it is, when one comes to think of it, absurd for us to imagine that ours is the only universe. We shall never know. But at least

we may claim that out ideas on the subject of creation are expanding.

Sulphur Mine In Crater.

Sulphur Mine In Crater. In the crater of a snow-capped volcanic mountain on Unalaska Is-hand, one of the Aleutian group, is a large deposit of sulphur, believed to contain from 10,000 to 15,000 tons, says Popular Mechanics. A claim has been filed for the location, and min-ing operations probably will start in the near future. Subterranean heat and a hot vapor, the latter issuing from cracks in the rocks, keep the deposits free from ice and snow, though thirs' Dirmanently cover nearly all the remaind: "The pect.

Artesian wells derive their name from an old county, now part of France, called Artois-in Latin. tesia. Here, a well was bored in 1126. Wells of this type have been used in Europe for centuries. In the Sahara desert numerous wells have been sunk by the French government. Several Arab tribes have settled around these artificial springs and water bein, abundant, have made their little villages attractive with palms. It is also interesting to note that the Chinese have long been acquainted with artesian wells.

Relief For the Depressed.—Phys-ical and mental depression usually have their origin in a disordered state 'of the stomach and liver, as when these organs are deranged in their action the whole system is af-fected. Try Parmelee's Vegetable Pills. They revive the digestive processes, act beneficially on the nerves and restore the spirits as no other pills will. They are cheap, simple and sure, and the effects are lasting. m

CASTORIA For Infants and Children In Use For Over 30 Years Always bears

Has deep, wide, luxurious seats, with plenty of room. Unsurpassed in anything near its price in riding qualities. Has very high grade heavy upholstering. Has roller bearings in front hubs. Has double bulb headlight system, which is more efficient than dimmer type. Has a magneto to furnish ignition independent of storage battery.

Repair parts can be had almost anywhere at very little cost.

Has real service behind it which has never been attempted to equal.

Can always resell a used Ford to better advantage.

Orders are still coming in faster but just now I am getting a good bunch every week. Will be able to give fairly prompt delivery. Once you are in the 1920 Ford the decision is made.

R. MORNINGSTAR
