Recis Department.

From Canada Papors, to November CC.

STATISTICAL -" The Oceand Report of the Spore tary of the Board of Registration and Statistics on the Course of the Canadas for 1951 1852 " has been broke printed and distribute. The tal olar portion or main body of the work consists of three Appendices, containing Beturns of the Agricultural produce of Upper and t Lower Canada, and of milk, manufactories &c. of Upper Canada. The Report prefixed to those Tables. exsunding over 48 lange octave pages, pentains matter of mord general interest, drawn up in a milable and amusing form. Carlous comparisons are occasionally availe with like points in the last British Consus. Thus, while in Great Britain the number of females exceeds that of chales by 31 percent, in Upper Canada die males exread the females by Oper cent, in Lower Canada very blightly about 1 per cent. Thus the chances of the fair sex for a matrimonial settlement are more promising in Canada, topecially in the western parts, than in The number of widows in both Provinces England nearly doubles that of widowers, and of both no fewer than 35 are over 100 years of ages while about 400 are found between the ages of 90 and 140. The Indians, those ancient or aboriginal lords of the soil, still number 6203 in Upper, 3520 in Lower Canada. Coloured persons amount to nearly 5300, of whom not a wath part are to be found in the Eastern section of the Province. Mr. Hutton, the Secretary of the Board, who signs the Report, bas entered very minutely into the statistics relating to the deaf, dumb and blind. Of these the deaf-mutes, persons both deaf and dumb from their birth, claus especial commiscration. By the patient and zealous perseverance of individuals, results amounting to minacles have been achieved in many instances, and nowhere with greater success than in the United States. The number of deat mates in Lower Canada amounts to 665, in Upper Canada 478, in the former the blind are 554, in the latter 316. For this exects of afflictions in the ancient section of the Province, there is one leading cause with avveral subordinate reasons. The Report alludes briefly to some of these, but dies not at this part refer to the main cause, which is acknowledged to have physically a powerful effect, the frequency of tee closely related extramerisages. Thus again in Lower Canada the number of the income, lunatics and idiots, exceeds 1700, while in the Upper Province they do not nearly reach 1100. Some tables relating to different stages of life and longerity, are next given with suitable comments; and the causes of death and discase are succincily considered with concomitant lists and enumerations. Lastly comes the Return of religious denominations, and much amusement may be derived from a perusal along of the creeds not classed. Canada certainly has her abare of sectaran distinctions among the countries of the earth-Q. Claun.

THE NEW AUCTIC EXPEDITION. The decessity for one of the two searching parties proposed by Dr. Rae to be sent out to the Arctic regions,-viz., that for finding Capt. Collinson-has been superscued by the Captain's return, made public since Dr. Rae's arrival in England, and the publication there of his letters &c. The other will be organized as soon as the navigation of the Red River opens in the spring. The arrangement of all the details has been judiciously lest in the hands of Sir George Simpson, who we learn, despatches one of his clorks and a party of Iroquois on Monday next express to the Red River settlement. They proceed via Chicago and St. Paul's, and thence overland about ov . miles to the settlement. The party organized there was proceed to Dack's River, and search for the remains spoken of by the E-quimant, and ascertain if any of the crows of the ill-fated expedition are by any change still living amongst the Esquimaux Montreal

REVISION OF THE TABLET - We clip the following from the Montreal Herald - " The new Torist to be as Gillows. Super retined is leaves, crustical as candy, procest 12. Latest from the Ebat of War.

The Morning Chronielo contains the following interesting summary of the latest news from the seat of War in the East—Brought by the Steamship Africa to New York, copied from American papers received by the 'America,' one of Wier's packets between Boston and this port:—

BIEGE OF BERASTOPOL.

Vienna Nov. 16.—A telegraphic despatch from a Russian source, dated Odessa, Nov. 11, nanoquees that no events of importance had taken place before Sebastopol on the 6th, 7th or 8th. The Russians were occupied in repairing the damage done to the fortifications. On the 6th the allies were notively pursuing their siege operations. The situation of the besiegers on the 8th was pridently a good one. The action of the 5th had produced its effects

The Moniteur of the 17th publishes a despatch of General Caurobert's of the 2d, and the continuation of his journal of the slege operations.

The French brigade Mayran has left Athens for the

The Moniteur states that a 5th company of the 3rd batallion is to be immediately added to 100 regiments of the line.

Intelligence has been received at the British war department of deaths, in the action of the 5th of November, of Lieutenant General Sir George Cathgart, Brigadier-General Strangs ve, and Brigadier-General Goldie. The sad intelligence reached the duke of Newcastle by telegraph in cypher on the 16th, but was withheld from the public for a day, in order to afford the necessary time for communicating the palulul intelligence to the widows and relatives of the deceased. Accounts received on the 17th report the deaths of Major Dalton and Major Powell, of the 49th regiment -the latter shot through the head by a Russian rifleman. General Evans was on board the Simpom, faid up with diarrhea, and the affects of a fall from a borse. A number of officers, wounded in the affair of the 5th, had arrived at Constantinople.

