THE

**Field-Stirling Boilers**

ARE UNEQUALLED FOR

**Safety, Economy of Fuel,  
Dryness of Steam and  
Durability.**

They are the cheapest Boilers in the market for the actual amount of water turned into dry steam per hour, and this is the only reliable test of the power of any boiler. They are safe at any pressure. Our boiler tubes are tested at 1,000 lbs. per square inch. Our plates are tested at 60,000 lbs. per square inch. No cast iron is used in these boilers. No disastrous explosion is possible, because the flame never touches the shell at all. The circulation is perfect. All the water must pass through the large mud drum and deposit its sediment. For full particulars and prices apply to the manufacturers.
