

Dr. J. M. Lefevre, of Vancouver, B.C., passed through Toronto on his way to England in the latter part of September.

Dr. R. A. Reeve, Dean, had a serious attack of influenza at the time of the opening exercises. He went up to the gymnasium on the evening of October 1st with a temperature of 104, and while delivering his interesting address was obliged to cling to the lectern for support. After this he was confined to his bed for about ten days. He left Toronto for Preston Springs and came back in a couple of weeks in perfect health much to the delight of his friends, in time to entertain the medical students at a smoking concert on Halloween.

Miscellaneous.

The Treatment of Symptoms.

In a highly interesting article on this subject, Walter M. Fleming, A.M., M.D., of New York City, uses the following language: "Long experience in the treatment of diseases in their incipency, evidences beyond all debate, that almost invariably, the attack in a large proportion of cases is inaugurated by febrile symptoms of greater or lesser severity. Also, it may be noticed that constipation or torpid inactivity of the bowels prevails. Therefore, the first indication in the incubation or incipency of the attack, of almost any form or nature, is primarily to allay the fever, pain-nervousness and solicitude of the patient, and secondarily to empty the alimentary canal. These two ends being accomplished, a long advance towards a possible abortive issue of the attack has been made, or in any event, the first indication and requirements are fulfilled, in proper progress toward a cure.

Thus in the primary treatment of the numerous ills, which are characterized by the above quoted symptoms, the physician will find Laxative Antikamnia and Quinine Tablets at once handy, convenient and reliable, safe and sure, and to which the turbulent symptoms of fever, constipation, pain-sleeplessness, nausea and generally wretched depression yield so promptly and gracefully, that it is certainly refreshing to the physician himself, to note the change in his patient, from suffering and solicitude to comfort and quiet. I certainly know of no other remedy which will so readily and decisively allay and control the symptoms above enumerated."

"For therapeutic efficiency in rapid resolution of the products of inflammation, Antiphlogistine is unexcelled."

"Expectation becomes realization in all cases of localized inflammation where Antiphlogistine is applied."