1: is not believed that any assault will be made until the allied army is strongly reinforced.

According to the last letters the weather had become extremely cold.

The Russians were carrying stores to the court side of the barbor, and making arrangements for the trapsport of troops to that quarter. This induces a belief that they did not expect to be able to retain the south side.

The French had carried a mine towards the main fortifications, and, while doing so discovered a strong Russian mine, intended to blow up the French breaching battery. The French then countermined and remarked 18 cm. of gowder from the Russian mine.

Secrety a house in Separtopol has escaped diet and shell. The reports of the hurries of the disspital and a flour manisture, and of great mortality in Bedastopol, appear to be correct.

Russian prisoners state that the authorites had infiamed the native of the voldiers and people towards the allies to the prestest infinity, by stading that the Russian prisoners and wounded were treated with the most tarbarous drugly. The man were therefore determined to resist to the last extremity, and made yows not to be taken after.

Splitts were from distributed to the troops wifered in the earth works

Sinco I wrote on the 28th git. the enemy liere of Mittely inercased bon love in the ralley of Tab. cross short in acultery, cavalry and infastry, and bave extended their lett, not only occupying the village of Damare, but the heights beyond it, and pushing forward puckers, and even guns, towards our cxtrems right, and those pesterday fired a few stem opparently to try the range, which fell somewhat suon. These more manua bave induced me to place as strong a force as I can dispose of on the precipitous ridge to that direction, in order to prevent any attempt to get found to Uslaklava by the era, and the whole time to strongthened by a breast work which has been thrown op by the Highland Brigade, Royal Marines, and the Turkish troops, thus Likelin seriling that part of the position, whilst immediately in front of the gorge, teauing into town, authors redoubt in in course of being completed, which is to be garrisoned by the 33rd regiment, and armed with several gans ; and on the manground behind and to the left manned by scamen, which terminates the position to be defended by the troops under the command of Major-General Sir Colin Campbell. Further to the test, and in a more elevated position, is the brigade of the first French civision commanded by Guneral Vinnie, ready to march to the assistance of any of the British forces that may be assailed, and maintain the convection between the troops in the valley and thuse on the ridge, on which the main armics are posted.

The harhor of Balaklava is under the charge of Capt. Lacres, of the Sausparoil, and rest-adminal Sir Edmund Lyons is in the roadstead outside, and is in daily communication with me. Thus, every step has been taken to secure this important point, but I shall not conceal from your grace that I should be more satisfied if I could have occupied the position in considerably greater strength.

With reference to the operations against Schartopol, there is no material-diminution in the enemy's fire and yesterday morning two hours before daylight, the cannonade from all parts of the south forts was heavy in the extreme, both on the French and English lines, and it occasioned some loss, but less than might have been expected, under the circumstances In the meanwhile the French, who have before them its town and real body of the place, have taken advantage of the mora favorable ground, and are carrying on approaches systematically on the most eilent and commanding part of the enemy's lines; and they have constructed and opened batteries, the position of the fire from which has most materially damaged the linsian works, although, as yet, they have not succeeded in silencing their guns,"

Italy.—The Univers has the following:—"Our letters from Roma are: of the 4th. The regiment of dragoons which has been in garrison there from the commencement of the occupation, and took part in the siege of 1849, has received orders to hold used in readiness to return to France. As there is no talk of its being replaced, its departure is considered as a step towards a complete exacuation of the papal states."

Iditorial Existenand.

MET according to Proclamation on Saturday fact. The clay was rether help fine for the season, and the usual formulation were choseved. It goodly number of Lades graced his Council Chamber. His Excellent looked well, and delivered a good speech, which will be found helow. We were clad to hear a distinct recognition of the mercies of Providence, in an examption from disease and in the abundant harvest. There was a meager attendance of M. P. P., not more that 22. Mr. Speaker docked well and dignified in his way, and resultate Speech from his clair with great propriety and gase. The members of Government reclected annealast Session were then sword in, in presence of Honbles. H. Bell and T. Kenny. The fair Chen, in proposing Mr. Twings as Clerk in places a least by hidden. You deceased, pronounced a nest analysished tribute to the memory of the latter, and expressed which sense of the fitters and expressed which sense of the litters and expressed which sense of the litter, and expressed him. The Host, L.T. Jahrston, who becomed his quality and in a member that the morning the doad, and approved of the living. Mr. James was proposed and seconded in a similar manner as Clerk Associate the best prohecoing heir clerkyd unar moved by Mr. Dayle, without comment, and seconded to Mr. Dayle, without comment, and seconded to Mr.
