

THE CONTROL OF PAIN

is almost invariably the first indication for treatment in every acutely painful affection. But, in obtaining effective analgesia, care must always be taken never to alter or obscure the pathologic picture. The great therapeutic utility of

PAPINE

depends not alone upon its remarkable pain-relieving properties but also on its complete freedom from the narcotic and toxic action common to other opiates. Papine does not nauseate, constipate nor create a habit. It has, therefore, no contraindications of age or physical condition
