

IDEALS OF A STUDENT

SIR JOSIAH STAMP

ON RESEARCH is the paper published herein which the Principal wanted to refer to.

It is an excellent summary of the "how" to do and not to do "research" work.

(He says that if the thesis "four methods of dish washing" which got a Ph.D.degree

at Chicago had been entitled: The artificial breakdown of adhesion between

triglycerides of stearic, palmitic, oleic or other fatty acids and the glazed surfaces

of vitrified porcelain. A time motion study in modern detergency." it would have

got by Dr. Flexner!
