MAY BE ORDERED OF ANY BOOKSELLER.

## PRESS EXTRACTS.

We recommend all who believe with Pope that the "proper study of mankind is man," to read this book.—*Hamilton Spectator*.

It is such treatises as this which awaken and quicken thought, and open up almost boundless fields for speculation.—*Hamilton Evening Times*.

It is a work of thought and altogether remarkable. It is an original work, displaying a wide range of information, a power of acute and independent thought, such as a philosopher ought to possess, and no common ability to embody conclusions in simple words, so as to awaken reflection in the mind of those who may ponder over its chapters.—*London Free Press*.

Whatever opinion may be held as to the soundness of the views advanced by Dr. Bucke, there is no question that his book is an interesting contribution to the discussion of a very important subject.—*London Daily Advertiser*.

Without attempting an analysis of the argument we may describe it as the work of a man who writes with intelligence and in a charming spirit of candor. The style is clear and strong and the moral tone pure.—*The Christian Register, Boston, Mass.*

At every page we are struck by the originality of thought and the felicity of some unexpected illustration, and by them a flash of light is thrown on many subjects which before seemed quite obscure.—*Ottawa Free Press*.

It will undoubtedly attract attention and give rise to discussion, for it is not at all one of those compilations so common at the present day, but a fresh, original, and suggestive work.—*Canada Presbyterian, Toronto*.

It is full of suggestive ideas.—*Detroit Free Press*.

There is no small gratification in reviewing a book so replete with substantial, clever, and courageous writing as is the little volume now before us.—*The Canada Lancet*.

The book is worth reading even should the peruser differ from the writer, and all must admire the ingenious way many facts are brought in to uphold this material theory of man's moral nature.—*The Canadian Journal of Medical Science*.

This volume is a treat to the lover of good sense, good science, and good English.—*New Preparations, Detroit*.
