- It has steel frame extensions.
- It has steel pole extension.
- It has steel breast plate.
- It has steel drive wheel.
- It has a splendid tilt.
- It is the best constructed Binder.
- It is the best finished Binder.

SPRING FAIRS

The Spring Fairs are now over, and "The Brantford Light Steel Binder" has gained new laurels and won new victories.

Farmers are sometimes induced by the representations made to them, to place orders for machines that have not been tested, and which they have never seen. All sorts of stories are told them, and in most cases, "The Brantford" is made the subject of comparison. Such stories are sometimes believed, but as soon as "The Brantford Binder" is seen and examined all these plausible tales are scattered to the wind.

A great many farmers have examined our Binder at the Spring Fairs, and a large number of them have favored us with their orders, and still they come.

At two Spring Fairs held at Weston and Kleinburg Diplomas were awarded "The Brantford Light Steel Binder," over "The Toronto," "Milwaukee Jr.," "Watson" and "Patterson."

In every point "The Brantford" leads, and competent judges always award the Palm of Merit where it justly belongs. Don't be deceived, "The Brantford" is the leading machine of the age, and you should not delay in placing your order for one.

ORDER AT ONCE.

Already about 1,400 "Brantford Binders" are placed for the coming season. We have shipping orders in hand now for 36 car loads, and have already shipped over 60 cars.

In every section of Canada "The Brantford" leads, and if you want the best machine made, place your order for a "Brantford" without delay.

REQUISITES FOR PERFECTION.

The following points will all be found in "The Brantford Light Steel Binder," brought to a higher state of perfection than in any other:

- Will cut closer than any other.
- Will bind better than any other.
- Will handle tangled grain.
- Will handle long grain.
- Will handle short grain.
- Does not require a relief rake.
- Does not require an extra packer.
- Does not require constant adjustment.
- Goes off like a charm.
- Canvas runs close to the knife.
- Has an endless adjuster canvas.
- Has a perfect twine box.
- Has an unequalled tension.
- Has a single compress finger.
- Makes different sized sheaves.
- One chain drives conveyor and elevators.
- Is all that can be desired in a Binder.
- Has been thoroughly tested.
- Succeeds when others fail.
- Has larger sale than any other.
- Have the best, "The Brantford."
