

Potash means Profit

No Farmer, Market Gardener or Orchardist, who wishes to get the MAXIMUM PROFIT from his Land, can afford to remain ignorant of this Most Important Plant Food.

In the Ordinary Process of Cropping, Nitrogen, Phosphoric Acid and POTASH are Removed from the Soil, and unless these are returned in some form, the Land will Eventually Become Unproductive.

Write us for Free Copies of our Bulletins, treating of this subject, which include:—

Fertilizers, their Nature and Use; Fertilizing Orchard and Garden; the Potato Crop in Canada; Tabulated Results of Fertilizer Experiments; The Farmer's Companion, etc.

Temple Building, TORONTO, ONT.

THE PHILO SYSTEM OF **Progressive Poultry Keeping**

This new system of Poultry Keeping is becoming better known by those interested in the Poultry Business. We have tried the system for some time and are perfectly satisfied that all Mr. Philo claims in his book can be accomplished. We hatched 510 ch'cks with his "Cycle Hatcher" last spring and raised 453 to maturity in his fireless brooder and brooder coops. We matured pullets of eighteen different varieties that began to lay at the age of from four and one-half to five months. Our pullets are doing fine in the Economy Coops out in the snow in my back yard, with thermometer at 10 degrees below zero. I have had no trouble whatever with disease or lice. Stock is all healthy.

Send for the "PHILO SYSTEM" Book, which explains all about the system; Price, \$1.00. We also keep the Cycle Hatcher in stock; Price, \$6.50 each.

Send for descriptive circular.

Address **H. S. HALLMAN**
